

Content

1 INTRODUCTION TO MICROBIOLOGY.....	8
2 MICROBES AND THE WORLD	10
2.1 TYPES OF MICROORGANISMS.....	11
2.2 MICROBES AND THE ORIGIN OF LIFE ON EARTH.....	14
2.3 ENVIRONMENTALLY DIVERSITY OF MICROBES	16
3 BACTERIA, ARCHEA AND EUKARYOTE CELL STRUCTURE	18
3.1 AN OVERVIEW OF PROKARYOTIC AND EUKARYOTIC CELLS	20
3.2 CYTOPLASMIC MEMBRANE OF PROKARYOTE AND EUKARYOTIC CELLS	24
3.3 TRANSPORT ACROSS THE CELL MEMBRANE	25
3.4 CELL WALLS OF PROKARYOTES	31
3.4.1 The Cell Walls of Bacteria	31
3.4.2 Gram-Negative Outer Membrane	31
3.4.3 Gram-Positive Cell Envelope	33
3.5 SPECIALIZED EXTERNAL STRUCTURES OF PROKARYOTES.....	34
3.6 SPECIALIZED INTERNAL STRUCTURES OF PROKARYOTES.....	36
3.6.1 Ribosomes	36
3.6.2 The Nucleoid.....	37
3.6.3 Cell Inclusions and Storage Granules.....	38
3.6.4 Gas Vesicles	40
3.7 CELL WALLS OF EUKARYOTES	40
3.8 INTERNAL STRUCTURES OF EUKARYOTIC CELLS.....	41
3.8.1 Mitochondria	42
3.8.2 Chloroplasts	43
3.8.3 Endoplasmic Reticulum	44
3.8.4 Golgi Apparatus (Complex).....	45
3.9 OTHER EUKARYOTIC COMPONENTS	46
3.9.1 Peroxisomes	47
3.9.2 Lysosomes.....	48
3.9.3 Flagella and Cilia	49
3.9.4 The Extracellular Matrix.....	50
3.10 PROTEIN EXPORT AND SECRETION	51

4 MICROBIAL METABOLISM	55
4.1 TYPES OF METABOLISM	55
4.1.1 Autotrophs and Heterotrophs	56
4.1.2 Photoautotrophs and Photoheterotrophs	56
4.1.3 Chemoautotrophs and Chemoheterotrophs	57
4.2 ENERGY PRODUCTION	57
4.2.1 Catabolic Pathways	58
4.2.2 Redox Reaction	62
4.2.3 The production of ATP	63
4.3 CATABOLISM	64
4.3.1 Carbohydrate Catabolism	65
4.3.2 The Pentose Phosphate Pathway	66
4.4 GLYCOLYSIS	66
4.4.1 The EMP Pathway – Embden Meyerhof Pathway	66
4.4.2 Electron Donors and Acceptors	68
4.4.3 Electron Transport System (ETS)	69
4.4.4 Respiration and Proton Motive Force	71
4.5 FERMENTATION	73
4.5.1 Lactic Acid Fermentation	74
4.5.2 Alcohol Fermentation	75
4.6 ANAEROBIC RESPIRATION	76
4.6.1 Electron acceptors and Donors	76
4.6.2 Nitrate Reduction and Denitrification	78
4.6.3 Sulfate and Sulfur Reduction	82
4.7 CHEMOLITHOTROPHY	83
4.7.1 The Energetics of Chemolithotrophy	83
4.7.2 The Metabolism of Anammox	84
4.8 PHOTOTROPHY	85
4.9 BIOSYNTHESIS	89
4.9.1 TCA Cycle	89
4.9.2 Glycolysis	91
4.9.3 Anabolism – Polysaccharide Biosynthesis	93

4.10 AMINO ACID BIOSYNTHESIS	94
4.11 NITROGEN FIXATION	95
5 CULTURING MICROORGANISMS	98
5.1 MICROBIAL NUTRITION	98
5.1.1 Chemicals Analysis of Microbial Cytoplasm	98
5.1.2 Sources of Essential Nutrients	100
5.1.3 Nutrient Supplies Limit Growth	101
5.2 CELL DIFFERENTIATION AND STARVATION	103
5.2.1 Starvation Activates Survival Genes	103
5.2.2 Oligotrophs	104
5.2.3 Starvation-Induced Fruiting Bodies.....	105
5.2.4 Bacterial Differentiation to Eukaryotic-like Structures	107
5.3 MICROBIAL GROWTH.....	109
5.3.1 Binary Fission.....	109
5.3.2 Generation Time	111
5.4 TEMPERATURE AND MICROBIAL GROWTH.....	113
5.5 OTHER ENVIRONMENTAL GROWTH FACTORS	115
5.5.1 Gas Requirements	115
5.5.2 Osmotic Effects.....	116
5.5.3 Microbial Growth at Low or High pH.....	117
5.5.4 Oxygen	118
5.6 MICROBIAL GROWTH IN COMMUNITIES	119
5.6.1 Ecological Associations Among Microorganism.....	119
5.6.2 Biofilms	121
6 MICROBIAL GENETICS	123
6.1 GENES.....	123
6.1.1 Bacterial Genomes.....	124
6.1.2 Genotype and Phenotype	125
6.2 PROKARYOTIC GENOMES – BACTERIAL CHROMOSOMES IN THE NUCLEOID ...	125
6.3 DNA REPLICATION	126
6.3.1 Intro to DNA Replication.....	127
6.4 PLASMIDS.....	131

6.4.1 Plasmids: General Principles	131
6.4.2 Types of Plasmids and Their Biological Significance	131
6.5 PROTEIN SYNTHESIS	132
6.5.1 Structure and Role of Ribosomes	132
6.5.2 Protein Synthesis: Transcription and Translation	133
6.6 MUTATION.....	136
6.6.1 Type of Mutations	136
6.6.2 Mutagens	138
7 MICROBIAL EVOLUTION, DIVERSITY AND PHYLOGENY	140
7.1 BACTERIAL DIVERSITY	140
7.1.1 Proteobacteria	142
7.1.2 Firmicutes	142
7.1.3 Actinobacteria	142
7.1.4 Cyanobacteria	143
7.1.5 Chlamydiae	143
7.1.6 Spirochaetes and Other Phyla	143
8 MICROBIAL INTERACTIONS IN SOIL.....	144
8.1 RHIZODEPOSITION.....	146
8.2 WHERE ARE RHIZODEPOSITS RELEASED?	147
8.3 THE IMPORTANCE OF ROOT EXUDATES	148
8.4 CELL-CELL SIGNALLING IN BACTERIA.....	148
8.5 SOIL ORGANIC MATTER	151
8.6 THE MICROBIAL LOOP IN SOIL	156
8.7 INTERACTION WITH RHIZOBIA AND MYCORRHIZAL FUNGI	160
8.8 THE MICROBIAL PROCESSES IN THE NITROGEN CYCLE	163
REFERENCES	169
APPENDIX	176
APPENDIX A – BACTERIA, ARCHAEA, AND EUKARYOTE CELL STRUCTURE	176
APPENDIX B – MICROBIAL METABOLISM.....	179
APPENDIX C – CULTURING MICROORGANISMS	184
APPENDIX D – MICROBIAL GENETICS	187
APPENDIX E – MICROBIAL EVOLUTION AND PHYLOGENY	190
APPENDIX F – MICROBIAL INTERACTIONS	191
