

Contents

Preface

v

Part I: Phylogeography and Speciation

- 1. The Origin and Significance of Reproductive Isolation for Processes of Divergence** 3
Skúli Skúlason and Bjarni Kristófer Kristjánsson
- 2. The Formation of Landlocked Populations of Atlantic Salmon** 26
Jaakko Lumme, Mikhail Yu. Ozerov, Alexey E. Veselov and Craig R. Primmer
- 3. Homing and Timing of Reproduction** 44
Erik Petersson

Part II: Mating

- 4. Initiation, Prolongation, and Reactivation of the Sperm Motility** 63
Cosson Jacky, Lahnsteiner Franz, Prokopchuk Galina and Valdebenito Ivan Isler
- 5. The Brain-Pituitary-Gonad Axis in the Atlantic Salmon** 108
Efthimia Antonopoulou and Bertil Borg
- 6. Conflicting Demands and Fertilization Success** 124
Tomislav Vladić and Torbjörn Järvi
- 7. Mating Behavior, Mate Choice and Mating Success in Atlantic Salmon** 142
Erik Petersson and Torbjörn Järvi
- 8. Relationship between Size, Age and Maturity in Atlantic Salmon** 165
Tomislav Vladić and Erik Petersson

Part III: Evolutionary Processes

- 9. Effect of Sperm Competition on Effective Population Size in Atlantic Salmon** 185
Tomislav Vladić

10. Heritability of Fish Coloration	206
<i>Matthew Baranski</i>	
11. Modeling Anadromous Salmonid Life-history	221
<i>Marc Mangel and William H. Satterthwaite</i>	
12. Polygenetic Analysis of the Evolution of Semelparity	248
<i>Derek A. Roff</i>	

Part IV: Conservation Strategies

13. Growth-enhanced Transgenic Salmon	261
<i>L. Fredrik Sundström, Rosalind A. Leggatt and Robert H. Devlin</i>	
14. Captive Breeding and Conservation	273
<i>Jose Luis Hórreo Escandón</i>	
<i>Index</i>	283
