Section I

SECURITY RISK ASSESSMENT

1	Introduction to Security Risk Assessment	3
	Security Risk Assessment	5
	Protection System Robustness	6
	Security System Resiliency	6
	System Approach for Security Risk Assessment	7
	Determine Undesired Events, Associated Critical Assets, and Available Resources	8
	Threat Analysis	8
	Assess Likelihood of Initiating Event	8
	Estimate Protection System Effectiveness	9
	Assess Consequences for Undesired Event	9
	Estimate Security Risk	9
	Upgrade the Protection System to Be Robust against Undesired Event	10
	Upgrade Security System to Be Resilient for Undesired Event	10
	Summary	10
	Reference	10
2	Undesired Events, Associated Critical Assets, and Available Resources	11
	Critical Assets	11
	Logic Model	12
	Logic Gates	12

Transfer Operations	13
Primary Events	13
Resources	16
Summary	16
References	17
3 Threat Analysis	19
Malevolent Threats	19
Type of Adversary	23
Adversary Capability	24
Design Basis Threat	25
Natural Hazards	26
Hurricane	27
Earthquake	27
Tornado	27
Flood	27
Accidents	28
Summary	29
References	29
4 Likelihood of Initiating Events	31
Malevolent Threat	31
Outsider Threat	32
Insider Threat	34
Natural Hazard Threat	36
Accident Threat	36
Summary	38
References	38
5 Assess Consequences and Responses for Undesired Event	39
Reference Table for Consequences	39
Estimating Consequence Level for Undesired Events	41
Summary	42
Reference	42
6 Assessment of Protection System Effectiveness	43
Assessment of Protection System Effectiveness for Malevolent Threat	43
Adversary Scenarios	44
Effective Physical Protection System for the Malevolent Threat	46

Physical Protection System Effectiveness Assessment	48
Assessment Example	49
Protection System Effectiveness against Blast Attacks	52
Assessment Example	52
Mitigation of the Insider Threat	53
Cyber Protection System Effectiveness	55
Cyber Functions	56
Assessment Example	57
Effectiveness for Natural Hazards	58
Protection System Effectiveness Assessment Example	59
Protection System Effectiveness for Accidents	60
Assessment Example	60
Summary	62
References	62

7 Estimate Security Risk 63

System Approach for Security Risk Assessment	63
Determine Undesired Events, Associated Critical Assets, and Available Resources	64
Threat Analysis	65
Assess Likelihood of Initiating Event	65
Estimate Protection System Effectiveness	65
Assess Consequences for Undesired Event	67
Estimate Security Risk	68
Upgrade Protection System to Be Robust against Undesired Event	70
Upgrade Security System to Be Resilient for Undesired Event	72
Summary	72

Section II

EVALUATION AND DESIGN OF RESILIENT SYSTEMS

8 Motivating Infrastructure Resilience Analysis 75

References	78
------------	----

9 Current State of Resilience Assessment 79

Definitions of Resilience	80
Domains	84

Assessment Processes	85
Structural Resilience Assessment Methodologies	86
Qualitative Assessments	86
Quantitative and Semiquantitative Indexes	87
Performance-Based Measurement	89
Seismic Resilience	90
Probabilistic Assessment	91
Economic Resilience	93
Hybrid Approaches	96
Gaps and Limitations	99
Endnotes	102
References	102
10 Infrastructure Resilience Analysis Methodology	105
Definition of Resilience	107
Measurement of Resilience Costs	108
Systemic Impact	109
Total Recovery Effort	111
Resilience Cost Calculation	112
Use and Interpretation of Recovery-Dependent Resilience	
Costs and Optimal Resilience Costs Quantities	114
Additional Notes on Calculation of Resilience Costs	115
Qualitative Structural Analysis	116
Absorptive Capacity	117
Adaptive Capacity	119
Restorative Capacity	121
Additional Notes on Resilience Capacities	123
Applying the Infrastructure Resilience Analysis Methodology	124
Summary	128
Endnote	129
References	129
11 Case Studies Using the Infrastructure Resilience Analysis Framework	131
Qualitative Resilience Analysis Case Study	132
Define Systems	132
Define Scenario	133
Perform Structural Analysis	134
Analysis Conclusions	138
Quantitative Resilience Analysis Case Study	138
Define Systems	139
Define Scenario	139

Define Metrics and Obtain Data	140
System Performance	140
Total Recovery Effort	142
Calculate Resilience Costs	143
Perform Structural Analysis	146
Absorptive Capacity	146
Adaptive Capacity	148
Restorative Capacity	150
Conclusions	151
Case Study on Optimizing Resilient Recovery Strategies	152
Define Systems	152
Define Scenario	153
Define Metrics	155
Obtain Data and Calculate Resilience Costs	157
The Rail Network Analysis System	158
Optimization	160
Simulation Results	161
Conclusions	165
Summary	166
Endnotes	167
