

Table of Contents

1.Introduction.....	7
2.Tectonic units of the Vepor Mts. area.....	8
3.Short overview of Alpine tectonic evolution of the Veporic Unit.....	13
4.Magmatic and tectono-metamorphic record in the Veporic Unit.....	13
4.1.Ordovician magmatism.....	13
4.2.Variscan orogeny.....	13
4.3.Permian continental rifting.....	14
4.4.Eo-Alpine orogenic event – Early Cretaceous nappe stacking.....	14
4.5.Cretaceous to Eocene exhumation/denudation of the internal part of orogenic wedge.....	15
5.Synorogenic sedimentary record.....	19
5.1.Early Cretaceous nappe stacking (ca 140–110 Ma).....	19
5.2.Mid-Cretaceous crustal thickening (ca 110–90 Ma).....	21
5.3.Late Cretaceous–early Paleocene extensional collapse and exhumation (ca 90–60 Ma).....	22
6.Early-Alpine structural and metamorphic evolution.....	23
6.1.Furmanec Valley (Tisovec town) – Locality No. 1.....	23
6.2.Malá Borová (Klenovec village) – Locality No. 2.....	25
6.3.Temničný potok (Klenovec village) – Locality No. 3.....	27
6.4.Hačava-Skálie (Hnúšť'a town) – Locality No. 4.....	29
6.5.Muránska Lehota – Locality No. 5.....	32
7.Late Cretaceous to Cenozoic tectonic evolution.....	34
7.1.Slávča Valley (Tisovec town) – Locality No. 6.....	34
7.2.Plačková Valley (Tisovec town) – Locality No. 7.....	37
7.3.Muráň – Locality No. 8.....	40
7.4.Besník Pass (Telgárt village) – Locality No. 9.....	43
7.5.Dobšinská Ládová Jaskyňa settlement (Stratená village) – Locality No. 10.....	45
8.Summary.....	47
References.....	48
