

CONTENTS

Preface	v
1. Introduction: On Method in the Philosophy of Science	1
PART I: SCIENTIFIC METHOD	
2. Testability Today	27
3. Is Biology Methodologically Unique?	44
4. The Axiomatic Method in Physics	67
PART II: CONCEPTUAL MODELS	
5. Concepts of Model	91
6. Analogy, Simulation, Representation	114
7. Mathematical Modeling in Social Science	131
PART III: METAPHYSICS	
8. Is Scientific Metaphysics Possible?	145
9. The Metaphysics, Epistemology, and Methodology of Levels	160
10. How do Realism, Materialism and Dialectics Fare in Contemporary Science?	169
Bibliography	186
Name Index	192
Subject Index	194

NAME INDEX

- Ackoff, R. L. 128
 Alembert, J. le R. d' 70
 Alker, H. R. 131
 Aquinas, Thomas 146
 Arbib, M. A. 154
 Aris, R. 152
 Aristotle 146
 Ashby, W. R. 34

 Berger, J. 131
 Bergson, H. 65
 Berkeley, G. 70
 Black, M. 109, 126
 Bloch, F. 97, 98
 Bolzano, B. 129
 Braithwaite, R. B. 72, 73, 74
 Brans, C. 108
 Bridgman, P. W. 70, 71
 Brush, S. 93
 Bunge, M. 29, 31, 33, 38, 40, 41, 71, 72,
 80, 81, 96, 102, 108, 155, 174
 Bush, R. R. 95

 Calvin, M. 175
 Campbell, N. 69
 Carathéodory, C. 67, 70
 Carnap, R. 72, 73, 74
 Coleman, J. 131
 Commoner, B. 44

 Desoer, C. A. 102
 Dicke, R. H. 108
 Dingler, H. 70
 Duhem, P. 71
 Dyson, F. J. 94

 Eccles, J. C. 174
 Eddington, A. S. 70, 85
 Elsasser, W. 44
 Edelen, D. G. B. 36, 67
 Ehrenfest, P. and T. 32

 Einstein, A. 4

 Feigl, H. 72
 Feinberg, E. L. 30
 Fisher, R. A. 151
 Forrester, J. 141
 Fox, S. 175

- Uhlenbeck, G. E. 94
Urey, H. C. 175
- Vol'kenshtein, M. 94
Voltaire, F. M. A. de 8
- Weiss, P. A. 44
Wightman, A. S. 36, 67
Williams, D. 159
Williams, G. C. 161
Wittgenstein, L. 27
- Zadeh, L. A. 102

SUBJECT INDEX

Analog 109, 110, 118, 133, 134

Analogy 114–118, 122–128

– bijective 115

– contagious 116

– formal 114

– homomorphic 115

– injective 115

– plain 115

– substantial 114

Analysis

– conceptual 60, 61

– empirical 60

– historical-philosophical 6–7

– isolated item 8–9

– ontic 151–154

– preface 4–5

– semantic 9–11

– systematic 9–11

– textbook 5–6

Assembly theory 147–151

Automata theory 35, 154–157

Axiomatics 67–87

Axiomatization 10, 18, 80, 155

Behaviorism 178

Black box 101–105

Black-boxism 104

Chemistry 151–152

Completeness

– deductive 86

– primitive 84–85

Confirmability 31, 33

Consistency 85

Copenhagen interpretation 170, 176–177

Correspondence rule 69, 72–74. *See also*

 Semantic assumption

Cybernetics 34, 37

Definition, operational 70

Designation rule 68–69

Diagram 109–110

Dialectics 179–183

Double vocabulary view 73–76

$E=mc^2$ 8

Emergence 160–166

Epistemology 163–165

Evolution 51, 56–57, 161

Explanation 61, 127

– of variables 139

– statistical 13–15

Extension 82

Field theory

– axiomatic 36

– general 35–36

– electromagnetic 80–81

Formalism

– mathematical 112

– semantic 68–69

Geisteswissenschaften 131

Grey box 102–104

Group 148

Grue 11–13

Hilbert's $\in$ operator 73

History

– in natural science 49–51

– of science 6–7

Hypothesis 17–18

– *ad hoc* 28–30

– explanatory 136

– metascientific 17–18

– philosophical 184

– scientific 30–31

Individual 149–150

Individuality of the organism 55

Induction 17

Interpretation 8, 16–17, 72

- factual 83-84
- hypothesis 77. *See also* Semantic assumption
- mathematical 82-83
- Isomorphism 115, 124-125

Juxtaposition 148-150

- Law 59, 162, 166
- biological 54-57
- statistical 13-14, 57
- Level 62, 153, 160-168
- structure 160, 173

Magnitude 79

Materialism

- dynamical 172-178, 184
- logical 185

Mathematization 58-60

Meaning 8, 68-85

- empirical 76, 78
- factual 76

Measurement 75

Mechanism 103-105, 108-109

Metaphor 126-127

Metaphysics 39-41, 145 ff, 162-163

- exact 145-146
- plain 145-146
- scientific 145-159

Method 1, 18

- comparative 51-52
- philosophical 1, 15-18, 184-185
- scientific 18, 45, 65-66

Methodology 165-166, 171

Model

- behavior 102-103. *See also* Black Box
- build-up 103. *See also* Mechanism
- deterministic 137-139
- mathematical 59. *See also* Model, theoretical
- one-dimensional 93-95
- object 91-97
- of an abstract theory 82-83, 110-111
- stochastic 98-99, 139-141
- theoretical 38, 91, 97-100
- visual 133.

Modeling relation 95-96. *See also* Representation

Monism 162

Monoid 148, 156

Negation, dialectical 180

Observability 63-64

Observational concept 69-75

Oedipus complex 27

Ontology. *See* Metaphysics

Operationalism 70-73

Opposite 179-183

Phenomenalism 11-13, 104

Philosophy of science

- amateur 21
- apologetic 2
- *a priori* 2-4
- artificial 22
- fashionable 21-22
- scholastic 22-23
- Pluralism, integrated 162-165, 184
- Prediction 56-57
- Primitive concept 81
- Probability 14-15, 22, 141, 147
- Problem 16
- Proxy 120-121
- Psychology 175, 177-178

Quark 29-30

Quasimodel 113

Realism

- critical 169-172, 183-184
- semantic 76-79
- Reduction 61, 66
- Reductionism 165, 168
- Reference class 79-80
- Refutability 27, 37, 157
- Representation, semantic 69, 80, 119-123, 128
- Ring 148-149

Semantic assumption 76-82, 96. *See also* Correspondence rule

Semantics 16, 38-39

Sense 77. *See also* Meaning

Simulation 118-119, 128-129

S-matrix theory 71

Sociology, mathematical 131-142

Subsidiary assumption 106

Superposition 148–150

Synthesis

– of life 62–63, 175

– ontic 151–154

Teleology 45–49

Teleonomy 45–49

Test 72

Testability 30–32

– conceptual 38–41

– condition 70

– criterion 42

– empirical 35, 107–108

Theoretical entity 63–64

Theory

– accommodating 33

– black box 32–33

– generic 39, 42, 105–107

– metaphysical 146–147, 157–158

– metascientific 18

– specific 32, 38, 41, 105–107

Thing-in-itself 169–170

Training of philosophers 19–20

Truth condition 70

Uniqueness 53–54

Universality 55

Unobservable 64–65

Verifiability doctrine of meaning 74.

Vienna Circle 27, 41, 42, 74

Vitalism 44–45, 65

World 149
