

Chapter 3: Linux for Different Purposes
Setting up VirtualBox virtualization on CentOS 7
Setting up Docker on CentOS 7
Ensuring services' high availability
Setting up a web server using Apache-MYSQL-PHP
Setting up an FTP server
Chapter 7: Cloud Computing
An overview of cloud computing
Software as a Service
Platform as a Service (PaaS)
Infrastructure as a Service
Cloud computing services

Table of Contents

Preface	v
Chapter 1: Advanced User Management	
Managing users and groups from GUI and the command line	1
Quotas	3
Password aging	10
Setting the password policy	11
Configuring password aging and password length	12
Configuring password complexity and limiting reused password usage	13
Configuring login failures	14
Sudoers	16
visudo	16
Reference	20
Configuration Management	20
Summary	20
Chapter 2: Security	
Introducing SELinux	21
Installing SELinux	23
SELinux mode	24
SELinux policy	30
SELinux files and processes	36
Domain transition	43
SELinux users	47
Restricting access to su or sudo	51
Restricting permissions to run scripts	51
Restricting access to services	52
SELinux audit logs	53
SELinux troubleshooting	54
Summary	54

Chapter 2: Linux for Different Purposes	55
Configuring a gateway server	56
Configuring a NFS server	62
Configuring BIND as a DNS server	68
Configuring a web server using Apache-MySQL-PHP	75
Configuring an FTP server	90
Configuring Apache and FTP with OpenSSL	92
Configuring MySQL	95
Configuring PostgreSQL	95
Chapter 3: Mail Server with Postfix	97
Configuring and configuring of Postfix mail server	98
Using MySQL for virtual domains and users	103
Using a mail tool (Dovecot) to retrieve mails	108
Configuring the OpenLDAP Active Directory with Postfix	116
Configuring a mail server using SSL/TLS	119
Configuring a mail server using SASL	122
Configuring a mail server using Dovecot	123
Chapter 4: Monitoring and Logging	125
Monitoring and monitoring tools	125
Logstash	126
Logstash configuration	127
Filebeat	129
Filebeat configuration	130
Logstash configuration	132
Filebeat configuration	132
Using Nagios as a monitoring server	134
Setting up a logging server	144
Filebeat	145
Filebeat configuration	145
Configuring and configuring Syslog- <i>ng</i>	146
Filebeat	150
Filebeat configuration	151
Chapter 5: Virtualization	153
Introduction of virtualization on Linux	154
VirtualBox	157
VirtualBox configuration	158
VirtualBox on CentOS 7	159
VirtualBox for full virtualization on CentOS 7	164

Setting up OpenVZ virtualization on CentOS 7	169
Setting up VirtualBox virtualization on CentOS 7	173
Setting up Docker on CentOS 7	178
Establishing services' high availability using HAProxy	181
References	186
Summary	187
Chapter 7: Cloud Computing	189
An overview of cloud computing	189
Software as a Service	191
Platform as a Service (PaaS)	192
Infrastructure as a Service (IaaS)	193
Cloud computing services	194
Public cloud	195
Private cloud	195
Hybrid cloud	196
Introducing OpenStack	197
OpenStack compute	198
OpenStack networking	199
OpenStack storage	199
Components of OpenStack	200
Installing and configuring OpenStack	201
References	219
Summary	219
Chapter 8: Configuration Management	221
Introducing configuration management	221
Open source configuration management tools	223
Chef	223
SaltStack (Salt)	225
Ansible	228
Puppet	229
Installing and configuring Puppet	231
References	243
Summary	244
Chapter 9: Some Additional Tricks and Tools	245
SSH for remote connection	246
Securing SSH and the root login configuration	248
SSH key-based authentication	250
Installing and configuring SpamAssassin	251

Setting up the Clamav antivirus	252
Configuring Mytop for a MySQL database	257
Setting up Samba and NFS for file sharing	259
Introducing the Linux system and network monitoring tools	265
