LIST OF ABBREVIATIONS	5
INTRODUCTION	9
I. THEORETICAL PART	11
1. BLOOD TRANSFUSION AND ITS HISTORY	11
2. TRANSFUSION PRODUCTS.....	15
3. RED BLOOD CELL – ERYTHROCYTE	23
3.1. Erythrocyte membrane.....	24
3.2. Changes in erythrocytes during their storage.....	26
4. ERYTHROCYTE STABILIZATION AND PRESERVATION	33
5. CRYOPRESERVATION.....	37
5.1. Cryoprotectants.....	37
5.2. Methods of cryopreservation of erythrocytes	39
II. PRACTICAL PART - RESEARCH.....	45
6. OWN RESEARCH	45
6.1. Problem definition and aim of research.....	46
6.2. Patients and methods.....	46
6.3. Methods of processing and evaluation of information.....	49
7. RESULTS.....	51
7.1. Basic parameters of collection and donors	51
7.2. Laboratory markers of metabolism of erythrocytes – hematological parameters	60
7.3. Laboratory markers of erythrocyte metabolism – biochemical parameters	72
8. DISCUSSION.....	83
8.1. Quality of the transfusion medication with content of erythrocytes prepared by cryopreservation.....	83
8.2. Quality of the prepared medication depending on time of storage.....	84
8.3. Reaching a deleucotized transfusion product.....	88

8.4. Effect of leucodepletion on apoptosis and metabolism of erythrocytes of the transfusion medication.....	89
9. OUTCOMES AND RECOMMENDATIONS FOR PRACTICE.....	91
CONCLUSION.....	93
BIBLIOGRAPHICAL REFERENCES.....	95
ANNEX A.....	104
ANNEX B.....	107
