

Contents

<u>Preface</u>	3
<u>5. Superstructure</u>	4
<u>5.1 General Configuration</u>	4
<u>5.2 Cradle</u>	8
<u>5.3 Saddle</u>	10
<u>6. Structure of the Weapon Basis</u>	16
<u>6.1 Task and Types of Weapon Basis</u>	16
<u>6.2 Stability of the Gun</u>	16
<u>6.3 Lower Carriage of Towed Field Guns</u>	21
<u>6.4 Self-propelled Mounting</u>	26
<u>7. Laying Arrangement</u>	27
<u>7.1 Basic Rrequirements to the Laying Arrangement</u>	28
<u>7.2 Laying Mechanisms</u>	29
<u>7.2.1 Elevating Mechanisms</u>	30
<u>7.2.2 Traversing Mechanisms</u>	33
<u>7.3 Drive of Laying Mechanisms</u>	34
<u>7.3.1 Moment and Power Load of the Drive</u>	35
<u>7.3.2 Hand Drive</u>	36
<u>7.3.3 Motor Drive</u>	36
<u>7.4 Control of the Laying Arrangement Function</u>	38
<u>7.5 Stabilization of the Gun Aiming</u>	40
<u>7.5.1 Stabilization System with a Dependent Aiming Line</u>	41
<u>7.5.2 Stabilization System with an Independent Aiming Line</u>	42
<u>8. Equilibrators</u>	44
<u>8.1 Purpose of Equilibrators</u>	44
<u>8.2 Spring Equilibrators</u>	47
<u>8.3 Pneumatic Equilibrators</u>	48

<u>9. Loading Systems of Guns</u>	52
<u>9.1 Main Parts of Guns Loading Systems</u>	53
<u>9.2 Storage System</u>	56
<u>9.3 Feeding Devices</u>	57
<u>9.4 Ramming Devices</u>	60
