

7. CONTENTS

Preface1

1. Introduction3

 1.1. Definitions and basic terms3

2. Kinematics of A point3

 2.1. Rectilinear motion of a point3

 2.2. Curvilinear motion of a point7

 2.2.1. Rectangular coordinate system8

 2.2.2. Cylindrical coordinate system9

 2.2.3. Natural coordinate system10

3. Kinematics of A body13

 3.1. Motion of a rigid body in plane13

 3.1.1. Translational motion of a body13

 3.1.2. Rotational motion of a body14

 3.1.3. General plane motion of a body17

 3.2. Spherical motion of a body22

 3.3. General spatial motion of a body29

4. Kinematics of the concurrent motions of points and bodies32

 4.1. Relations among kinematic quantities32

 4.2. Basic decomposition of motion39

 4.3. Three and more concurrent motions42

5. Kinematics of plane mechanisms45

 5.1. Basic terms45

 5.2. Analytic kinematic solution of mechanisms49

6. Mechanisms with constant gear ratio56

 6.1. Basic terms56

 6.2. Kinematic solution of trivial gear trains58

 6.3. Kinematic solution of planetary gear trains60

7. Contents64
