Preface xi

About the Author xv

✓ Chapter 1 ENVIRONMENT, HUMAN SYSTEMS, AND SOCIAL SCIENCE 1

Ecocatastrophe or Ecohype? 2

Ecosystems: Concepts and Components 3

Ecosystem Change, Evolution, and Human-Environment Interaction 6

Sociocultural Systems 8

Culture 9

Social Institutions 10

Social Structure 10

The Duality of Human Life 11

Worldviews and Cognized Environments 11

Ecosystem and Sociocultural Evolution: Human Ecology 12

Industrial Societies 14

Environmental Social Sciences 17

Economic Thought 17

Sociological Thought 21

The Greening of Social Theory and Sociology 22

Conclusion: Environment, Ecosystems, and Human Systems 27

The Human Driving Forces of Environmental and Ecological Change 27

System Connections 27

Intellectual Paradigms About Human-Environment Relations 28

Personal Connections 29

More Resources 31 • Electronic Resources 31 •

Endnotes 32

Chapter 2 HUMANS AND THE RESOURCES OF THE EARTH: SOURCES AND SINKS 33

Land and Soil 34

Soil and Food 35

Addressing Soil Problems 36

Economic and Ecosystem Services: Pricing Soil Degradation 36

Water Resources	37
Growing Water Use and Its Problems	37
Water and Political Conflict	38
Addressing Water Problems	39
Freshwater Economic and Ecosystem Services	40
Biodiversity and Forests	40
Forest Resources	40
Forest Economic and Ecosystem Services	42
Declining Biodiversity	42
Addressing Deforestation and Declining Biodiversity	47
Wastes and Pollution	49
Chemical Pollution from Agriculture	50
Addressing Solid Waste Problems	52
Municipal Pollution	53
Pollution Trends	55
Conclusion: The Resources of the Earth	56
Personal Connections	57
More Resources	59 •
Electronic Resources	60 •
Endnote	60
Chapter 3 CLIMATE CHANGE, SCIENCE, AND RISK	61
Ozone Depletion and Ultraviolet Radiation	64
Destroying the Ozone Layer	64
A Cautionary Tale: Technology, Progress, and Environmental Damage	65
A Happy Ending?	66
Turning Up the Heat: Global Warming	67
General Circulation Models	68
Some Ambiguities in the Evidence	69
Evolving Science and Consensus	70
Impacts on Society	72
Controversy and Conflict	73
Do We Know Enough to Act?	74
Policy Options: What Could Be Done About Global Warming?	75
Strategies, Social Change, and Inequality	77
Greenhouse Diplomacy: Kyoto and Beyond	78
Can We Afford the Costs?	81
Understanding Uncertainty and Risk	82
Sources of Scientific Uncertainty	82

Assessing Risks: Analytic Modeling 86

Social Contexts of Risk: Organizations and Society 87

Conclusion 89

Personal Connections 89

More Resources 91 • Electronic Resources 92 • Endnote 92

✓ Chapter 4 ENERGY AND SOCIETY 93

A Historical Detour: Recent Energy Crises 94

Energy Problems: Environmental and Social 96

Source Problems: Energy Resource Supplies 96

Population Growth, Economic Development, and Distribution Problems 97

Policy and Geopolitical Problems 98

Sink Problems: Energy and Environment 99

The Energetics of Human Societies 101

Low- and High-Energy Societies 102

Social Science and Energetics 103

The Present Energy System and Its Alternatives 110

Fossil Fuels 110

Nuclear Energy 112

Renewable Energy Sources 114

Barriers, Transitions, and Energy Policy 120

Barriers to Change 121

Transitions and Policy 122

Conclusion: Energy and the Risks We Take 123

Personal Connections 123

More Resources 125 • Electronic Resources 125 •

Endnotes 126

✓ Chapter 5 POPULATION, ENVIRONMENT, AND FOOD 127

The Dynamics of Population Change 129

The Demographic Transition Model 130

The Demographic Divide: MDCs and LDCs 132

Population Redistribution: Urbanization and Migration 133

How Serious Is the Problem of World Population Growth? 138

Neo-Malthusian Arguments 139

Economistic Arguments 139

Inequality Arguments 140

Making Sense Out of This Controversy 142

Population, Food, and Hunger 144

Change and the Contours of World Hunger 145

Explaining World Hunger 146

Feeding Nine Billion People in the Next Fifty Years? 150

Biotechnology? 150

Sustainable Agriculture: Agroecology and Low-Input Farming? 152

Stabilizing World Population: Policy Options 155**Conclusion 156****Personal Connections 156***More Resources 159 • Electronic Resources 159 •**Endnote 159***Chapter 6 GLOBALIZATION, INEQUALITY,
AND SUSTAINABILITY 160****Social Science Perspectives and Globalization 161**

Globalization Perspective I: Neoliberalism 161

Globalization Perspective II: World-System Theory 163

Globalization Perspective III: Landscapes and Global Flows 165

Globalization and Social Inequality 165

Inequality and Environmental Impact 167

Sustainability 170**Growth and Sustainability: Two Perspectives 172**

Limits to Growth: Outbreak-Crash 172

Ecological Modernization: Prosperity While Protecting the
Environment 176

Understanding the Controversy 179

Promoting More Sustainable Consumption 180

Growth, Well-Being, and Happiness 181

More Sustainable Societies? 182Integrating Perspectives: Agency, Structure, and
Time Horizons 184

Time Horizons 185

Conclusion: A Transformation to Sustainability? 186**Personal Connections 187***More Resources 190 • Electronic Resources 190***Chapter 7 TRANSFORMING STRUCTURES:
MARKETS AND POLITICS 191****Markets 192**

Market Failures 193

Market Incentives: Environmentally Perverse or Not?	195
Transforming Markets and Consumer Behavior: Green Taxes and Buying Green	195
New Measures of Economic and Social Progress	197
Rational-Choice and Human-Environment Problems	198
Markets Alone Are Not "the" Answer	199
Politics and Policy	201
Strategies for Public Policy	201
Policy and the Economic Production Cycle	203
Policy and Social Structure	203
Politics and the Limits of Policy	204
The Recreancy Theorem—Mistrust of Regulatory Agencies in Complex Societies	208
Possible Levers for Progress	208
The Environmental State and Regulatory Policy	208
Ecological Modernization	209
Community Management of Commons Resources	210
Tradable Environmental Allowances	212
Comparing Tradable Environmental Allowances and Community Resource Management	213
The Global Political Economy and the Environment	214
Organizations, Treaties, and the Environment	215
Transnational Corporations (TNCs)	216
Protesting Globalization: Trouble with the World Trade Organization	216
International Treaties and Regimes for Environmental Protection	217
Conclusion	219
Personal Connections	219
More Resources	221 • Electronic Resources
222	

✓ Chapter 8 ENVIRONMENTALISM: IDEOLOGY AND COLLECTIVE ACTION 223

American Environmentalism 225

Early American Environmental Movements, 1870–1950	226
American Environmentalism Since the 1950s	228
Reform Environmentalism and the Environmental Lobby	230
Environmental Justice and Grassroots Movements	232
Other Voices: Deep Ecology and Ecofeminism	236

Other Voices: Ecotheology and Voluntary Simplicity	240
Movement Activism: Grassroots and Astroturf	242
Antienvironmentalism: Manifest Destiny and Countermovements	243
Global Environmentalism	246
Environmentalism: Popular Support and Change	249
People and Environment: Attitudes, Commitments, and Behaviors	249
Environmentalism: How Successful?	251
Personal Connections	252
More Resources	253 • Endnotes 254
Epilogue	255
Glossary	258
References	266
Photo Credits	289
Name Index	290
Subject Index	297

Chapter 8 ENVIRONMENTALISM: IDEOLOGY AND COLLECTIVE ACTION

Conclusion: A New Paradigm	223
American Environmentalism: Ideology and Action	223
Early American Environmental Movement, 1870-1920	224
American Environmentalism Since the 1920s	228
Reform Environmentalism and the Environmental Policy	230
Environmental Justice and Grassroots Movements	232
Other Voices: Deep Ecology and Ecofeminism	238
