

Contents

Introduction	7
Theoretical part	11
1. List of symbols	17
2. Concentration and temperature dependence of binary aqueous solution densities	15
3. Estimation of ternary solution densities	18
4. Units used for expressing the solution composition	19
5. Treatment of the experimental data	21
Tables	23
Explanatory notes	25
Tables	27
References	325
Index	329
