

Contents

1	Artificial Intelligence in Modelling	7
1.1	Introduction	7
1.2	Artificial Model	8
1.3	Buildings Modeling	9
1.3.1	Building Models	9
1.3.2	3D Geological Models	9
1.3.3	Digital Terrain Models	9
1.4	Artificial Intelligence and Modeling	10
1.5	Problems Associated with the Use of AI in Modeling	11
2	Using Social Media Big Data for Optimization	13
2.1	Introduction	13
2.2	Obtaining the Data	13
2.3	Data Description	15
2.3.1	Foursquare	15
2.3.2	Instagram	16
2.3.3	Twitter	17
2.3.4	Facebook	18
2.4	Unification	19
2.5	Models	20
2.6	Conclusion	21

3	Association Rules for Missing Value Imputation	23
3.1	Introduction	23
3.2	The Missing Values Problem	24
3.3	Strategies for Dealing with Missing Data	25
3.4	Association Rules	25
3.5	Association Rules for Missing Values Imputation . .	26
3.6	Storing Association Rules for Missing Values Imputation	27
3.7	Example of Storing Association Rules	29
3.8	Summary	32
3.9	Acknowledgement	32
4	Autonomous Discrete Systems	33
4.1	Review of Discrete Simulation Concepts	33
4.2	Concepts of Theory of Discrete Elements	34
4.2.1	Autonomous Discrete Elements	35
4.2.2	Non Autonomous Discrete System	36
4.3	Language Concept	38
4.3.1	Language Description	38
5	Long Term Memory Model	45
5.1	Introduction	45
5.2	Motivation for Memory Modelling	47
5.3	Long Term Memory Model	47
5.3.1	Model Description	48
5.3.2	Recalling	49
5.3.3	Learning	50
5.3.4	Forgetting	51
5.3.5	Temporary Forgetting	52
5.4	Conclusion	52
