

Contents

1	The motion of viscous fluids around a purely rotating body	3
1.1	L^q setting	4
1.1.1	Strong solution	5
1.1.2	Weak solution	7
1.2	L^2 setting	7
2	Asymptotic behavior of the motion of viscous fluid around a translating and rotating body	8
2.1	Notations, definitions and auxiliary results.	9
2.2	Main theorems	10
3	Asymptotic behavior of the viscous fluids in the presence of Coriolis forces	13
3.1	Stokes problem in the whole space \mathbb{R}^3	13
3.2	Stokes problem in an exterior domain	13
3.3	Oseen problem in the whole space \mathbb{R}^3	14
3.4	Oseen problem in an exterior domain	14
4	Compressible motion	15
4.1	Free boundary problem for the equation of one-dimensional motion of compressible gas with density-dependent viscosity isentropic case	15
4.2	Free boundary problem for the equation of spherically symmetric motion of viscous gas	17
4.3	Global existence of solutions for the one-dimensional motions of a compressible viscous gas with radiation: an “infrarelativistic model”	19
5	Laplace equation and Stokes problem in the half space	25
5.1	Notations	25
5.2	Laplace equation	27
5.3	Stokes system	28
5.3.1	Generalized solutions to the Stokes system in \mathbb{R}_+^N	28

5.3.2	Strong solutions and regularity for the Stokes system in \mathbb{R}_+^N . . .	28
5.3.3	Very weak solutions for the Stokes system	30
5.4	Stokes problem with Navier condition	30
5.4.1	Weak solutions	31
5.4.2	Strong solutions	32
5.4.3	Very weak solutions	32
6	List of publications of disertatation	33
7	Resume	34
