

CONTENTS

1. INTRODUCTION.....	6
2. CLASSIFICATION OF FIBER CONCRETES.....	7
2.1. Conventional FC.....	8
2.2. High performance FC.....	9
2.3. Ultra-high performance FC.....	11
3. EXPERIMENTAL INVESTIGATIONS.....	15
3.1. Material characteristics.....	15
3.2. Testing of the beams with combination of reinforcement.....	16
4. MODELLING AND SIMULATION.....	17
4.1. Effect of FRC on load-bearing capacity	17
4.2. Effect of FRC on cracking.....	18
4.3. Inverse analysis.....	19
5. APPLICATIONS OF FIBRE CONCRETE IN STRUCTURES.....	24
5.1. Fiber concrete in prefabrication.....	24
5.2. Choice of suitable type of fibre concrete.....	25
5.3. Bridge cornice, crush barriers.....	25
5.4. Production of selected FRC elements.....	26
5.5. Sewer pipes.....	26
5.6. Prestressed beams.....	27
5.7. Preparing procedure of applications of FC in prefabrication...27	
5.8. Oval pipes.....	28
5.9. Anchorage zone	28
6. CONCLUSIONS.....	29
