

Contents

<i>Preface</i>	p
<i>Contributors</i>	ix
1 Essential Methods of Plant Sample Preparation for Light Microscopy.....	1
<i>Aleš Soukup and Edita Tylová</i>	
2 Selected Simple Methods of Plant Cell Wall Histochemistry and Staining for Light Microscopy.....	25
<i>Aleš Soukup</i>	
3 Resin Embedding, Sectioning, and Immunocytochemical Analyses of Plant Cell Walls in Hard Tissues.....	41
<i>Kieran J.D. Lee and J. Paul Knox</i>	
4 Automated Microscopy in Forward Genetic Screening of Arabidopsis.....	53
<i>Tereza Dobisová and Jan Hejátko</i>	
5 Image Analysis: Basic Procedures for Description of Plant Structures.....	67
<i>Jana Albrechtová, Zuzana Kubínová, Aleš Soukup, and Jiří Janáček</i>	
6 Identifying Subcellular Protein Localization with Fluorescent Protein Fusions After Transient Expression in Onion Epidermal Cells.....	77
<i>Andreas Nebenführ</i>	
7 Visualizing and Quantifying the In Vivo Structure and Dynamics of the Arabidopsis Cortical Cytoskeleton Using CLSM and VAEM.....	87
<i>Amparo Rosero, Viktor Žárský, and Fatima Cvrčková</i>	
8 Sequential Replicas for In Vivo Imaging of Growing Organ Surfaces.....	99
<i>Dorota Kwiatkowska and Agata Burian</i>	
9 Time-Lapse Imaging of Developing Meristems Using Confocal Laser Scanning Microscope.....	111
<i>Olivier Hamant, Pradeep Das, and Agata Burian</i>	
10 Quantifying Cell Shape and Gene Expression in the Shoot Apical Meristem Using MorphoGraphX.....	121
<i>Pierre Barbier de Reuille, Sarah Robinson, and Richard S. Smith</i>	
11 Mechanical Measurements on Living Plant Cells by Micro-indentation with Cellular Force Microscopy.....	135
<i>Anne-Lise Routier-Kierzkowska and Richard S. Smith</i>	
12 High-Pressure Freezing and Low-Temperature Processing of Plant Tissue Samples for Electron Microscopy.....	147
<i>Ichirou Karahara and Byung-Ho Kang</i>	

13	Reconstructing Plant Cells in 3D by Serial Section Electron Tomography.....	159
	<i>Kiminori Toyooka and Byung-Ho Kang</i>	
14	Imaging Plant Nuclei and Membrane-Associated Cytoskeleton by Field Emission Scanning Electron Microscopy.	171
	<i>Jindřiška Fišerová and Martin W. Goldberg</i>	
15	Immunogold Labeling of Resin-Embedded Electron Microscopical Sections.	183
	<i>Ilse Foissner and Margit Hoesftberger</i>	
16	Live Cell Imaging of Arabidopsis Root Hairs.	195
	<i>Tijs Ketelaar</i>	
17	Morphological Analysis of Cell Growth Mutants in <i>Physcomitrella</i>	201
	<i>Jeffrey P. Bibeau and Luis Vidali</i>	
18	Plant Cell Lines in Cell Morphogenesis Research.	215
	<i>Daniela Seifertová, Petr Klíma, Markéta Pařezová, Jan Petrášek, Eva Zašimalová, and Zdeněk Opatrný</i>	
19	Antisense Oligodeoxynucleotide-Mediated Gene Knockdown in Pollen Tubes.	231
	<i>Radek Bezvoda, Roman Pleskot, Viktor Žárský, and Martin Potocký</i>	
20	Lab-on-a-Chip for Studying Growing Pollen Tubes.	237
	<i>Carlos G. Agudelo, Muthukumaran Packirisamy, and Anja Geitmann</i>	
21	Laser Microdissection of Plant Cells	249
	<i>Yvonne Ludwig and Frank Hochholdinger</i>	
22	Optical Trapping in Plant Cells	259
	<i>Tijs Ketelaar, Norbert de Ruijter, and Stefan Niebren</i>	
23	Heterologous Expression in Budding Yeast as a Tool for Studying the Plant Cell Morphogenesis Machinery.	267
	<i>Fatima Cvrčková and Michal Hála</i>	
	<i>Index</i>	283
