

CONTENTS

PREFACE	7
1 GENERAL CHARACTERISTICS OF LIVING SYSTEMS	8
Classification of Biological Sciences	8
Methodology of Scientific Work in Biology	8
History of Biology	9
Prominent Personalities in Biology	10
Biological Species	10
Systematics and Taxonomy	10
Examples of Classification Hierarchies	11
Hierarchical Structure of Living Systems	11
Building Hierarchy in Multicellular Organisms (with examples):	11
General Properties of Organisms and Differences Between Living and Inanimate Nature	11
Characteristics of Life:	11
Dependence of Organisms on the Environment	12
Abiotic Environmental Factors	12
Biotic Factors	12
General Principles of Reproduction in Living Systems	12
Individual Development of Multicellular Organisms	13
2 SURVEY OF THE SYSTEMS OF LIVING ORGANISMS	14
Classification System of Living Organisms	14
A Brief Survey of the Classification System (with examples)	14
Acellular Organisms	15
Unicellular Organisms	15
Bacteria	16
Cyanobacteria	17
Multicellular Organisms	17
Plants	17
Simple Plants	17
Higher Plants	18
Fungi	18
Animals	19
Protozoa	19
Classification of Protozoa	19
Flatworms (Platyhelminthes) and Roundworms (Nemathelminthes or Nematodes)	20
Arthropoda	20
Chordata	21
Vertebrata	21
Mammalia	21
3 BIOLOGY OF THE CELL	22
Cell Theory	22
Chemical Composition of the Cell	22
Organic Cell Compounds	23

Proteins.....	23
Nucleic Acids.....	23
Saccharides.....	24
Lipids	24
Prokaryotic and Eukaryotic Cells	25
A Survey of Differences between Prokaryotic and Eukaryotic Cells.....	25
Biomembranes and Membrane Organelles	26
Cytoskeletal System	27
Transport into and out of the Cell.....	27
Diffusion and Osmosis.....	27
Carrier-mediated Transport	28
Endocytosis and Exocytosis.....	28
Energy Transformation	28
Autotrophy and Heterotrophy.....	29
Liberation of Energy.....	29
DNA and RNA Replication and Protein Synthesis	30
Nucleus.....	31
Cell Cycle and Its Phases	31
Regulation of the Cell Cycle	31
Mitosis	32
Cell Differentiation	32
4 LIFE FUNCTIONS OF HIGHER PLANTS AND ANIMALS.....	33
Plants and Water.....	33
Nutrition	33
Photopsynthesis	34
Respiration	34
Reproduction	35
Movements.....	35
5 LIFE FUNCTIONS IN HIGHER ANIMALS.....	36
Homeostasis	36
Body Temperature	36
Respiratory Systems.....	37
Cardiovascular Systems.....	37
Body Fluids	38
Nutrition and Digestion	38
Excretory System	38
Nervous Systems.....	39
Sensory Functions	40
Hormonal Regulation	40
Locomotion	40
Sexual Reproduction	41
Ontogenic Development	41
6 GENETICS	42
Heredity and Variability	42
Character and Phenotype	42

Gene and Genotype	43
Gene and its Expression	43
Prokaryotic and Eukaryotic Chromosomes and Plasmids	44
Extranuclear Inheritance in Eukaryotic Cells	45
Meiosis	46
Segregation and Recombination of Chromosomes in Diploid Organisms	46
Breeding and Hybridisation	46
Mendel's Laws	47
Heritable and Non-heritable Variability	47
Mutations	48
Genetics of Populations	49
Medical Relevance of Genetics	50
7 EVOLUTION	50
The Origins of Cellular Life	50
Early Evolutionary Stages	51
Possibilities of Life in the Universe	51
Geological Development and Evolution of Independent Life	51
Paleontological Evidence of the Earliest Forms of Life	51
Darwin's Theory of Evolution	52
Evolution of Plants and Fungi	54
Evolution of animals	54
The Evolution of Man	57
8 BIOLOGY OF MAN	58
Tissues of the Human Body	58
Musculoskeletal System	59
Respiratory System and its Function	59
Blood	60
Defense Mechanisms of the Organism	61
Blood Groups and Blood Transfusion	61
Circulatory System and its Function	62
Lymph and its Circulation	63
Gastrointestinal System and its Function	63
Nutrition: Transformation of Substances and Energy	64
Body Temperature and its Maintenance	64
Excretory System	64
Skin and its Functions	65
Endocrine Glands	65
Nervous System	67
Sense Organs	68
Reception of Pain	69
Thermoreceptors	69
Mechanoreceptors	69
Chemoreceptors	69
Photoreceptors	70
Reproductive Systems in Males and Females	70
Ontogenesis and Intrauterine Development	70

Function of Placenta	71
Procedures in Human Genetics	71
Human Diet	72
Work and Rest in Human Life	73
Drug Addiction	73
9 ECOLOGY	73
Fundamental Concepts of Ecology	73
Feeding Relationships	74
Abiotic and Biotic Factors	74
Biosphere	74
Life and the Biosphere	74
Solar Radiation	74
Atmosphere	76
Hydrosphere	76
Lithosphere and Pedosphere	77
Populations	77
Population Explosion	78
Communities (associations)	78
Interactions amongst Populations	78
Changes to Ecosystems	79
Human Population and the Environment	79
TEST BANK FOR GENERAL BIOLOGY	81
General Characteristics of Living Systems Important Discoveries in Biology	81
Cell Biology	82
Physiology of Higher Plants and Animals	84
Genetics	85
Human Biology	88
Evolutionary Biology	90
Environmental Science	91
Test Bank Answers	91
