

## TABLE OF CONTENTS

1	Introduction to RWTH Aachen – Integrated Technical University <i>D. Senk</i>	2-9
2	Innovation by Cooperation - Forum Materials Science fosters interdisciplinary research at RWTH Aachen University <i>A. Brings, S. Muckel; D. Senk</i>	10-19
3	Modern high manganese steels - SFB761 "Steel ab initio" <i>W. Bleck, J. Imlau, K. Phiu-On</i>	20-31
4	Cross-branch of knowledge collaboration – results <i>D. Juchelková</i>	32-34
5	Aberration-corrected Transmission Electron Microscopy and Applications in Materials Science <i>J. Mayer, A. Sologubenko</i>	35-42
6	Networking in engineering education and vocational training <i>A. Babich, D. Senk</i>	43-52
7	Analytical Laboratory at VSB-TU Ostrava and their Role in Materials Testing <i>V. Tomášek</i>	53-59
8	Shaft Furnace Technologies Related To Materials and Environmental Challenges <i>E. Mousa, A. Babich, R. Klock, S. Khumkoa, D. Senk</i>	60-70
9	Quality of Coke for Pig Iron-making <i>J. Kret, M. Fröhlichová, M. Šabíková</i>	71-78
10	Principal R&D Activities in Materials Engineering and Metallurgy <i>J. Sojka</i>	79-100
11	Researches in Secondary Steelmaking at the Department of Ferrous Metallurgy, RWTH Aachen University: Solids Injection and Vacuum Treatment <i>E. Jipnang Njamen, S. Geimer, D. Senk</i>	101-108
12	Steel Cleanness and Clogging Prevention <i>M. Krings, D. Senk</i>	109-120

- 
- 13 Electric Arc Furnaces and Secondary Metallurgy of ŽDAS  
*L. Martínek, M. Balcar* 121-128
  - 14 Metallurgical treatment of new steel grades  
*J. A. Vazquez M., A. Lob, D. Rzehak, D. Senk* 129-138
  - 15 High-strength steels for autobody application  
*W. Bleck, M. Titova* 139-151
  - 16 Risk Management Regarding Special Projects in Industrial Enterprises  
*M. Korecky* 152-161
  - 17 Materials aspects in continuous casting  
*R. Nagy, S. Stratemeier, E. Erdem, D. Senk* 162-172
  - 18 Temperature Dependence of the Viscosity of Melts  
*R. Conradt* 173-183
  - 19 Polymer Research at the Institute of Plastics Processing (IKV) within the "Aachen Polymer Chain (APC)"  
*W. Michaeli, T. Baranowski, B. Heesel* 184-192
  - 20 New materials from PROGRES EKOTECH Třinec  
*K. Gajdzica, J. Rozenkranc* 193-197
  - 21 Geochemical indicators of urban soil contamination by metallurgical industry at Ostrava  
*H. Raclavska, D. Matysek, K. Raclavsky* 198-206
  - 22 Autonomous Optimization – The second generation of continuous steel casting simulation  
*I. Hahn, G. Hartmann, E. Hepp, W. Schäfer* 207-216
  - 23 Simulation, Monitoring and Control of Transition Zones in CC Billets at Steelworks Třinec  
*K. Michalek, J. Morávka, K. Gryc, M. Szymanik, J. Pindor* 217-226
  - 24 Exploitation of Artificial Intelligence Methods in Material Research  
*Z. Jančíková* 227-234
  - 25 Simulation facilities on dust treatment  
*F. Schott, D. Senk* 235-243

- 
- 26 Special Measurement Development at Energetic  
*P. Kolat, B. Čech, V. Roubíček* 244-252
- 27 Controlled Fluidized Bed for Coal Treatment and Gasification  
*D. Senk, S. Geimer, T. Baur* 253-259
- 28 Online measurement techniques in material production  
*S. Sandlöbes, D. Senk, R. Klock, A. Babich* 260-269
- 29 NOx formation on gaseous fuels burning – Fluent software utilization  
*A. Macháčková, R. Kocich, Z. Klečková M. Mihola* 270-279
- 30 Effect of Potassium Promoter in Co-Mn-Al Mixed Oxide on the N<sub>2</sub>O Catalytic Decomposition in the Presence of NOx  
*L. Obalová, K. Galejová, K. Jiráťová, F. Kovanda* 280-289
- 31 Advanced creep resistant steels for coal-fired power plants  
*P. Mohyla, J. Zapletal* 290-297
- 32 Chemical and Energy Utilization of Waste Polymer-based Materials  
*Z. Mikulová, J. Pavelka, V. Roubíček, R. Smelík* 298-303
- 33 Wastewater treatment using of organoclay sorptive materials  
*D. Plachá, G. Simha Martynková* 304-306
- 34 Size Dependency of Nanocrystalline TiO<sub>2</sub> on Photocatalytic Reactivity Exemplified by CO<sub>2</sub> Photoreduction  
*K. Kočí, L. Obalová, L. Matějová,* 307-314
- 35 Contribution to comparison of physical characteristics of directionally crystallised Ni-Al based inter-metallic compound  
*J. Malcharcziková, M. Kursá* 315-319
- 36 Application of Statistical Process Control to the Analysis of Environmental Aspects of the Blast Furnace Process  
*D. Noskivičová* 320-325
- 37 Analysis of Basic Technical-Economic Indices of e Selected Blast-Furnace  
*E. Kardas, M. Konstanciak* 326-330

- 
- 38 Alternative possibilities for processing the metal-bearing oxidic wastes with the usage of plasma heating  
*S. Brožová* 331-335
- 39 Optimalization of PEM Fuel Cell  
*K. Ksandrová* 336-340
- 40 Operational test of high - grade refractory materials in twin-hearth furnace  
*F. Ovčáčík, P. Hašek, M. Klárová, J. Pyš* 341-347
- 41 Steelmaking furnaces basic linings and their protection  
*M. Klárová, P. Hašek, F. Ovčáčík* 348-351
- 42 Temperature Field Determination during Controlled Rolling of Bands  
*D. Dittel, Z. Toman* 352-358
- 43 Possibility of emission reduction in ladle metallurgy at ArcelorMittal Ostrava a.s.  
*D. Jančar, P. Hašek, P. Tvardek* 359-363
- 44 Influence of Dynamic Changes of Thermomechanical on the Initiation of DRX  
*R. Fabík, S. Aksenov* 364-367
