

Contents

1 - 2	<i>S. Koten, P. Maršik</i> Study the electrochromic characteristics materials on complete electrochromic units	0
3 - 5	<i>V. Barsukov, V. Khomenko, P. Antonenko, L. Yatsuk</i> Rechargeable Metal-Air Batteries with Conductive Polymers Catalysts	1
7 - 9	<i>V. Svoboda, A. Jossen, H. Doering, J. Garche</i> Small secondary batteries	2
11 - 14	<i>S. E. Smirnov, K. Y. Ilin; A. A. Ogorodnikov</i> Lithium batteries with solid polymer electrolytes	3
15 - 16	<i>W. Kohs, A. Gupper, F. Hofer, H. Schröttner, J. Doninger, I. Barsukov, J. O. Besenhard, M. Winter</i> Influence of subsurface structures on the anode performance in lithium-ion cells	3
17 - 18	<i>A. A. Evtukh, V. N. Plakhotnyk</i> Use exhausted lithium batteries of system $\text{Li/LiBF}_4\text{-(BL/(CF}_x)_n$ for reception electrolytes	3
19 - 20	<i>A. M. Skundin, T. L. Kulova</i> Nanostructured $(\text{Sn, Ti})\text{O}_2$ - new material for negative electrode of lithium-ion batteries	3
21 - 23	<i>E. Shembel, A. Nosenko, A. Kvasha</i> Promising solid amorphous electrolyte with lithium-ion conductivity based on $\text{Li}_2\text{O-Li}_2\text{SO}_4\text{-B}_2\text{O}_3$ systems	3
24	<i>E. Shembel, R. Apostolova, V. Nagirny, V. Tysyachny, I. Kirsanova</i> Electrolytic oxides of transition metals in the anodes of lithium rechargeable batteries	3
25 - 27	<i>G. Taralunga, E. M. Rus, D. M. Constantin</i> Cathodic active material for lithium batteries	3
28	<i>H. J. Santner, C. Korepp, K.- C. Möller, J. O. Besenhard, M. Winter</i> The Impact of Electrolyte Additives on the SEI Formation in Lithium Ion Batteries	3
29 - 31	<i>O. V. Chervakov, N. I. Globa, K. E. Kylyvnyk, E. M. Shembel, P. Novák</i> Polymer electrolytes for lithium power sources based on metal disulfides	3
32 - 36	<i>O. V. Chervakov, N. I. Globa, V. V. Riabenko, O. V. Kolomojets, E. M. Shembel, K. A. Kotsuba</i> Quaternary ammonium salts in the composition of liquid and polymer electrolytes for lithium power sources	3
37 - 40	<i>J. Merta, J. Bludská, I. Jakubec</i> Thin film Li-ion batteries with carbon anode	3
41 - 44	<i>K.- C. Möller, A. Hosseinmardi, M. Winter, J. O. Besenhard</i> Film-Formation at Cathodes for Lithium Ion Batteries	3
45	<i>L. P. Paskal, L. P. Linets, A. T. Synyugina, V. A. Dusheyko, V. G. Syromyatnikov</i> Li-containing solid polymeric electrolytes based on alky methacrylates	3
46 - 47	<i>M. R. Wagner, P. Raimann, K.- C. Möller, J. O. Besenhard, M. Winter</i> SEI Formation on Lithium Alloy Anodes studied by DEMS	3
48	<i>M. R. Wagner, K.- C. Möller, J. O. Besenhard, M. Winter</i> Influence of the Electrolyte Composition on the Capacity Fade of Lithium Alloy Anodes	3
49	<i>M. Green, E. Fielder, J. Stagg, B. Scrosati, M. Wechtler and J. Moreno</i> Structured Silicon Anodes for Lithium Battery Applications	3
50	<i>O. Krejza, T. Nováček, J. Vondrák, M. Sedlářiková</i> Specific conductivity of PMMA based gel electrolytes containing cadmium, magnesium or lithium salts	3

51 - 53	<i>P. Nečesal</i> Electrolytes for lithium batteries 3
54 - 56	<i>B. Szczesniak, Z. Brudka, S. Tabat, S. Styczynski</i> Electrochemical properties of the LAN' type lithium electrodes in melted high ionic salts of alkali metals 3
57 - 59	<i>V. Barsukov, E. Ilyn, V. Kryukov, E. Kryukova and N. Chmilenko</i> Advanced Commercial and Experimental Grades of Graphite for Lithium-ion Batteries 3
60	<i>B. Lánová, H. Baltruschat</i> Methanol and CO Oxidation on Pt and Pt - colloid Catalysts for DMFC 4
61 - 66	<i>A. Havránek, K. Wippermann, K. Klafki</i> Investigation of the Relationship between the Structure and Performance of the DMFC thin Anodes
67 - 68	<i>J. Dvořák, T. Port, J. Vondrák, M. Sedlaříková</i> Hydrogen / oxygen fuel cells 4
69 - 70	<i>S. Moravcová, K. Bouzek, Z. Cílová</i> Synthesis and characterisation of conducting polymer film on Nafion membrane 4
71 - 74	<i>P. Holzhauser, K. Bouzek, M. Paidar</i> Permeability and morphology of polypyrrole films synthesized with various nucleophiles 4
75 - 78	<i>V. Novák, J. Vondrák</i> Bifunctional electrode for fuel cells 5
79 - 80	<i>J. Vince, U. Lavrenčič Štangar, A. Šurca Vuk, V. Jovanovski, B. Orel</i> ORMOSIL Proton Conducting Membranes for fuel Cell Application 4
81	<i>S. Kulcsar, G. Feher</i> New type of carbon electrode 5
82 - 84	<i>D. M. Constantin, E. M. Rus, G. Taralunga</i> Characterisation of sintered nickel electrodes for alkaline batteries 5
85 - 87	<i>D. M. Constantin, E. M. Rus, G. Taralunga</i> Improvement of lead-acid battery performance by addition of phosphoric acid in electrolyte 5
88 - 91	<i>Ying-Chan Hsu and Kuo-Chuan Ho</i> Improving spectroelectrochemical properties of polyviologen films through electropolymerization with
92 - 94	<i>P. Huták, P. Vorel</i> A traction drive with a battery and ultracapacitor 5
95 - 96	<i>I. Draskovic, S. Mentus, M. Pjescic</i> Electrode reactions on platinized ebonex powder in halogenide solutions 5
97 - 100	<i>J. Vaněk, J. Kazelle</i> Noise characteristic of solar cells under various illumination 5
101 - 106	<i>P. Bača, P. Křivák</i> Study of the pressure changes of positive and negative electrodes in lead-acid cells 5
107 - 108	<i>K. W. Leitner, M. Winter, J. O. Besenhard</i> Composit supercapacitor electrodes 5
109 - 111	<i>M. Kocian, J. Vondrák, M. Sedlaříková</i> Electrodes for the electrochemical supercapacitors 5
112 - 113	<i>K. Míka</i> Contemporary trends in research and development of lead-acid batteries 5
114 - 117	<i>J. Owen</i> Architecture of mesoporous electrode materials 5

118 - 120	<i>J. Reiter, J. Vondrák, F. Opekar, M. Sedlaříková, J. Velická, B. Klápště</i> New reference electrode based on PMMA polymer electrolytes 5
121 - 122	<i>K. Smékal, J. Mertl, M. Sedlaříková, J. Reiter, J. Vondrák</i> Research of the gel polymer electrolytes 5
123 - 124	<i>A. Surca Vuk, B. Orel, M. Liberatore, F. Decker</i> Ex-situ IR investigation of structural changes in sol-gel V2O5 films during charging/discharging 5
125 - 128	<i>J. Vondrák, M. Sedlaříková, J. Reiter, K. Velická, B. Klápště, J. Michálek</i> Gel polymer electrolytes new tool for non - aqueous electrochemistry 5
129 - 132	<i>Fang-Shuo Chang, Ying-Chan Hsu, and Kuo-Chuan Ho</i> Dye-Sensitized TiO2 Photoelectrochemical Cells Incorporating PMMA-based Gel Polymer Electrolytes 5
133	<i>F. Svegl, B. Orel</i> Layered LiNi _{1-x} Al _x O ₂ thin films as electrode materials for electrochromic devices 5
134 - 137	<i>V. Branzoi, D. Mateescu, A. Mateescu, F. Branzoi</i> Electrochemical Behaviour of Lead and Lead Alloys in Sulfuric Acid Solutions Subjected to Ultrasounds 5
138	<i>K. Bimová, S. Moravcová, K. Bouzek</i> Transport properties of poly (2,6 dimethyl 1,4 - phenyleneside) membranes at different degrees of sulphonation 5
139	<i>S. Moravcová, K. Bouzek, M. Paidar</i> New type of membrane electrode assembly based on nafion membrane and polypyrrole 5
140 - 144	<i>P. Křivák</i> Study of the effects of compression on the performance of positive electrodes in lead-acid cells 5
145 - 151	<i>M. Míka, L. Grič, J. Vondrák and B. Klápště</i> High Proton Conducting Antimony Phosphate Glass 5
152 - 154	<i>N. Furuya</i> Oxygen reduction on gas diffusion electrodes in alkaline solution 5
155 - 158	<i>A. Trifonova, J. O. Besenhard and M. Winter</i> Infl. of red. prepar. cond. on the morph. and electrochem. perform. of nano-sized Sn/SnSb intermet 3
159 - 160	<i>R. Ješe, V. Jovanovski, B. Orel, A. Šurca Vuk, U. Lavrenčič Štangar</i> Hybrid electrochromic devices comprising a nanocomposite semisolid state sol-gel redox electrolyte with triethylene glycol or sulfolane co-solvents 5

1	secondary batteries zinc-air
2	metal hydride systems
3	lithium and lithium-ion systems
4	fuel cells
5	other systems including conventional ones, supercapacitors and electrochromics
