SECTION 1.....	7
INTRODUCTION TO WEAPON SIGHTS.....	7
1.1 SIGHTS (DEVICES).....	8
a) Definition.....	8
b) Various forms of sights (Classification of sights).....	9
1.2 SIGHTING PROCESS.....	10
a) Firing data.....	10
b) Firing situations.....	10
c) Firing conditions.....	11
d) Methods of aiming.....	12
1.3 DIRECT AIMING.....	12
a) Direct fire.....	12
b) Direct aiming process.....	14
c) Aiming process in case of firing from fixed position at fixed target.....	14
d) Aiming process in case of firing from stationary (fixed) position at moving target.....	16
e) Aiming process in case of firing from moving position at stationary (fixed) target.....	16
f) Aiming process in case of firing from moving position at moving target.....	19
g) Basic requirements to direct sights construction.....	20
1.4 INDIRECT AIMING.....	20
a) Indirect fire.....	20
b) Indirect aiming methods.....	23
c) Aiming points.....	24
d) Indirect sights particularities.....	24
1.5 DISPERSION PATTERN.....	25
a) Dispersion and accuracy.....	25
b) Dispersion pattern.....	26
1.6 BORESIGHTING.....	27
Fig.1.5 Laser boresights.....	28
1.7 PROBABILITY ANALYSIS OF OUTCOMES OF THE DIRECT FIRE.....	29
a) Introduction to the probability analysis.....	29
b) Conclusions.....	36
c) Exact calculation of the probability outcomes of the direct fire which are free from aiming error.....	36
1.8 AFFECTS OF INCORRECT AIMING ON OUTCOMES OF THE DIRECT FIRE.....	40
a) Probability of the direct hit of the rectangular area with sides that are parallel with the main axes of the elliptical dispersion pattern.....	40
b) Probability of the direct hit of the circular area with center which is shifted with respect to the center of the circular dispersion pattern.....	43
1.9 INFLUENCE OF HUMAN EYE ON ACCURACY OF THE AIMING.....	45
a) Optical power (dioptric power or refractive power).....	46
b) Accommodation.....	47
c) Adaptation.....	47
SECTION 2	49

IRON SIGHTS.....	49
2.1 INTRODUCTION.....	50
a) Definition.....	50
b) Structure of the iron sight.....	50
c) Principle of operation.....	50
2.2 TYPES OF IRON SIGHTS.....	51
a) Open sights.....	51
b) Aperture sights (Peep sights).....	53
d) Target aperture sights.....	54
2.3 IRON SIGHTS ENHANCEMENTS.....	55
a) Glare reduction.....	55
b) Adjustable sights vs. fixed sights.....	56
c) Contrast enhancements.....	56
SECTION 3.....	59
TELESCOPIC SIGHTS.....	59
3.1 INTRODUCTION.....	61
3.2 COMPONENT UNITS OF TELESCOPIC SIGHTS.....	62
a) Special components.....	62
b) Common telescopic components.....	62
c) Coatings.....	63
3.3 RETICLES (CROSSHAIRS).....	64
a) General view.....	64
b) Shapes of reticles.....	64
c) Types of reticles.....	64
d) Reticle focal plane.....	66
e) Stadiametric reticle.....	66
f) Reticle illumination.....	68
3.4 PARALLAX COMPENSATION.....	68
3.5 MILITARY USE.....	69
SECTION 4	71
NIGHT VISION WEAPON SIGHTS.....	71
4.1 GENERAL VIEW	73
a) Definition of night vision sight.....	73
b) Utilized spectral ranges (Atmospheric windows of infrared spectral ranges).....	73
c) Types of imaging systems.....	73
d) Methods of operating.....	74
e) Sources of image quality degradation.....	75
4.2 Night vision sights that work in the near-infrared spectral band.....	76
a) Passive night vision sights.....	76
b) Active night vision sights.....	77
4.3 Basic elements of image intensifying night vision sights	77

a) Basic elements of active night vision sights.....	77
b) Basic elements of passive night vision sights.....	78
c) Electronic telescope.....	78
d) Source of infrared radiation.....	79
4.4 Particularities of the image intensifying night vision sights.....	79
4.5 Problems connected with monocular construction of the night vision sights.....	80
4.6 Night vision sights that work in far infrared wavelengths (beyond 3 micrometers).....	80
a) Introduction.....	80
b) Active and passive targets.....	81
c) Basic part of thermal imaging night vision sights (Thermal camera).....	81
d) Thermal camera with scanning system.....	82
e) Non-scanning thermal camera.....	83
f) Advantages of thermal imaging night vision sights.....	83
g) Disadvantages of thermal imaging night vision sights (Training of operators of thermal cameras).....	83
4.7 Particularities of the thermal imaging night vision sights (Cooling problems).....	84
4.8 Distance of target recognition	85
SECTION 5.....	87
LASER SIGHTS.....	87
5.1 LASER SIGHTS.....	89
FIG. 5.2 INTERNAL AND EXTERNAL LASER SIGNY FOR PISTOL.....	90
APPENDIXES.....	91
a) Graph of error function.....	91
b) Tables of error function values.....	91
REFERENCES.....	99
