CHAPTER I EU EXTERNAL RELATIONS AND ITS RELATION TO GAS INFRASTRUCTURE

Manfred Hafner and Simone Tagliapietra, Fondazione Eni Enrico Mattei (FEEM)

1. Security of supply and security of demand: two sides of the same coin	15
2. European natural gas demand	16
2.1 SECURE scenarios	18
2.2 International Energy Agency scenarios	25
2.3 DG Climate: 2050 low carbon economy roadmap	27
2.4 DG Energy: Energy Roadmap 2050	28
2.5 "Fuel of choice" or "fuel of consequence"?	34
3. The role of external gas suppliers	34
3.1 The role of Norway	34
3.2 The role of Russia	40
3.3 The role of MENA countries	47
3.3.1 Algeria	48
3.3.2 Libya	49
3.3.3 Egypt	49

Table of contents

3.3.4	Qatar	50
3.3.5	Iran	50
3.3.6	Iraq	51
3.3.7	A region largely under-explored	52
3.3.8	A great solar energy potential	55
4.	The role of the Caspian Basin	59
5.	External dimension of the EU energy policy	66
6.	Conclusions and recommendations	68

CHAPTER II BRINGING GAS TO AND THROUGH EU MARKETS

Jacques de Jong, Clingendael International Energy Programme (CIEP)

1.	Global gas supplies to EU gas markets.....	73
1.1	Setting the supply scene.....	73
1.1.1	The US Market	73
1.1.2	The Asian market	74
1.1.3	The MENA region	75
1.1.4	Russia	76
1.2	The South Stream	77
1.2.1	The project.....	77
1.2.2	South Stream and the EU internal market.....	78
1.2.3	The Ukrainian issue.....	80
1.3	Supply routes from the North	81
1.4	Shale gas	80
1.5	Supply routes and EU market needs.....	83
1.5.1	Introduction	83
1.5.2	Changing market conditions?.....	84
1.5.3	Some reflections on the EU's external gas supply relations.....	86
1.5.4	The EU external/internal policy balance.....	87
1.6	A final reflection on global gas supplies	88
2.	The challenges for EU infrastructures	89

2.1	Gas infrastructures	89
2.2	The role of gas storage	92
2.3	Specific considerations.....	95
2.3.1	Financing new infrastructure.....	95
2.3.2	Market designs and capacity markets.....	96
2.3.3	Risks associated with energy policy and energy regulation	98
2.4	A final reflection on the challenges	100
3.	The regulatory challenge.....	101
3.1	Regulating gas	102
3.1.1	Infrastructures	102
3.1.2	Regulating the market?.....	104
3.2	The Gas Target Model	105
3.2.1	The GTM-process.....	106
3.2.2	The CIEP-model	107
3.2.3	Wholesale markets and their long-term and short-term characteristics	109
3.2.4	Merging and/or connecting zones or markets	112
3.2.5	Price alignment and liquidity	114
3.2.6	Cross-Border capacity, congestion, allocation and markets	115
3.2.7	Regional differences and regional markets	117
3.2.8	The external supplier perspective	118
3.2.9	The way forward for GTM?	119

CHAPTER III THE BUILDING OF ENERGY SOLIDARITY IN THE EU

Nicole Ahner and Jean-Michel Glachant, Loyola de Palacio Chair, European University Institute

1.	Introduction.....	123
2.	The concept of solidarity in the EU energy policy context.....	124
2.1	Solidarity – <i>ex ante</i> and on the spot	127
2.2	Actors and contributions	129

2.2.1	European Union	129
2.2.2	Member States	131
2.2.3	National Regulatory Authorities.....	132
2.2.4	Transmission System Operators	133
2.3	Infrastructure investment as basis for solidarity.....	135
3.	Experiences: two case studies	137
3.1	Solidarity during the 2009 January gas crisis – the case of Central and South-East Europe	138
3.2	The Belgian case	142
4.	Solidarity Tools.....	144
4.1	Solidarity in the law	145
4.2	Investment needs.....	146
4.3	The Infrastructure Package	147
4.3.1	Projects of Common Interest	148
4.3.2	System wide cost benefit analysis	150
4.4	Short <i>excursus</i> : the Baltic Energy Market Interconnection Plan.....	151
5.	Outlook and conclusion.....	152
