CONTENTS

Preface		9		
PART 1 -	GENERAL			
Chapter 1	INTRODUCTION			
Chapter 2	PROPERTIES OF SODIUM HYDRIDE			
	2.1 Physical Properties			
	2.2 General Chemical Properties	5		
	2.2.1 Description of Currently Manufactured Forms of Sodium	0		
	2.3 Analytical Chamistry of Sodium Hydrida	8		
	2.3.1 Measurement of the Specific Surface	9		
	Listi industrienen of the specific sufface	9		
Chapter 3	TECHNIQUE OF WORK WITH SODIUM HYDRIDE, SAFETY			
	MEASURES	10		
PART 2 -	APPLICATION OF SODIUM HYDRIDE IN INORGANIC CHEMISTRY			
Chapter 4	ADDITION REACTIONS OF SODIUM HYDRIDE WITH LEWIS ACIDS			
	4.1 Substituted Sodium Borohydrides	16		
	4.1.1 Halogenoborohydrides	16		
	4.1.2 Alkylborohydrides	16		
	4.1.3 Alkoxyborohydrides	17		
	4.1.4 Sodium Borohydride	18		
	4.2 Substituted Aluminohydrides	20		
	4.2.1 Alkoxyaluminohydrides	20		
	4.2.2 Alkylaluminohydrides	21		
	4.2.3 Sodium Aluminohydride	22		
	4.3 Substituted Complex Hydrides of Elements of Group II b	23		
Chapter 5	REDUCTION OF INORGANIC COMPOUNDS	25		
	5.1 Preparation of Volatile Hydrides by Reduction of Inorganic Halides	25		
	5.1.1 Boranes	25		
	5.1.2 Silanes, Germanes, Stannanes, and Phosphines	26		

	5.2	Descaling of Metal Surfaces	27				
	5.2	5.2.1 Descaling of Iron and Steel Objects	27				
		5.2.2 Descaling of Titanium and Its Alloys	29				
		5.2.3 Descaling of Other Metals	30				
	5.3	Other Reductions of Inorganic Compounds	30				
Chapter 6	ОТН	HER APPLICATIONS OF SODIUM HYDRIDE	32				
PART 3 -	- APPI	LICATION OF SODIUM HYDRIDE IN ORGANIC CHEMISTRY					
Chapter 7	NEU	JTRALIZATION	33				
	7.1	Introduction	33				
	7.2	Neutralization of Compounds with the -OH Group	34				
		7.2.1 Alcohols	35				
		7.2.2 Phenols	35				
		7.2.3 Alkyl Hydroperoxides, Oximes, Carboxylic Acids and Per- Acids	36				
	7.3	Neutralization of Compounds with the -SH Group	37				
	7.4	Neutralization of Compounds with the NH Group	37				
	7.5	Neutralization of Compounds with Activated Hydrogen on Carbon	40				
		7.5.1 Ketones	41				
		7.5.2 Esters of β -Keto Acids	41				
		7.5.3 Derivatives of Substituted Malonic Acids	42				
		7.5.4 Derivatives of Simple Fatty Acids	43				
		7.5.5 Derivatives of Especially Activated Organic Acids	43				
	7.6	Deuterolysis of Sodium Salts	44				
Chapter 8	ALK	ALKYLATION AND ACYLATION 44					
	8.1	Alkylation and Acylation of Compounds with the -OH Group	46				
		8.1.1 Etherification of Alcohols and Phenols	46				
		8.1.2 Esterification of Alcohols	50				
		8.1.3 Transesterification	52				
	8.2	Alkylation and Acylation of Compounds with the -SH Group	54				
		8.2.1 Preparation of Alkyl-S-Methyl Xanthates	54				
	8.3	Alkylation and Acylation of Compounds with the NH Group	55				
		8.3.1 Alkylation of Amines	56				
		8.3.2 Alkylation of Amides, Lactams and Imides	59				
		8.3.3 Alkylation of Urethans, Amidines and Substituted Ureas	62				
		8.3.4 Alkylation of Sulphonamides and Sulphonimides	63				
		8.3.5 Alkylation of Diazines and Triazines	64				
		8.3.6 Acylation, Tosylation, Mesylation	65				
	8.4	Alkylation and Acylation of Compounds with Activated Hydrogen on					
		Carbon	66				
		8.4.1 Alkylation of Substituted Indenes	66				
		8.4.2 C-Alkylation of Ketones, Ketimines and Phenols	66				
		8.4.3 C-Alkylation of Acids, Esters, Lactones, Amides, Nitriles,					
		Sulphones, and Alkyl Phosphonates	72				
		8.4.4 Alkylation of Esters and Ester Nitriles of Substituted Malonic	70				
		Acids	18				
		8.4.5 C-Alkylation of Esters of β -Keto Acids	84				

6

8.4.6 C-Alkylation of β-Diketones and Hydroxymethylene Ketones 88

		8.4.7 8.4.8 8.4.9	Syntheses of Cyclopropane Derivatives C-Acylation Acylation on Carbon by means of Halides of Acids, Anhy-	89 91	
			drides and Cyanogen Halides	91	
Chapter 9	CON	DENSA	TIONS OF THE ALDOL TYPE	94	
	9.1	Ethyny	lation of Carbonyl Compounds	94	
	9.2	Aldol (Condensation in a Narrower Sense	94	
	9.3 9.4	Claisen Reactio	Synthesis of Esters of Substituted Cinnamic Acids and Related	96	
	9.5	Darzen	s Synthesis	103	
	9.6	Stobbe	Condensation	105	
	9.7	Conder	sation of Aldehydes with an Active Methylene Group	107	
Chapter 10	CON	DENSA	TION REACTIONS OF THE CLAISEN TYPE	108	
	10.1	Synthes	sis of β -Diketones by the Claisen Condensation	110	
	10.2	Ester C	ondensations	116	
		10.2.1	Catalysed Autocondensations and Mixed Condensations of Esters	116	
		10.2.2	Dieckmann Condensation	122	
	10.3	Carball	coxylation of Ketones and Derivatives of Organic Acids	129	
	10.4	Formyl	ation of Ketones and Derivatives of Organic Acids	132	
	10.5	Alkoxa	lylation of Ketones and Derivatives of Organic Acids	135	
	10.6	Mixed	Condensations of Common Functional Derivatives of Acids	138	
Chapter 11	GEN	ERAL F	REACTIONS	139	
	11.1	Michae	l Addition	139	
	11.2	Reactio	on of Sodium Hydride with Halogenated Hydrocarbons	142	
	11.3	Elimina	tion	142	
	11.4	Isomeri	zation of the Double Bond	144	
	11.5	Nitratio	agements	145	
	11.7	Reducti	ion of Organic Compounds by the Action of Sodium Hydride	140	
	11.8	Hydrog	genation and Dehydrogenation in the Presence of Sodium e	151	
	11.9	Additio	n of Amino Derivatives to Olefines in the Presence of Sodium		
		Hydride	e	152	
Chapter 12	POL	YMERIZ	ATIONS BY THE ACTION OF SODIUM HYDRIDE	154	
	12.1	Polyme	rization and Telomerization of Aliphatic Olefines	154	
	12.2	Polyme	rization of Substituted Styrenes	155	
	12.5	Polyme	rization of Conjugated Dienes	156	
	12.4	Ketone	s	156	
	12.5	Alkalin	e Polymerization of Lactams	156	
	12.6	Other F	olymerizations	157	
	12.7	Trimeri	zation of Benzonitrile	158	
Chapter 13	OTHER USES OF SODIUM HYDRIDE
