Preface to the Second Edition	ix
Preface to the First Edition	xi
1 Introduction	1
1.1 Studio Technology	1
1.2 Digital Transmission Systems	2
1.3 Storage Media	10
1.4 Audio Components at Home	13
References	17
2 Quantization	21
2.1 Signal Quantization	21
2.1.1 Classical Quantization Model	21
2.1.2 Quantization Theorem	24
2.1.3 Statistics of Quantization Error	30
2.2 Dither	36
2.2.1 Basics	36
2.2.2 Implementation	39
2.2.3 Examples	39
2.3 Spectrum Shaping of Quantization – Noise Shaping	42
2.4 Number Representation	47
2.4.1 Fixed-point Number Representation	47
2.4.2 Floating-point Number Representation	53
2.4.3 Effects on Format Conversion and Algorithms	56
2.5 Java Applet – Quantization, Dither, and Noise Shaping	58
2.6 Exercises	59
References	61
3 AD/DA Conversion	63
3.1 Methods	63
3.1.1 Nyquist Sampling	63
3.1.2 Oversampling	65
3.1.3 Delta-sigma Modulation	66

3.2	AD Converters	79	5.5	Java Applet – Audio Filters	180
3.2.1	Specifications	79	5.6	Exercises	181
3.2.2	Parallel Converter	82		References	185
3.2.3	Successive Approximation	83			
3.2.4	Counter Methods	84	6 Room Simulation		191
3.2.5	Delta-sigma AD Converter	85	6.1	Basics	191
3.3	DA Converters	86	6.1.1	Room Acoustics	191
3.3.1	Specifications	86	6.1.2	Model-based Room Impulse Responses	192
3.3.2	Switched Voltage and Current Sources	89	6.1.3	Measurement of Room Impulse Responses	193
3.3.3	Weighted Resistors and Capacitors	89	6.1.4	Simulation of Room Impulse Responses	194
3.3.4	R-2R Resistor Networks	92	6.2	Early Reflections	195
3.3.5	Delta-sigma DA Converter	92	6.2.1	Ando's Investigations	195
3.4	Java Applet – Oversampling and Quantization	92	6.2.2	Gerzon Algorithm	195
3.5	Exercises	94	6.3	Subsequent Reverberation	200
	References	95	6.3.1	Schroeder Algorithm	200
4 Audio Processing Systems		97	6.3.2	General Feedback Systems	208
4.1	Digital Signal Processors	98	6.3.3	Feedback All-pass Systems	212
4.1.1	Fixed-point DSPs	98	6.4	Approximation of Room Impulse Responses	213
4.1.2	Floating-point DSPs	100	6.5	Java Applet – Fast Convolution	217
4.2	Digital Audio Interfaces	101	6.6	Exercises	217
4.2.1	Two-channel AES/EBU Interface	101		References	219
4.2.2	MADI Interface	102			
4.3	Single-processor Systems	107	7 Dynamic Range Control		225
4.3.1	Peripherals	107	7.1	Basics	225
4.3.2	Control	107	7.2	Static Curve	226
4.4	Multi-processor Systems	109	7.3	Dynamic Behavior	228
4.4.1	Connection via Serial Links	110	7.3.1	Level Measurement	228
4.4.2	Connection via Parallel Links	111	7.3.2	Gain Factor Smoothing	230
4.4.3	Connection via Standard Bus Systems	112	7.3.3	Time Constants	230
4.4.4	Scalable Audio System	113	7.4	Implementation	231
	References	113	7.4.1	Limiter	231
5 Equalizers		115	7.4.2	Compressor, Expander, Noise Gate	231
5.1	Basics	115	7.4.3	Combination System	233
5.2	Recursive Audio Filters	119	7.5	Realization Aspects	234
5.2.1	Design	119	7.5.1	Sampling Rate Reduction	234
5.2.2	Parametric Filter Structures	128	7.5.2	Curve Approximation	236
5.2.3	Quantization Effects	138	7.5.3	Stereo Processing	237
5.3	Nonrecursive Audio Filters	157	7.6	Java Applet – Dynamic Range Control	237
5.3.1	Basics of Fast Convolution	158	7.7	Exercises	238
5.3.2	Fast Convolution of Long Sequences	161		References	239
5.3.3	Filter Design by Frequency Sampling	167			
5.4	Multi-complementary Filter Bank	168	8 Sampling Rate Conversion		241
5.4.1	Principles	168	8.1	Basics	241
5.4.2	Example: Eight-band Multi-complementary Filter Bank	175	8.1.1	Upsampling and Anti-imaging Filtering	241
			8.1.2	Downsampling and Anti-aliasing Filtering	242
			8.2	Synchronous Conversion	244

8.3	Asynchronous Conversion	246
8.3.1	Single-stage Methods	250
8.3.2	Multistage Methods	252
8.3.3	Control of Interpolation Filters	253
8.4	Interpolation Methods	257
8.4.1	Polynomial Interpolation	257
8.4.2	Lagrange Interpolation	260
8.4.3	Spline Interpolation	261
8.5	Exercises	269
	References	270
9	Audio Coding	273
9.1	Lossless Audio Coding	273
9.2	Lossy Audio Coding	275
9.3	Psychoacoustics	277
9.3.1	Critical Bands and Absolute Threshold	277
9.3.2	Masking	279
9.4	ISO-MPEG-1 Audio Coding	284
9.4.1	Filter Banks	285
9.4.2	Psychoacoustic Models	287
9.4.3	Dynamic Bit Allocation and Coding	290
9.5	MPEG-2 Audio Coding	291
9.6	MPEG-2 Advanced Audio Coding	292
9.7	MPEG-4 Audio Coding	304
9.8	Spectral Band Replication	306
9.9	Java Applet – Psychoacoustics	308
9.10	Exercises	310
	References	311
	Index	317
