

JOURNAL OF PALEONTOLOGY

VOLUME 88 ■ NUMBER 4 ■ JULY 2014 ■ ISSN 0022-3360

633 Imran A. Rahman and Selena Y. Smith

Virtual paleontology: computer-aided analysis of fossil form and function

636 Sam Giles and Matt Friedman

Virtual reconstruction of endocast anatomy in early ray-finned fishes (Osteichthyes, Actinopterygii)

652 Rachel A. Racicot and Timothy Rowe

Endocranial anatomy of a new fossil porpoise (Odontoceti, Phocoenidae) from the Pliocene San Diego Formation of California

664 Daniel C. Fisher, Ethan A. Shirley, Christopher D. Whalen, Zachary T. Calamari, Adam N. Rountrey, Alexei N. Tikhonov, Bernard Buigues, Frédéric Lacomat, Semyon Grigoriev, and Piotr A. Lazarev

X-ray computed tomography of two mammoth calf mummies

676 Martin Rücklin, Philip C. J. Donoghue, John A. Cunningham, Federica Marone, and Marco Stampanoni

Developmental paleobiology of the vertebrate skeleton

684 Else Marie Friis, Federica Marone, Kaj Raunsgaard Pedersen, Peter R. Crane, and Marco Stampanoni

Three-dimensional visualization of fossil flowers, fruits, seeds, and other plant remains using synchrotron radiation X-ray tomographic microscopy (SRXTM): new insights into Cretaceous plant diversity

702 Martin Dawson, Jane Francis, and Rosemary Carpenter

New views of plant fossils from Antarctica: a comparison of X-ray and neutron imaging techniques

708 Mena Schemm-Gregory

A new Givetian athyridid species from northwest Africa discovered by three-dimensional reconstruction of shell morphology of internal molds

719 Marisol Juarez Rivera and Dawn Y. Sumner

Unraveling the three-dimensional morphology of Archean microbialites

727 Stephan Lautenschlager and Martin Rücklin

Beyond the print—virtual paleontology in science publishing, outreach, and education

735 Russell Garwood and Jason Dunlop

The walking dead: Blender as a tool for paleontologists with a case study on extinct arachnids

747 James R. Lehane and A. A. Ekdale

Analytical tools for quantifying the morphology of invertebrate trace fossils

760 Jen A. Bright

A review of paleontological finite element models and their validity

770 Moriaki Yasuhara and Hisayo Okahashi

Quaternary deep-sea ostracode taxonomy of Ocean Drilling Program Site 980, eastern North Atlantic Ocean

786 Haiying Qu, Dangpeng Xi, Sha Li, Jean Paul Colin, Qinghua Huang, and Xiaoqiao Wan

Late Cretaceous–early Paleocene ostracod biostratigraphy of Scientific Drilling Sk1(N) in the Songliao Basin, northeast China

800 João Villar De Queiroz Neto, Benjamin Sames, and Jean-Paul Colin

Kegelina: a new limnic ostracod (Cypridae, Cypridoidea) genus from the Lower Cretaceous of the Americas and Africa

814 R. Antonio Gómez and Anders L. Damgaard

A rare diving beetle from Baltic amber: *Hydrotripes prometheus* new species reveals former widespread distribution of the genus (Coleoptera, Dytiscidae)

823 Shun-Xing Jiang, Xiao-Lin Wang, Xi Meng, and Xin Cheng

A new boreopterid pterosaur from the Lower Cretaceous of western Liaoning Province, China, with a reassessment of the phylogenetic relationships of the Boreopteridae
