

INTRODUCTION**9****HUMAN IMPACTS ON BIOLOGICAL PROCESSES IN WATERS****13***Jan Helešic, Zdeněk Adámek, Martin Rulík***CHANGES IN HYDROLOGICAL REGIME OF STREAMS,****WATER CONSTRUCTIONS AND DISCHARGE MANIPULATION 16**

CHANGES IN HYDROLOGICAL REGIME OF STREAMS 16

*Large-scale impacts – hydro-technical interventions in the landscape 16**Local impacts – water supply abstractions and derivative power stations 17*

IMPACT OF WATER STRUCTURES 19

Cross regulations on streams – weirs and dams 19

LONGITUDINAL REGULATIONS OF STREAMS – REINFORCEMENT OF BANKS,

CHANGES IN A STREAM BED GEOMETRY 29

THEORIES GENERALIZING THE IMPACT OF REGULATORY INTERVENTIONS IN STREAMS 35

MONTANIZATION (RHITHRALIZATION) OF LOWER RIVER SECTIONS 35

RIVER DISCONTINUITY AND ECOSYSTEM FRAGMENTATION 37

IMPACT OF DAMS ON STREAM FISH ASSEMBLAGES 42

*Migration barrier and fragmentation 42**Disappearance of a river section in a lake 43**Formation of a lake – valley reservoir 43***POLLUTION OF CONTINENTAL WATERS****46***Martin Rulík, Jan Helešic, Blahoslav Maršálek***ACIDIFICATION OF SURFACE WATERS 47**

BIOINDICATION OF ACIDIFICATION 56

EUTROPHICATION – TYPOLOGY OF WATERS ACCORDING TO THE TROPHY 57

UP-TO-DATE TERMINOLOGY – EUTROPHICATION, SURFACE WATER NUTRIENT POLLUTION 58

EUTROPHICATION AND PRIMARY PRODUCTION 59

WARMING OF AQUATIC ECOSYSTEMS (GLOBAL AND LOCAL IMPACT) 61

USE OF HEATED WATERS 67

POLLUTION BY RADIONUCLIDES, HEAVY METALS AND PERSISTENT ORGANIC POLLUTANTS 68

RADIONUCLIDES IN THE AQUATIC ENVIRONMENT (GLOBAL AND POINT SOURCES) 68

*Radioactive pollution of waters 70**Impact of radioactive wastewaters on aquatic organisms 74***HEAVY METALS IN THE AQUATIC ENVIRONMENT 77**

OXIDATION CAUSED BY PHYSICAL, BIOLOGICAL AND HUMAN ACTIVITIES 81

HEAVY METALS AND MICROORGANISMS 82

METALLIC BONDING 82

BIOTRANSFORMATION 82

METAL DEPOSITION 83

METAL BIOMETHYLATION 83

POLLUTION BY PETROLEUM SUBSTANCES AND HYDROCARBONS 84

PETROLEUM SUBSTANCES 84

*Behaviour of spilled crude oil 86**Impact of petroleum substances on organisms 87*

IMPACT OF PETROLEUM HYDROCARBONS ON MICROORGANISMS 88

DEGRADATION OF HYDROCARBONS AND PETROLEUM SUBSTANCES 89

PERSISTENT ORGANIC POLLUTANTS (PBTs)	90
PBTs SUBSTANCES IN SEDIMENTS	90
PESTICIDES	91
DYNAMICS OF PESTICIDES IN HYDROSPHERE	92
TOXICITY AND BIODEGRADABILITY OF PESTICIDES	92
INSECTICIDES	93
<i>Broad-spectrum insecticides</i>	93
<i>Chlorinated terpene hydrocarbons</i>	95
<i>Organophosphorus insecticides (organophosphates)</i>	95
<i>Narrow-spectrum insecticides (so-called third generation insecticides)</i>	95
HERBICIDES	96
<i>Impact of herbicides on aquatic ecosystems</i>	96
POLYCHLORINATED BIPHENYLS (PCBs)	98
POLYCHLORINATED DIBENZO-PARA-DIOXINS (PCDDs) AND DIBENZOFURANS (PCDFs) – DIOXINS	100
FORMATION OF DIOXINS	100
DIOXIN AND DIBENZOFURAN PROPERTIES	101
POLYCYCLIC AROMATIC HYDROCARBONS – PAHs	101
SURFACE ACTIVE SUBSTANCES	102
SURFACTANTS AND DETERGENTS	103
<i>Ionic surfactants</i>	104
<i>Anionic surfactants</i>	104
<i>Cationic surfactants</i>	105
<i>Amphoteric surfactants</i>	105
<i>Nonionic surfactants</i>	105
<i>Development of the world's production and consumption of surfactants</i>	106
<i>Impacts on the hydrosphere</i>	106
ENDOCRINE-DISRUPTING CHEMICALS – EDC	108
POLLUTION OF NATURAL WATERS BY SUSPENDED SOLIDS	111
SUSPENDED SOLIDS	111
<i>Phytoplankton, biofilm, macrophytes</i>	111
<i>Aquatic invertebrates</i>	111
<i>Fish</i>	113
<i>Sediment and fish</i>	114
MINE WATERS	114
COMPOSITION OF MINE WATERS	114
IMPACT OF MINE WATERS ON AQUATIC ORGANISMS	117
LOCAL – POINT SOURCE POLLUTION OF WATERS	119
INDUSTRIAL WASTEWATERS	120
AGRICULTURAL WASTEWATERS	121
URBAN (MUNICIPAL) WASTEWATERS	121

BIOLOGY OF NATURAL WATERS POLLUTION**125***Martin Rulík, Jan Helešic*

ORGANIC POLLUTION – BIOCHEMICALLY DEGRADABLE SUBSTANCES	127
DECOMPOSITION OF ORGANIC SUBSTANCES IN WATER AND ACTIVITY OF MICROORGANISMS	127
IMPACT OF ORGANIC POLLUTION ON THE AQUATIC ENVIRONMENT AND ORGANISMS	129
<i>Impact of organic substances on aquatic organisms</i>	131
TOXIC AND PERSISTENT SUBSTANCES	139
EFFECT OF TOXIC SUBSTANCES	139
<i>Toxic properties of pollutants</i>	140
<i>Sublethal effects</i>	141
<i>Stress</i>	142
<i>Tolerance</i>	144
<i>Behaviour of persistent organic pollutants in waters illustrated on the PCB example</i>	144
BIOACCUMULATION AND BIOMAGNIFICATION	144
<i>Bioaccumulation</i>	144
<i>Biomagnification</i>	148

RESTORATION AND REVITALIZATION OF DEGRADED AQUATIC ECOSYSTEMS**151***Jan Helešic*

DETERMINATION OF ECOLOGICALLY ACCEPTABLE MINIMUM DISCHARGES AND ALTERATIONS TO HYDROLOGICAL REGIME	155
RESTORATION AND REVITALISATION	158

WASTEWATER TREATMENT**169***Martin Rulík*

WASTEWATERS	171
SEWAGE (MUNICIPAL) WASTEWATERS	171
<i>Conception of municipal wastewater treatment</i>	174
METHODS OF WASTEWATER TREATMENT	174
<i>Biological wastewater treatment</i>	175
<i>Stabilization reservoirs and ponds</i>	176
<i>Accumulation reservoirs</i>	178
<i>Biological maturation reservoirs (ponds)</i>	179
<i>Wetland wastewater treatment</i>	179
ARTIFICIAL METHODS OF MUNICIPAL WASTEWATER TREATMENT	185
TREATMENT OF SEWAGE (MUNICIPAL) WATERS IN URBAN WWTP	185
TECHNOLOGICAL PRINCIPLES OF URBAN WWTP	186
<i>First treatment stage – mechanical pre-treatment</i>	186
<i>Second treatment stage – biological treatment</i>	187
<i>Biological removal of inorganic nitrogen from wastewaters</i>	200
<i>Sludge stabilization</i>	202
<i>Sludge gas (biogas)</i>	202
A BRIEF OVERVIEW OF THE MOST COMMON PROCESSES USED IN INDUSTRIAL WASTEWATER TREATMENT	203
FLOTATION	203
NEUTRALISATION TREATMENT PLANTS	203
CHEMICAL COAGULATION OR CLARIFICATION	204
SORPTION PROCESSES	204
EXTRACTION	204
ION EXCHANGERS	204

FILTRATION	205
PARTITION METHODS BASED ON A SEMI-PERMEABLE MEMBRANE PRINCIPLE	205
<i>Ultrafiltration</i>	205
<i>Nanofiltration</i>	205
<i>Reverse osmosis</i>	205
<i>Dialysis</i>	205
STRIPPING	206
PRECIPITATION REACTIONS	206
SEDIMENTATION	207
CLARIFICATION	207

INDICATION OF POLLUTION (QUALITY) AND ECOLOGICAL STATUS OF CONTINENTAL WATERS

Jan Helešic, Zdeněk Adámek, Martin Rulík

7 209

BIONDICATION AND BIOMONITORING PRINCIPLES	212
IRON AND MANGANESE INDICATION	214
INDICATION OF ACIDIC WATERS	216
INDICATION OF CALCIUM	216
INDICATION OF ANAEROBIC STATUS – HYDROGEN SULPHIDE	216
INDICATION OF HEAVILY MINERALIZED – MINERAL WATERS	217
INDICATION OF SALINE WATERS	218
INDICATION ACCORDING TO THE STATUS OF A COMMUNITY (BIOCENOSIS) OF AQUATIC ORGANISMS	218
OVERVIEW OF BIOINDICATION METHODS USED IN WATERS	
AND ASSESSMENT OF WATER QUALITY AND ECOLOGICAL STATUS	219
BIOINDICATION OF WATER QUALITY BY MEANS OF MACROZOOBENTHOS	220
TRADITIONAL ASSESSMENT METHODS OF A MACROZOOBENTHOS COMMUNITY	221
<i>Diversity indices</i>	221
<i>Biotic and score indices</i>	223
<i>Average biotic indices</i>	223
<i>BMWP Score (Biological Monitoring Working Party Score) and ASPT Index (Average Score Per Taxon Index)</i>	233
<i>Tabular biotic indices</i>	237
<i>Similarity indices</i>	238
<i>Alternative approaches</i>	240
<i>Ratio indices</i>	240
<i>Modern approaches</i>	241
BIOINDICATION OF WATER QUALITY BY MEANS OF MICROPHYTOBENTHOS	241
POSSIBILITIES OF INDICATION AND ASSESSMENT OF TROPHY	244
<i>Assessment according to an increased nutrient supply</i>	244
<i>Assessment according to in vitro growth response</i>	244
<i>Assessment according to in situ biomass concentration</i>	245
<i>Trophy and species diversity</i>	245
INDICATION BY MEANS FISH OF COMMUNITY	246
<i>Biotic integrity of fish community</i>	247
MONITORING OF ECOLOGICAL STATUS OF WATER BODIES AND WATER QUALITY IN THE CZECH REPUBLIC	248
<i>Assessment of water status</i>	248

LIMNOLOGICAL BASICS OF MODERN PROJECTS OF RESERVOIRS REHABILITATION**251**

Blahoslav Maršálek

TERMINOLOGY – RESTORATION, REHABILITATION, RECLAMATION	253
OBJECTIVES OF PROJECTS OF RESERVOIRS REHABILITATION	254
WATER QUALITY MANAGEMENT IN A CATCHMENT AREA ABOVE A RESERVOIR	254
MEASURES ADOPTED IN A CATCHMENT AREA ABOVE A RESERVOIR	256
<i>Natural and constructed wetlands for increasing phosphorus retention and final treatment of surface waters</i>	<i>261</i>
<i>Municipal wastewater treatment plants, rainwater treatment in urban areas</i>	<i>263</i>
<i>Other nutrient sources in a catchment area above a reservoir</i>	<i>265</i>
<i>Bioaugmentation – utilization of microbial cultures for retention and transformation</i>	
<i>of phosphorus forms in a catchment area</i>	<i>266</i>
<i>Pre-reservoirs</i>	<i>266</i>
<i>Rehabilitation of riverine vegetation</i>	<i>267</i>
MEASURES ADOPTED IN A RESERVOIR	269
<i>Limnological theories and their applications to system measures in reservoir rehabilitation projects</i>	<i>269</i>
ECOTECHNICAL INTERVENTIONS LEADING TO REDUCTION IN DEVELOPMENT	
OF PLANKTONIC CYANOBACTERIA IN SURFACE WATERS	272
CYANOBACTERIA AND THEIR IMPACT ON AQUATIC ECOSYSTEMS	272
METHODS DECREASING TROPHY AND REDUCING DEVELOPMENT OF CYANOBACTERIA IN RESERVOIRS	274
<i>Measures in water column</i>	<i>274</i>
<i>Decrease in phosphorus concentrations in pelagial</i>	<i>274</i>
<i>Decrease in concentration of phytoplankton and phosphorus through the application of aluminium salts (Al³⁺)</i>	<i>275</i>
<i>Decrease in concentration of phytoplankton and phosphorus through the application of iron salts</i>	<i>276</i>
<i>Decrease in concentration of phosphorus through the application of lime and its compounds [Ca(OH)₂, CaCO₃]</i>	<i>277</i>
<i>Decrease in concentration of phytoplankton and phosphorus through the application of clay materials</i>	<i>278</i>
<i>Hypolimnion discharge</i>	<i>278</i>
<i>Discharge of epilimnion water</i>	<i>279</i>
<i>Destratification of reservoirs</i>	<i>279</i>
<i>Cyanocide, algicide and cyanostatic substances</i>	<i>280</i>
POSSIBILITIES TO REDUCE DEVELOPMENT OF CYANOBACTERIAL WATER BLOOMS THROUGH THE APPLICATION	
OF MICROORGANISMS, PLANTS AND REGULATION OF BIOTIC RELATIONSHIPS IN RESERVOIRS	289
<i>A possibility to use viruses to regulate development of cyanobacterial water blooms</i>	<i>289</i>
<i>Possibilities of use of bacteria to regulate development of cyanobacteria forming water blooms</i>	<i>290</i>
<i>Possibility to use algae to regulate development of cyanobacterial water blooms</i>	<i>291</i>
<i>Possibility to use fungi and fungal organisms to regulate development of cyanobacterial water blooms</i>	<i>291</i>
<i>Protozoa as predators of cyanobacteria</i>	<i>292</i>
<i>Biomaniplulation in fish – zooplankton – cyanobacteria relationships</i>	<i>292</i>
<i>Other methods reducing development of cyanobacterial water blooms in water column</i>	<i>292</i>
METHODS OF SEDIMENT TREATMENT WITH THE AIM TO DECREASE TROPHY	
AND CYANOBACTERIAL DEVELOPMENT	294
<i>Processes in sediments and sedimentation in reservoirs</i>	<i>294</i>
<i>Oxidation of sediments by means of nitrates – RIPLOX</i>	<i>295</i>
<i>Covering of sediments by inert materials</i>	<i>296</i>
<i>Removal of sediments from reservoirs</i>	<i>298</i>
AERATION OF WATER COLUMN, HYPOLIMNION OR WATER – SEDIMENT INTERFACE	299
<i>Hypolimnion aerators</i>	<i>301</i>
<i>Use of bacterial communities to mineralize sediments</i>	<i>302</i>
<i>Use of bioaugmentation to aquatic ecosystems</i>	<i>304</i>
CONCLUSIONS	304

HYDROBIOLOGICAL FOUNDATIONS OF FISHPOND MANAGEMENT	309
HISTORICAL DEVELOPMENT	309
FOOD CHAIN IN PONDS AS INFLUENCED BY FISHPOND MANAGEMENT	311
Fertilization	324
Liming	325
Supplementary feeding	325
Wintering and summering	325
Other interventions – mud removal, littoral clearing and plant cutting	327
Pond polycultures	328
OBTAINING FOOD ORGANISMS FOR FISH	333
CAPTURE	333
CONTROLLED PRODUCTION OF FOOD ORGANISMS	334
Phytoplankton cultivation	334
Zooplankton culture	335
Succession of zooplankton in fingerling ponds	337
Nutritional value of food organisms	338
FISH FOOD	340
FOOD ORIENTATION OF FISH	340
AVAILABILITY OF HYDROBIONTS AS NATURAL FOOD OF FISH	341
BASIC METHODS OF FISH FOOD STUDIES	342
BIOMANIPULATION AND BIOMELIORATION	344
IMPACT OF FISH FARMING ON WATER ENVIRONMENT	348
