

Contents:

1. A. H. Whitehead, M. Schreiber:
Microstructured current collectors for advanced battery systems
2. Vondrák J., Reiter J., Sedlaříková M., Novák V.:
Thermodynamics and digital simulation of intercalation processes
3. J. Přidal, J. Prachařová, J. Bludská, I. Jakubec
Thin Film Components for Li-Ion Microbatteries
4. M. Míka, P. Šmíd, J. Vondrák, B. Klápště:
Lithium glasses exhibiting increased ionic conductivity
5. D. Rohanová and J. Vondrák:
Voltammetric measurement of the Pt electrode capacity and the determination of the polyvalent ions diffusion coefficients in the glass melt
6. J. Vondrák, J. Reiter, M. Sedlaříková, K. Bartušek, V. Novák, Nováček:
Electrochemical Properties of PMMA-PC Gels Containing Cadmium Salts
7. T. Ivanova, K. A. Gesheva, A. Szekeres:
Structure and optical properties of CVD-molybdenum oxide films for electrochromic application
8. L. Skatkov:
Electrochrome effect in amorphous anodic niobium pentoxide films
9. C. O. Avellaneda, L. O. S. Bulhões:
Electrochromic properties of $WO_3:P$ thin films
10. Lin-Chi Chen, Kuei-Sheng Tseng, Kuo-Chuan Ho:
Enhanced Electrodeposition of Indium Hexacyanoferrate Thin Films through Improving Plating Solution Stability
11. Lin-Chi Chen, Yu-Hsien Huang, and Kuo-Chuan Ho:
A Complementary Electrochromic System based on Prussian Blue and Indium Hexacyanoferrate
12. A.M.Skundin, T.L.Kulova, O.A.Brylev and S.V.Pouchko:
The effect of synthetic technique of vanadium oxides on performance of positive electrodes of lithium-ion batteries
13. M. Sedlaříková, J. Vondrák, P. Nečesal, Z. Rozsivalová:
Lithium – ion batteries
14. A. Trifonova, J. O. Besenhard, M. Winter, M. Wachtler:
Nano-structured and nano-composite lithium storage anode materials

15. H. Björk, T. Gustafsson and J. Thomas:
The intercalation process of Li^+ ions into V_6O_{13} studied by single-crystal XRD
16. G. Taralunga, E. M. Rus and D. M. Constantin:
Lithium battery with V_6O_{13} cathode material
17. W. Kohs, H. Buqa, J. H. Albering, H. Schröttner, J. Dononger, I. Barsukov, M. Winter, and J. O. Besenhard:
The relevance of graphite properties for anode performance in lithium ion cells
18. M. R. Wagner, M. Wachtler, M. Schmied, P. Preishuber-Pflügl, F. Stelzer, J. O. Besenhard and M. Winter:
New Binders for Composite Electrodes with Nano-Structured Lithium Storage Metals and Alloys
19. T. L. Kulova, A. M. Skundin, D. E. Sklovsky:
Oxidation as a tool for elimination of irreversible capacity of graphite negative electrodes for lithium ion batteries
20. H. Buqa, W. Kohs, H. Schröttner, R. I. R. Blyth, M. G. Ramsey, F. P. Netzer, M. Winter, and J. O. Besenhard:
The relevance of graphite surface properties for anode performance in lithium ion cells - I. surface chemical composition
21. H. Schröttner, H. Buqa, W. Kohs, J. O. Besenhard, P. Golob, and M. Winter:
The relevance of graphite surface properties for anode performance in lithium ion cells - II. surface morphology
22. J. P. Olivier, H. Buqa, W. Kohs, H. Schröttner, P. Golob and M. Winter:
The relevance of graphite surface properties for anode performance in lithium ion cells - III. surface area and surface heterogeneities
23. E. A. Abdelmula, F. Beck:
Polymer and polymer- composite thick films in a metal-free, rechargeable battery
24. J. Vondrák, M. Sedlářiková, V. Novák, P. Nečas, R. Černý:
Basic Properties of Electrochemical Supercapacitors
25. K.-C. Möller, R. K. Sauerbrey, G. Fauler, J. O. Besenhard, and M. Winter:
New Electrolyte Additives for Rechargeable Lithium Metal Cells
26. H. J. Santner, K.-C. Möller, M. Winter and J. O. Besenhard:
Investigation novel electrolyte additives for improved filming of graphite anodes for Lithium ion cells
27. K.-C. Möller, H. J. Santner, J. O. Besenhard, and M. Winter:
New Film Forming Electrolyte Additives for Graphitic Anodes for Lithium Ion Cells
28. J. Vondrák, M. Sedlářiková and D. Coural:
Rotating disk electrode for measuring electrocatalyst materials

29. J. Kaiser, Z. Jusys and R.J. Behm:
Synergetic effects in CO oxidation on carbon-supported Pt, PtRu, Pt+Ru and Ru low temperature fuel cell catalysts
30. Z. Jusys, J. Kaiser, K. Lasch, L. Jörissen and R. J. Behm:
Composition and reactivity of PtRu catalysts in methanol electrooxidation
31. J. O. Besenhard, T. Hejze, E. Leitner:
Methanol determination in liquid electrolyte DMFC using SPME
32. A. Havránek, K. Klafki and K. Wippermann:
The Influence of the Catalyst Loading and the Ionomer Content on the Performance of DMFC Anodes
33. V. Baklan, I. Kolesnikova, N. Chschadnyh:
The utilization of untraditional raw materials for iron-nickel accumulators
34. D. M. Constantin, E. M. Rus and G. Taralunga:
The influence of the active material composition on the electrochemical behavior of nickel electrodes in alkaline batteries
35. M. Kopczyk, A. Sierczyńska, J. Skowroński:
The investigation of the influence of the hydrogen equilibrium pressure for hydrogen absorbing alloys capacity of Mh electrode in the opened and closed cells
36. V. Svoboda, H. Doering, I. Dyson, J. Garche:
Fast & normal charge influence on the active mass of thin tubular plate VRLA cells
37. E. M. Rus, D. M. Constantin and G. Taralunga:
Improvement of the electrochemical behaviour oh positive electrode in the lead/acid battery containing various additives in electrolyte
38. P. Křivák, P. Bača, P. Král:
Current distribution over the electrode surface in a lead acid cell – comparison of two models
39. P. Bača, R. Drnovský:
Study of structural changes of the Pb accumulator positive active mass by environmental scanning electron microscopy
40. M. Cenek, Z. Rozsivalová:
Utilization of Electric Energy at Direct Charging of Electric Vehicles from Small Hydroelectric Power Plants
41. J. Vaněk, J. Kazelle:
I/f noise in solar cells
42. L. Blum:
SOFC – Status and Planning

43. E. K. Kaibara, F. I. Mattos-Costa, L.O.S. Bulhões, A. Miranda, C. Pedrosa, I. Cisneros:
Electrochemical characterization of natural graphite to be used in lithium ion batteries
44. A.M.Skundin, S.A.Fateev, and T.L.Kulova:
Battery for cardiac pacemaker: an alternative to lithium-iodine system
45. A Szekeres, T. Ivanova and K. A. Gesheva:
Spectroscopic ellipsometry study of CVD-Molybdenum oxide films: effect of temperature
46. E.I. Santiago and L.O.S. Bulhões:
Correlation between structure and electrochemical properties of LiCoO_2 electrodes
47. J. Vondrák, M. Sedlaříková, M. Dočkal, R. Drnovský:
Metal deposition from PMMA / PC gelous electrolytes
48. G. Vaivars, J. Kleperis, G. Młynarek, A. Lusiš and M. Kopczyk:
AC impedance behaviour of the metal hydride electrodes
49. N. Kérouani, D. Kerouani, N. Chelali, J. Vondrak:
Charge – discharge proprieties of chemically prepared MnO_x / C(Y50B) - polyaniline composite electrode
50. N. Kérouani, D. Kerouani, N. Chelali, J. Vondrak:
Polyisobutylen gel protonic electrolyte: electrochemical and impedance study
51. N. Kérouani, D. Kerouani, N. Chelali, J. Vondrak:
Synthesis of MnO_x / C(Y50B): analysis, electrochemical study and diffusion behaviour
