

# Content

1. Introduction.....	4
2. Theory of permeates transport through nonporous membranes.....	5
3. Ionic liquids in pervaporation processes.....	6
3.1. Influence of ionic liquid content on separation properties.....	6
3.2. Swelling of ionic liquid polymer blend membranes.....	13
3.3. Surface modified ionic liquid polymer blend membranes.....	17
4. Pervaporation in hybrid processes.....	20
4.1. Chemical engineering application-Enhanced esterification conversion.....	20
4.2. Increased productivity of fermentation by pervaporation .....	22
5. Gas and vapor permeation.....	23
5.1. Ionic liquid polymeric gel membranes.....	23
5.2. Mixed matrix membranes.....	27
5.3. Water condensing and water-swollen membrane.....	31
6. Patents used in this thesis.....	37
7. Original papers used in the thesis.....	37
8. References.....	38
