

Contents

Chapter 1	
<i>A Copula Approach to CVA Modeling</i>	9
Chapter 2	
<i>Numerical Solutions to Higher-order PDEs with Applications to Finance</i>	25
Chapter 3	
<i>Forecasting Realized Variance of Currency Exchange Rates with Artificial neural networks</i>	43
Chapter 4	
<i>Modeling of Fat Tails of Financial Assets Returns</i>	61
Chapter 5	
<i>Application of Generalized Hyperbolic Distribution</i>	69
Chapter 6	
<i>The Problem of Multiple IRR Roots</i>	77
Chapter 7	
<i>European Option Pricing Model with Underlying Asset Following Subdiffusion Process</i>	91
Chapter 8	
<i>Basel III Regulation of Over-the-Counter Derivate Securities</i>	107
