

The International Mathematical Olympiad (IMO) is an annual international mathematics competition held for pre-collegiate students. It is also the oldest of the international science olympiads, and competition for places is particularly fierce. This book is an amalgamation of the first 8 of 15 booklets originally produced to guide students intending to contend for placement on their country's IMO team.

The material contained in this book provides an introduction to the main mathematical topics covered in the IMO, which are: Combinatorics, Geometry and Number Theory. In addition, there is a special emphasis on how to approach unseen questions in Mathematics, and model the writing of proofs. Full answers are given to all questions.

Though *A First Step to Mathematical Olympiad Problems* is written from the perspective of a mathematician, it is written in a way that makes it easily comprehensible to adolescents. This book is also a must-read for coaches and instructors of mathematical competitions.

Contents

<i>Foreword</i>	vii
1. Jugs and Stamps: How To Solve Problems	1
1.1. Introduction	1
1.2. A Drinking Problem	2
1.3. About Solving Problems	3
1.4. Rethinking Drinking	5
1.5. Summing It Up	7
1.6. Licking a Stamp Problem	10
1.7. A Little Explanation	12
1.8. Tidying Up	12
1.9. Generalise	14
1.10. In Conclusion	16
1.11. Epilogue	18
1.12. Solutions	19
2. Combinatorics I	27
2.1. Introduction	27
2.2. What is Combinatorics?	27
2.3. The Pigeonhole Principle	29
2.4. Counting without Counting	36
2.5. A Sigma Aside	48
2.6. Solutions	49
3. Graph Theory	61
3.1. Introduction	61
3.2. Königsberg	61

3.3.	So What is a Graph?	65
3.4.	Ramsey	72
3.5.	Euler Tours (Revisited)	74
3.6.	Knight's Tours	75
3.7.	Hamilton	78
3.8.	Trees	80
3.9.	Planarity	81
3.10.	The Four Colour Theorem	85
3.11.	Some Additional Problems	91
3.12.	Solutions	93
4.	Number Theory 1	108
4.1.	What is It?	108
4.2.	Divisibility by Small Numbers	110
4.3.	Common Factors	116
4.4.	Fermat's Little Theorem	124
4.5.	A.P.'s	127
4.6.	Some More Problems	131
4.7.	Solutions	132
5.	Geometry 1	146
5.1.	Introduction	146
5.2.	Squares	146
5.3.	Rectangles and Parallelograms	151
5.4.	Triangles	153
5.5.	Circles	157
5.6.	Solutions	162
6.	Proof	180
6.1.	Introduction	180
6.2.	Why Proof?	180
6.3.	Proof by Contradiction	184
6.4.	Mathematical Induction	186
6.5.	Conclusion	194
6.6.	Solutions	195

7. Geometry 2	208
7.1. Cartesian Geometry	208
7.2. Lines	208
7.3. Modulus	214
7.4. Loci: One Fixed Point	218
7.5. The Cosine Rule	221
7.6. Loci: Two Points	223
7.7. Conics	229
7.8. Solutions	230
8. Some IMO Problems	249
8.1. Introduction	249
8.2. What is the IMO?	249
8.3. PHIL 1	250
8.4. MON 1	252
8.5. MON 6	253
8.6. UNK 2	254
8.7. Hints — PHIL 1	254
8.8. Hints — MON 1	256
8.9. Hints — MON 6	258
8.10. Hints — UNK 2	259
8.11. Solutions	261
