

Content

Zinc signals and the control of immune cell functions.....	8
Metallothionein and neuroinflammation.....	9
Metallothionein in cancer development.....	11
Pathways in zinc resistance.....	12
Metallothionein – immunohistochemical cancer biomarker: a meta-analysis.....	13
Electrochemistry of metallothioneins.....	14
Metallothionein and its role in metabolism of free radicals.....	16
Metal nanoparticles in soils and cells.....	18
Immunohistochemical detection of metallothioneins.....	21
Capillary electrophoresis of metallothionein.....	23
DNA based biosensor for an evaluation of damage to DNA by quantum dots.....	25
The composites of graphene oxide with metal or semimetal nanoparticles and their effect on pathogenic microorganisms.....	27
Electrochemical detection of Cr(III) ion using activated glassy carbon electrode.....	32
Magnetic beads based isolation and electrochemical detection of specific influenza sequences labeled by quantum dots.....	36
Influence of oxidation stage and exfoliation extent of carbon-based materials on electrochemical detection of As(III).....	40
The study of interaction of graphene oxide with selenite anion using DPV.....	45
Study of the interaction of graphene oxide with chromate anion using AAS.....	50
Biological activity and molecular structures of bis(benzimidazoles) and trithiocyanurate complexes.....	54
Automatic electrochemical determination of soil contaminated by heavy metal ions (Cd(II) and Pb (II)).....	59
UV tuning of cadmium telluride quantum dots (CdTe) – assessed by spectroscopy and electrochemistry.....	63
Quantum dots in fluorescence resonance energy transfer- based nanosensors and their application.....	68
Zinc resistant prostate cancer cell lines and methods for their analysis – workshop.....	72
