

CONTENTS

1	INTRODUCTION	5
2	STATE OF THE ART	6
3	DISSERTATION GOALS AND BENEFITS	8
4	PRINCIPAL TERMS	9
4.1	Identification	9
4.2	Behaviometrics	9
5	BIOMETRIC IDENTIFICATION SYSTEM	10
5.1	General model	10
5.2	Quality metrics	11
5.3	Feature selection	12
6	MOUSE-LIKE DEVICE IN BIOMETRICS	13
6.1	Principles and questions about the method	13
6.2	Pros and cons	13
6.3	Four-layer model	14
7	EXPERIMENTAL PART OVERVIEW	15
8	ENVIRONMENT AND DATA	16
8.1	The environment	16
8.2	Experimental data sets	16
9	FEATURE EXTRACTION	18
10	FEATURE SELECTION	19
11	REUSABILITY OF DATA SETS	20
12	DISSERTATION OUTCOMES	21
12.1	Discussion of goals	21
12.2	Contribution to science and praxis	22
13	CONCLUSION	24
	REFERENCES	25
	LIST OF AUTHOR'S PUBLICATION ACTIVITIES	29
	CURRICULUM VITAE	30
