

Summary

1	TREATMENT OF DRINKING AND SERVICE WATER - INTRODUCTION	6
1.1	Water sources	6
1.2	Natural waters	8
1.3	Water treatment	10
1.4	Classification of water treatment processes	12
1.5	Factors affecting water quality	17
1.6	Principles of basic water treatment processes	18
2	MECHANICAL, CHEMICAL AND BIOLOGICAL TREATMENT PROCESSES	24
2.1	Mechanical methods.....	24
2.1.1	Sand traps	25
2.1.2	Screens	24
2.2	Biological methods of water treatment.....	28
2.3	Chemical methods of water treatment.....	30
2.3.1	Destabilization of colloid salts	33
2.3.2	Destabilization, coagulation and flocculation reagents	39
2.3.3	Preparing solutions used in coagulation	42
2.3.4	Dosage of chemicals used in coagulation	43
2.3.5	pH of water treatment	43
3	SETTLING – SEDIMENTATION	54
3.1	Establishment flakes	58
3.2	Sizing horizontal settling tanks	63
3.3	Horizontal sedimentation tank with radial flow	70
3.4	Lamellar settling sedimentation tanks	71
4	FLOTATION	77
5	SEPARATION THROUGH SLUDGE BLANKET	86
6	FILTRATION	91
6.1	Slow (biological) filtration	95
6.2	Rapid filtration	97
6.3	Direct filtration.....	98
6.4	Additional filtration.....	99
6.5	Rapid filter categories	99
6.6	Filter bed	101
6.7	Drainage system	102
7	DRINKING WATER SAFETY – DISINFECTION	116
7.1	Thermal heat disinfection	117
7.2	Disinfection using ultraviolet radiation.....	118
7.3	Chemical methods of disinfection.....	118
7.4	Water chlorination system.....	124
7.5	Chlorine dioxide disinfection.....	125
7.6	Hypochlorite disinfection.....	126

7.7	Ozonization	126
7.8	Oligodynamic methods of disinfection	130
7.9	Factors affecting the formation of disinfection by-products	130
8	SPECIAL METHODS OF WATER TREATMENT	132
8.1	Carbon dioxide removal	132
8.2	Chemical removal of CO ₂	135
8.3	Iron and manganese removal from water	136
8.4	Methods of water aeration by air oxygen	141
8.5	Water softening	147
8.6	Hardening – water remineralization	152
8.7	Protection of pipes	153
8.8	Water fluoridation	153
8.9	Water denitrification	154
9	ADVANCED OF WATER TREATMENT	154
9.1	Membrane processes	155
9.2	Adsorption	168
9.3	Air stripping	172
9.4	Dialysis membranes	178
10	WATER ODOUR AND TASTE REMOVAL	180
10.1	Eliminate odors and flavors of water adsorption	181
10.2	Filtration through granular activated carbon	181
11	IN-SITU TREATMENT OF GROUNDWATER	182
12	SLUDGE MANAGEMENT AT WATER TREATMENT PLANTS	185
12.1	Introduction	186
12.2	Calculation of sludge dry residue	187
12.3	Calculation of sludge water volume	188
12.4	Methods of water treatment sludge disposal	189
12.5	Vertical settlers	194
12.6	Sludge drying beds and lagoons	194
