

Contents

1 Preface	11
2 History and introduction	14
3 Hyperlipoproteinemia and dyslipidemia	23
3.1 Introduction	26
3.2 Etiopathogenesis and select types of HLP / DLP	26
3.3 Incidence of HLP and target values	30
3.4 Biochemical examination in HLP / DLP	31
3.5 Clinical Picture	33
3.6 Treatment	42
3.7 Prognosis in HLP / DLP	54
4 Familial hypercholesterolemia	57
4.1 Origin of FH and notes on the pathophysiology and biochemistry of the disease	57
4.2 Genetics of familial hypercholesterolemia	63
4.2.1 From past to present	64
4.2.2 FH diagnostics from a genetic perspective	67
4.3 Incidence of FH	71
4.3.1 FH Diagnostics	73
4.4 Clinical picture and significance of FH	78
4.5 Familial hypercholesterolemia past and present	85
4.5.1 Findings and experiences with our FH patients	85
4.5.2 FH in the 1960s	86
4.5.3 Present day results	89
4.5.4 How has FH changed over the last 50 years?	93
4.5.5 What is the typical presentation of patients with FH?	94
4.6 Overview of treatment options	95

4.6.1 Nonpharmacologic treatment	95
4.6.2 Pharmacologic treatment	100
4.7 LDL apheresis for the treatment of familial hyperlipoproteinemia	110
4.7.1 Introduction	111
4.7.2 Terminology	111
4.7.3 Historical Note	112
4.7.4 Terminology note	112
4.7.5 Principles of current LDL apheresis methods	113
4.7.6 Plasma filtration (double or cascade filtration)	115
4.7.7 Indications for LDL apheresis in FH	116
4.7.8 Impact of LDL apheresis on cardiovascular risk in FH	118
4.7.9 Advantages and limitations of LDL apheresis	119
4.7.10 Outlook for the future	123
4.7.11 Current situation in the Czech Republic	123
4.8 Surgical management of HLP and DLP	125
4.9 Truly experimental treatment	126
5 Current international guidelines for FH diagnosis and treatment	127
6 The MedPed project	130
6.1 History of the MedPed project throughout the world	130
6.2 MedPed project objective and tools	132
6.3 FH around the world and the MedPed position today	133
6.4 History of the MedPed project in the CZ	134
6.5 Current MedPed project in the CZ	136
6.6 Factors for MedPed project success in the CZ and outlook for the future	137
7 Diagnosis and treatment of FH in childhood and adolescence	140
7.1 Screening	141
7.2 Proper procedure for laboratory examination of lipids in children	142

7.3 Normal lipid values in children	142
7.4 FH diagnostics	143
7.5 Treating children and adolescents with FH	144
7.6 Monitoring children with FH in specialist centers	147
Abbreviations	149
Index	154
Referenced Studies	159
