Preface	7
1 Introduction	9
2 Theoretical and methodology background	11
2.1 Behaviour theories and models	11
2.2 Research variables in physical activity monitoring	15
2.3 Physical activity domains	16
2.4 Definition of the '50+ population'	17
3 Physical activity guidelines for adults and seniors	19
3.1 Selected national and international physical activity guidelines for adults and seniors	20
3.1.1 Physical activity guidelines in the USA	20
3.1.2 Physical activity guidelines in Canada	24
3.1.3 Physical activity guidelines in Great Britain	26
3.1.4 Physical activity guidelines in Australia	27
3.1.5 Physical activity guidelines in Switzerland	28
3.1.6 Physical activity guidelines in Finland	30
3.1.7 Physical activity guidelines in Austria	30
3.1.8 Physical activity guidelines in Ireland	31
3.1.9 Physical activity guidelines in New Zealand	32
3.1.10 Physical activity guidelines issued by the World Health Organization	32
3.1.11 EU Physical activity guidelines	33
3.2 Walking related recommendations and the 10,000 step concept	34
3.2.1 Five times 30 minutes of walking a week	35
3.3 Physical activity guidelines and weight reduction	36
3.4 Physical activity guidelines and sedentary behaviour	38
3.5 Specifics of physical activity guidelines for seniors	40
3.6 Physical activity guidelines and implications for the Czech Republic	41
3.6.1 History of development of physical activity guidelines in a world context	41
3.6.2 Current physical activity guidelines	43
3.6.3 Physical activity guidelines in the context of promoting physical activity and public health	43
3.6.4 Development of physical activity guidelines	46
3.6.5 Implications for the Czech Republic	46

4	Physical activity of adults in the Czech Republic	51
4.1	Correlates of physical activity of adults in the Czech Republic	55
4.2	Physical activity of adults in the Czech Republic in an international context	60
5	Physical activity of the 50+ population	65
5.1	Research methods and techniques of monitoring physical activity of the 50+ population used by the Center for Kinanthropology Research, Faculty of Physical Culture, Palacký University, Olomouc.	65
5.1.1	Objective monitoring of physical activity	66
5.1.2	Subjective monitoring of physical activity	67
5.1.3	Subjective assessment of environmental conditions	67
5.1.4	Body composition diagnostics and anthropometric measurements	68
5.2	Physical activity of the 50+ population characterized by steps per day	69
5.2.1	Variability of physical activity on weekdays and weekend days and on various days of the week	71
5.2.2	Physical activity of the 50+ population characterized by energy expenditure	74
5.2.3	Sedentary behaviour of the 50+ population	78
5.3	Achievement of physical activity guidelines by the 50+ population	79
5.3.1	Achievement of moderate physical activity and walking guidelines	80
5.3.1.1	Achievement of guidelines by systematically randomly selected 50+ inhabitants of the Czech Republic	80
5.3.2	Achievement of guidelines by specific groups of the 50+ population	83
5.3.2.1	Achievement of guidelines by students of the University of the Third Age	83
5.3.2.2	Achievement of guidelines by employed and retired individuals	83
5.3.3	Achievement of the 10,000 steps/day guidelines	87
5.4	Physical activity and selected health indicators of the 50+ population	88
5.4.1	Association between physical activity and obesity	88
5.4.1.1	Variability of physical activity on various days of the week in persons with normal BMI, overweight and obesity	89

5.4.1.2	Prevalence of a “sedentary and highly active” lifestyle in persons with normal BMI, overweight and obesity	92
5.4.2	Association between achievement of various types of recommendations and selected health indicators	93
5.5	Physical activity, sociodemographic indicators and environmental conditions of the 50+ population	98
5.5.1	Sociodemographic indicators, environmental conditions, and achievement of physical activity guidelines in various physical activity domains	98
5.5.2	Sociodemographic indicators, environmental conditions, and achievement of physical activity guidelines by employed and retired individuals	104
5.5.3	Sociodemographic indicators, environmental conditions, and achievement of walking guidelines during active transport and recreation of participants of the University of the Third Age	111
5.5.4	Environmental conditions and achievement of walkin guidelines during active transport in systematically randomly selected men and women	118
6	Recommended activities in the area of physical activity promotion	125
7	Conclusions	135
	Summary	139
	Index of terms	143
	References	147
