

CONTENTS

Preface · xi

Acknowledgments · xiii

Introduction · xv

PART I. THE BIOLOGY OF GIANT KELP

1. Introduction to Giant Kelp Forests Worldwide · 3
 - Taxonomic Classification · 3
 - Evolution · 6
 - Biogeography · 11
 - History of Research (to 1970) · 16
2. The Structure, Function, and Abiotic Requirements of Giant Kelp · 23
 - Sporophytes · 24
 - Spores · 31
 - Gametophytes · 34
 - Basic Abiotic Requirements · 37

3. The Abiotic Environment · 41
 - The Kelp Environment · 41
 - Substratum and Sedimentation · 43
 - Temperature · 45
 - Light · 49
 - Nutrients · 55
 - Water Motion · 60
 - Concluding Comments · 69
4. Demography, Dispersal, and Connectivity of Populations · 71
 - Demography · 72
 - Metapopulations · 78
 - Reproductive Output and Sources of Propagules · 81
 - Spore Dispersal and Recruitment Windows · 84
 - Mechanisms of Dispersal · 87
 - Seed Banks · 90
 - Genetic Structure of Populations · 93

PART II. THE GIANT KELP ECOSYSTEM

5. Giant Kelp Communities · 101
 - A "Composite" Community · 102
 - Variation by Biogeographic Province · 104
 - Within Communities: Habitats and Patches · 125
 - Temporal Variation · 130
 - Diversity · 139
6. Detached Giant Kelp Communities, Production, and Food / Control Webs · 141
 - Detached Giant Kelp Communities · 141
 - Kelp Forest Productivity · 148
 - Food Webs and Control Webs · 152
7. Facilitative and Competitive Interactions in Giant Kelp Forests · 163
 - Facilitation · 163
 - Competition · 167
8. Grazing in Kelp Communities · 177
 - Kelp–Sea Urchin Interactions · 181
 - Why Do Urchins Rampage? · 185

Reversion of Barrens to Kelp Habitat · 188

Other Grazers in Giant Kelp Communities · 190

9. Predation and Trophic Cascades in Kelp Communities · 197

Fish Predation on Grazers · 200

Lobster Predation on Grazers · 202

Sea Otters and Predation on Grazers · 206

Other Predators · 212

PART III. HUMAN USAGE, MANAGEMENT, AND CONSERVATION

10. Anthropogenic Effects on Kelp Forests · 217

Sewage and Industrial Waste Discharge · 218

Runoff and Coastal Modification · 220

Intakes and Discharges from Power and Desalination Plants · 221

Boat Traffic and Toxic Spills · 224

Giant Kelp Harvesting · 225

Introduced and Invasive Species · 227

11. Human Usage of Giant Kelp and Kelp Forest Organisms · 235

Food and Fertilizer · 235

Chemicals · 240

Biofuel and Carbon Sequestration · 241

Aquaculture · 246

Recreational Use · 248

Sport Fishing · 248

Commercial Fishing · 251

Other Uses · 256

Restoration of Kelp Forests · 259

Artificial Reefs, Creation of New Kelp Forests, and
"Mitigation" · 261

12. Marine Protected Areas and Fisheries Effects · 265

What Is a Marine Protected Area? · 267

Design and Implementation · 269

MPA Effects on Fish, Fisheries, and Communities · 273

Gaps and the Future of MPAs · 281

PART IV. GLOBAL CHANGE AND THE FUTURE

- 13. Global Change · 285
 - Climate Change Variables and Predicted Trends · 286
 - Temperature · 291
 - Nutrients and Wave Forces · 294
 - Ocean Acidification (OA) · 295
- 14. Giant Kelp Forests: Conclusions and Final Thoughts · 303
 - Biology of Giant Kelp · 305
 - Communities · 307
 - Interactions · 310
 - Management · 311
 - The Future · 312
- Afterword · 317
- References · 319
- Index · 383
