

Contents

Foreword	iii
Committees	iv
Programme	1
Plenary presentations	5
Banaszek: The species that shift their ranges in response to the oceanic-continental climatic gradient in Europe: is the Common hamster one of them?	7
Monecke: Global dramatic decrease in the range and the reproductive rate of the European hamster (<i>Cricetus cricetus</i>) – a review and an outlook	8
Roldan: Comparative aspects of reproduction in hamsters	10
Siutz: Reproductive performance, juvenile development, and hibernation patterns in free-ranging Common hamsters	12
Oral presentations	15
Bendová: Nocturnality in a natural population of the Common hamster	17
Chaigne: Unexpected results of French Common hamster population monitoring in 2015	18
Feoktistova: Genetic structure of urban population of the Common hamster (<i>Cricetus cricetus</i>)	20
Gouveia: Estimating winter survival probability of subadult Common hamsters	21
Korbut: Are the mtDNA lineages in the Common hamster (<i>Cricetus cricetus</i>) differentiated in nuclear sequences?	22
Kourkgy: Habitat management : a tough nut to crack	23
La Haye: 12.5 years of hamster conservation, but still no solution	24
Petrová: Better reproduction in larger-sized females of the Common hamster leads to high population density	25
Reiners: Is there a conflict between conservationists and researchers? – A response to Monecke 2014	26
Surov: Physiological and behavioural adaptations of the Common hamster (<i>Cricetus cricetus</i>) to urban environment	27
Tkadlec: Applying matrix population models to life history of the Common hamster: from models to further field studies	28
Vohralík: Current distribution of the Common hamster in Bohemia (Czech Republic)	29

Weinhold: The CAP-Reform and its possible consequences for hamster conservation	30
Posters	31
Celebias: The use of odorous bait in trapping of the Common hamster <i>Cricetus cricetus</i> (L., 1758)	33
Marciszak: Rediscovery of the Common hamster <i>Cricetus cricetus</i> (L., 1758) in western Poland	34
Melosik: Phylogenetic evidence of a North lineage of the Common hamster <i>Cricetus cricetus</i> in Poland	36
Reiners: Ten years of genetic sampling of Common hamsters in Olomouc: insights from DNA	38
List of Participants	39
Author Index	42
