CURRICULUM VITAE

1. INTRODUCTION	5
2. FLOW STRESS ANOMALY IN Ni_3Al COMPOUNDS	5
2.1 Superdislocations core geometries	6
2.2 The weak beam technique	7
2.3 Planar faults energy and mechanical properties	11
2.4 Velocity or density type anomaly?	11
3 FATIGUE OF STAINLESS STEELS	13
3.1. Cyclic strain localisation and fatigue life of stainless steels	13
3.2 Dislocation structures - austenitic phase	14
3.3 Dislocation structures - ferritic phase	15
3.4 Statistical analysis of hysteresis loop	16
3.5 Cyclic deformation of duplex steel – summary	17
4. MECHANICAL TESTING OF THIN FILMS	18
4.1 Thin films testing	18
4.2 Bulge test	19
4.3 The test apparatus.....	20
4.4 The specimen's preparation - example of TiN	20
4.5 Brittle and ductile films testing	21
SUMMARY	23
REFERENCES	24
SHRNUTÍ	25
