Preface	ix
Introduction	xi
1 Preliminaries	1
2 Locally Presentable Categories	7
1.A Locally Finitely Presentable Categories	8
1.B Locally Presentable Categories	18
1.C Representation Theorem	27
1.D Properties of Locally Presentable Categories	45
1.E Locally Generated Categories	53
Exercises	59
Historical Remarks	65
2 Accessible Categories	67
2.A Accessible Categories	68
2.B Accessible Functors	78
2.C Accessible Categories as Free Cocompletions	81
2.D Pure Subobjects	84
2.E Properties of Accessible Categories	95
2.F Accessible Categories and Sketches	105
2.G Accessible Embeddings Into the Category of Graphs	111
2.H Limits of Accessible Categories	115
Exercises	125
Historical Remarks	128
3 Algebraic Categories	131
3.A Finitary Varieties	132
3.B Finitary Quasivarieties	151

3.C	Infinitary Varieties and Quasivarieties	158
3.D	Essentially Algebraic Categories	161
	Exercises	169
	Historical Remarks	171
4	Injectivity Classes	173
4.A	Weakly Locally Presentable Categories	174
4.B	A Characterization of Accessible Categories	184
4.C	Locally Multipresentable Categories	187
	Exercises	196
	Historical Remarks	198
5	Categories of Models	199
5.A	Finitary Logic	199
5.B	Infinitary Logic	221
	Exercises	237
	Historical Remarks	238
6	Vopěnka's Principle	241
6.A	Vopěnka's Principle	242
6.B	A Characterization of Locally Presentable Categories	248
6.C	A Characterization of Accessible and Axiomatizable Categories	254
6.D	A Characterization of Reflective Subcategories	256
6.E	A Characterization of Accessible Functors	264
6.F	Colimit-dense Subcategories	268
	Exercises	277
	Historical Remarks	278
	Appendix: Large Cardinals	281
	Historical Remarks	294
	Open Problems	295
	Bibliography	299
	List of Symbols	309
	Index	313
