

# COGAIN 2008 Papers Index

<b>Session 1: Overcoming Technical Challenges in Mobile and other Systems</b>	<b>5</b>
Off-the-Shelf Mobile Gaze Interaction.....	6
Fast and Easy Calibration for a Head-Mounted Eye Tracker .....	11
Magic Environment.....	15
AI Support for a Gaze Controlled Wheelchair .....	19
A Comparison of Pupil Centre Estimation Algorithms .....	23
<b>Session 2: Broadening Gaze-based Interaction Techniques.....</b>	<b>27</b>
User Performance of Gaze-Based Interaction with On-line Virtual Communities .....	28
Multimodal Gaze Interaction in 3D Virtual Environments .....	33
How Can Tiny Buttons Be Hit Using Gaze Only? .....	38
Gesturing with Gaze .....	43
NeoVisus: Gaze Driven Interface Components.....	47
<b>Session 3: Focusing on the User: Evaluating Needs and Solutions .....</b>	<b>52</b>
Evaluations of Interactive Guideboard with Gaze-communicative Stuffed-toy Robot.....	53
Gaze-Contingent Passwords at the ATM.....	59
Scrollable Keyboards for Eye Typing.....	63
The Use of Eye-Gaze Data in the Evaluation of Assistive Technology Software for Older People .....	67
A Case Study Describing Development of an Eye Gaze Setup for a Patient with 'Locked-In Syndrome' to Facilitate Communication, Environmental Control and Computer Access.....	72
<b>COGAIN 2008 Keynote by Dr. Anthony Hornof .....</b>	<b>76</b>
The Human-Technical Challenge of Developing Gaze-Controlled Devices.....	76
