

CONTENTS

Author's Introduction	4
1 INTRODUCTION	5
2 DESCRIPTION OF FUNDAMENTAL METHODS	7
2.1 Deterministic Methods.....	7
2.2 Solving Knapsack Problem Using Commercial Systems	11
2.3 Heuristics	12
3 FLOW SHOP SCHEDULING AND ITS EXTENSION TO FUZZY PROCESSING TIMES	13
3.1 Mixed Integer Programming Model	14
3.1.1 Computation by MIP model in GAMS	15
3.2 Heuristic Approach	15
3.3 Flow Shop with Fuzzy Processing Times	17
4 SET-COVERING-BASED POSTPROCESSING FOR IMPROVING THE QUINE-McCLUSKEY METHOD	19
4.1 Quine-McCluskey Method	20
4.2 Set Covering Problem (SCP)	23
5 EUCLIDEAN STEINER TREE PROBLEM	24
5.1 Introduction	24
5.1.1 Basic Notions	25
5.1.2 Euclidean Steiner Minimum Tree Properties	26
5.2 Delaunay Triangulation-Based Heuristic	27
5.3 Computational Results	28
6 ROBOT MOTION PLANNING	31
6.1 Introduction	31
6.2 Cell Decomposition	31
6.3 Sampling Methods	32
6.4 Roadmap Methods	33
6.5 Generalised Voronoi Diagrams	35
7 CONCLUSIONS	36
References	37
Czech Abstract (Shrnutí)	40
