

## CONTENTS

Preface	v
I · Introduction	3
II · Types of Knowledge and of Knowledge Production	13
III · Knowledge-Producing Industries and Occupations	44
IV · Education	51
V · Research and Development	145
VI · The Media of Communication	207
VII · Information Machines	295
VIII · Information Services	323
IX · Total Production of Knowledge and the National Product	348
X · Knowledge Production and Occupational Structure	377
Index	401

## ANALYTICAL TABLE OF CONTENTS

Investment in Knowledge and Investment for Knowledge	37
Knowledge as Intermediate Product	39
Knowledge-Producing Personnel in Business Firms	41
Instruments for the Production of Knowledge	41
Who Pays for It and How?	42
 III • KNOWLEDGE-PRODUCING INDUSTRIES AND OCCUPATIONS	 44
The Knowledge Industry	44
What We Don't Know about the Knowledge Industry	44
The Type of Product or the Type of Labor	45
Industries and Occupations	46
"Complete" Division of Labor	46
Production for Inter-Industry Trade and Intra-Industry Use	47
The Major Subdivisions of the Industry	48
Firms, Industries, and the Whole Economy	48
The Occupational Structure of Single Firms	48
 IV • EDUCATION	 51
Locus and Modus Operandi	51
Education in the Home	52
Statistics: No Expenditures, No Product	52
Income Foregone by Child-Rearing Mothers	54
Training on the Job	57
Learning on the Job	57
Training Programs Provided by Business Firms	59
Informal Training on the Job	60
Labor Turnover and the Cost of Training Newly Hired Personnel	61
A Theoretical Connection between Training Cost and Learning Cost	62
Investment or Current Cost?	63
Education in the Church	64
Religious Instruction versus Church-Affiliated Schools	64
Statistical Estimates of Current Expenses	65
Church Property and New Construction	67
Education in the Armed Services	68
Basic Training and Special Training Programs	68
The Expenditures for Military Training	69
Other Knowledge-Production by the Armed Services	70

# ANALYTICAL TABLE OF CONTENTS

I • INTRODUCTION	3
The Economist as a Student of Knowledge-Production	3
Knowledge as a Datum in Economic Analysis	3
Knowledge as a Product, a Function of Resource Allocation	5
Terminological Proposals	7
"Production and Distribution"	7
"Knowledge and Information"	8
The Task Before Us	9
Some of the Reasons for Our Curiosity	9
Plan of this Study	10
II • TYPES OF KNOWLEDGE AND OF KNOWLEDGE PRODUCTION	13
The Known and the Knowing	13
The Double Meaning	13
Knowledge-Production	14
Information and Knowledge	14
Classifications of Knowledge	15
Persuasive Definitions of Knowledge	15
Basic and Applied Knowledge	16
Scientific and Historical; General-Abstract and Particular-Concrete; Analytical and Empirical	17
Knowledge of Enduring and of Transitory Interest	18
Max Scheler's Classification	20
Five Classes of Knowledge	21
Knowledge and Truth	22
Intellectual, Pastime, and Unwanted Knowledge	25
Response to Free Consumers' Choice and Political Decision	27
Subjectively New and Socially New Knowledge	28
Knowledge as Product—Consumption or Investment—or as Cost	29
Methods of Producing Knowledge	30
Techniques and Intents of Knowledge-Production	30
Types of Individual Knowledge-Producers	31
Knowledge-Receiving as Knowledge-Production	33
Knowledge as Consumption, Investment, or Cost	35
Production: The Use of Valuable Input for Valuable Output	36

# ANALYTICAL TABLE OF CONTENTS

Three Alternative Reform Plans	140
A Few Details	141
An English Report: "15 to 18"	142
<b>V • RESEARCH AND DEVELOPMENT</b>	<b>145</b>
Types of Research and Development Work	145
Basic Research	146
Applied Research	147
Development	149
Tests and Evaluations	151
Expenditures for Research and Development	151
Basic Research	151
Applied Research	153
Development	154
The Growth of Total Expenditures	155
Scientists and Engineers in Research and Development	159
Inventive Effort and Patent Protection	161
Discovery and Invention	162
Technological Inventions and Improvements	164
Patents of Invention and Property in Ideas	166
Large Corporations and Employed Inventors	168
Small Firms and Independent Inventors	170
End of Growth in Patented Inventions?	170
Why the Relative Decline?	174
Patents and Research Expenditures	175
Research, Company Size, and Competition	176
Research and Company Size	177
Research and Restricted Competition	177
The Flow of Ideas in the Inventive Process	178
The Term "Innovation"	179
Feedbacks	179
The Flow Chart	182
Research as National Product	183
Resource Allocation	183
National-Income Statistics	184
Conclusion	187
The Productivity of Research	187
R & D as an Investment	188
Average versus Marginal Return	189
The Social Cost of Additional Research	191

# ANALYTICAL TABLE OF CONTENTS

Elementary and Secondary Education	70
Expenditures for Elementary and Secondary School	71
The Increase in Enrollment	74
Analysis of the Expenditure Increase	76
Higher Education	77
Enrollment and Expenditures	77
Faculty Salaries	79
Student-Faculty Ratio	80
Other Expenditures	81
Financing Higher Education	84
Public and Private Institutions	86
Academic Degrees	90
Neglected Cost Items	92
Earnings Foregone	92
Potential Incomes	94
The Estimates	95
Implicit Rents of Buildings and Grounds	98
The Cost of Tax Exemptions	101
Transportation, Books, and Clothing	102
The Total Cost of Education	103
The Chosen Years: 1956 and 1958	103
Adjustments of GNP	106
The Productivity of Education	107
Investment or Consumption?	108
The Returns on Investment in Education	110
The Rates of Return	112
Social versus Private Benefits	115
Measures against Underinvestment in Education	117
Average versus Marginal Returns	120
Increased versus Improved Investment	120
Efficiency in Education	121
The Stock of Knowledge	122
Production and Reproduction of Knowledge by the Schools	124
No Measurement of Output or Effect of Education?	125
The Productive Contribution of Prolonged Education	127
International Comparisons of Achievement	130
International Comparisons of Curricula	131
Acceleration of Intellectual Growth	133
A Proposal for School Reform	134
The Educational Goals	135
The Economic Argument	136
The Premises	137

# ANALYTICAL TABLE OF CONTENTS

Industrial Research versus Teaching Future Researchers	192
The Supply of Scientists and Engineers	193
The Short and the Long Run	197
Basic Research and Higher Education	199
Basic Research and Higher Education Are Complementary	200
Past Neglect of Basic Research	201
The Productivity of Basic Research	204
Competing Fields of Knowledge	205
VI • THE MEDIA OF COMMUNICATION	207
Printed Matter	207
Books and Pamphlets	208
The Types of Knowledge Conveyed by Books	213
Periodicals	218
The Types of Knowledge Conveyed by Periodicals	220
Newspapers	222
The Types of Knowledge Conveyed by Newspapers	225
All the News That's Fit to Print?	228
Expenditures for Periodicals and Newspapers	230
Other Printed Matter	232
All Printing and Publishing	235
Photography and Phonography	236
Photography	237
Phonography	238
The Types of Knowledge Conveyed by Phonograph	241
Stage and Cinema	241
Stage and Podium, Plays and Concerts	241
Government Subsidies for the Arts?	244
Motion Pictures	246
Exports and Imports of Films	248
Nontheatrical Motion Pictures	249
Broadcasting	250
Radio and Television	250
The Types of Knowledge Conveyed by Radio	253
The Types of Knowledge Conveyed by Television	255
Control over Broadcasting Programs	258
Educational Broadcasting	260
Advertising and Public Relations	265
Advertising Expenditures	265
The Advertisers	268
Public Relations	270
The Types of Knowledge Produced by Advertising	271

## ANALYTICAL TABLE OF CONTENTS

Selling Cost, Subsidized Product, By-Product	272
Net Expenditures	274
Telephone, Telegraph, and Postal Service	275
Telephone	276
The Types of Knowledge Conveyed by Telephone	280
Telegraph	282
Postal Service	283
Telephone, Telegraph, and First-Class Mail Compared	286
Conventions	291
The Associations and Their Conventions	291
The Cost of Conventions	293
 VII • INFORMATION MACHINES	 295
Information Machines for Knowledge Industries	295
Information Machines in Education	295
Information Machines in Research and Development	296
Information Machines in Communications Industries	297
Signaling Devices	299
Instruments for Measurement, Observation, and Control	299
The Inclusion of Control Devices	299
Observation, Measurement, and Recording	300
The Production of Measuring and Controlling	
Instruments	302
Office Information Machines	304
Census Data on Office Machines	304
Growth Items	306
Electronic Computers	306
The Mysteries of the Computing Machine	307
Types of Electronic Computers	307
Programming in "Computer Language"	309
Electronic Data Processing in Government	311
Electronic Data Processing in Business	312
Four Methods of Serving Business	314
Machine Talking to Machine	315
Process Control	316
History and Growth of the Computer Industry	316
Economic Effects of Computing Machines	321
 VIII • INFORMATION SERVICES	 323
The Wide Concept of Knowledge Industries	323
Degrees of Specialization	323
Types of Information	324

# ANALYTICAL TABLE OF CONTENTS

Professional Knowledge Services	325
Professional Services: Knowledge for Sale	326
Legal Services	328
Engineering and Architectural Services	329
Accounting and Auditing	329
Medical Services	330
Information and Financial Services as Joint Products	330
Check-Deposit Banking	331
Security and Commodity Brokers, Dealers, and Exchanges	334
Other Financial Services, Insurance Carriers and Agents	337
Real Estate	340
The Intelligence Service of Wholesale Traders	340
Types of Wholesale Trade	341
Miscellaneous Service Industries	341
Knowledge Received	341
Knowledge Transmitted	342
Knowledge Going Both Ways	342
Government as Knowledge Industry	343
Breakdown by Function	344
Investment, Consumption, or Cost?	346
 IX • TOTAL PRODUCTION OF KNOWLEDGE AND THE NATIONAL PRODUCT	 348
Differences in Techniques and Organization	348
Degrees of Change in the Form and Contents of Information	348
The Organization of the Industries	350
Knowledge Production 1958, By Industry	352
The Columns of the Table	353
Commentaries on Expenditures for Education, Research and Development	353
Commentaries on Expenditures on Media of Communication, Information Machines, and Information Services	359
The Total and Its Chief Components	360
Comparison with Gross National Product	361
Knowledge Production and Economic Growth	362
Complex Interrelations	362
Knowledge-Production for Consumption	363
Knowledge-Production for Current Production of Other Things	364

# ANALYTICAL TABLE OF CONTENTS

Knowledge-Production as an Investment for Future Returns	365
Knowledge-Production as Social Overhead Cost	365
The Growth Rates of Knowledge Industries	366
Not Every Increase Constitutes Growth	367
Increased Money Values without Price Deflators	367
Growth in Expenditures for Knowledge-Production	368
Reservations and Speculations	374
 X • KNOWLEDGE PRODUCTION AND OCCUPATIONAL STRUCTURE	 377
Technology, Demand, and Occupational Structure	377
Inevitable, Impossible, and Probable Changes	377
Mechanization and Automation	379
The Changes in the Occupational Structure	380
White-Collar, Manual and Service, and Farm Workers	381
Knowledge-Producing and Not Knowledge-Producing Workers	382
Different Growth Rates Within the Class	387
The Income Shares of Knowledge-Producing Occupations	388
The Incomes in Knowledge-Producing Occupations	389
The Shares in Total Income	392
Different Changes of Income Shares within The Class	394
Some Implications	395
The Facts and the Trends	396
Interpretation	396
Implications	397
Industries and Occupations: Ratios and Growth Rates	398
Ratios to Total Product	398
Growth Rates	399
Statistical Accuracy and General Conclusions	400
 Index	 401
