

Table of Contents

Márton E.: Adriatic vs. African APW as the paleomagnetic reference system for ALCAPA and the deformed margins of Adria		5
Gawlick H.-J.: Triassic-Jurassic tectonostratigraphy of the Circum-Pannonian orogens		8
Froitzheim N.: Cretaceous orogeny in the Eastern Alps – Collision or intracontinental subduction?		13
Barmuta J. & Golonka J.: The plate tectonic scenario for the Bohemian Massif evolution during Silurian – Carboniferous times		16
Barmuta J., Golonka J. & Barmuta M.: A plate tectonic and paleofacies model of the Eastern European Platform in Poland – basic concepts		17
Beke B., Fodor L., Csizmeg J., Szőcs E. & Hips K.: Constraining p(z)-T-t path in brittle deformation field: a complex study using deformation bands, diagenesis and subsidence modelling		18
Bertrand A. & Rosenberg C.: Late exhumation mechanisms of the core of the Eastern Alps inferred from fault slip analysis and fission track dating in the Tauern Window (Eastern Alps)		19
Broska I. & Kubiš M.: Specialised S-type granites in Gemeric Unit: magmatic evolution and tectonic framework of their origin		20
Bukovská Z., Jeřábek P. & F.G. Morales L.F.G.: Major softening at brittle-ductile transition due to interplay between chemical and deformation processes: An insight from evolution of shear bands in the South Armorican Shear Zone		21
Cieszkowski M., Kysiak T. & Szczęch M.: On a structure of the “Osielec Skiba” in the Rača Subunit of the Magura Nappe (West Outer Carpathians, Poland)		22
Collett S., Štípská P., Marciniak G., Kusbach V. & Schulmann K.: Phase equilibria modelling and micro-structural analysis of mafic eclogites from the Krušné hory Mountains: Insights into subduction and exhumation dynamics		23
Csibri T. & Plašienka D.: A new view on the geological structure of the westernmost part of the Pieniny Klippen Belt		24
Csicsek Á.L., Fodor L. & Kövér S.: Eoalpine versus Miocene contractional deformation in the Transdanubian Range Unit: geometric connections between fold-propagation fold, high-angle breakthrough thrust and lateral ramps		25
Černý J., Ramírez-Herrera M.-T., Bógalo M.F., Goguitchaichvili A., Castillo-Aja R. & Morales J.: Magnetic record of inundation deposits along Mexican Pacific coast		26
Daňková L. & Melichar R.: Tectonics of Přebyslav mylonitic zone		27
Demko R. & Hraško L.: Hercynian metabasites in SW part of Veporicum, Kohút zone (range, position, petrology and ore-bearing significance)		28
Faryad S.W., Kachlík V., Sláma J. & Jedlička R.: Mafic-ultramafic intrusions as surface expression of heat source for Variscan granulite-amphibolite facies metamorphism in the Moldanubian Zone		29
Fodor L., Vrabec M., Héja G., Csizmeg J., Jelen B., Kövér S., Koroknai B., Németh A., Rifelj H., Trajanova M. & Vrabec M.: Structural evolution of the East Alpine-Pannonian junction area: from nappe stacking to extension		30
Goleń M. & Szczepański J.: Stress and strain-rate estimates for mica schists from the Kamieniec Metamorphic Belt (NE part of the Bohemian Massif) – preliminary results		31
Golonka J., Pietsch K., Marzec P., Kasperska M., Dec J., Cichostępski K., Lasocki S. & Orlecka-Sikora B.: Deep structure of the Pieniny Klippen Belt in Poland		32
Habibou E.H., Ouardi H.E. & Eric Mercier E.: Lateral ramp-related folding in the frontal part of the Rif cordillera (Morocco)		33
Hanzl P., Krejčí Z., Altanbaatar B., Lexa O., Buriánek D., Janoušek V., Schulmann K., Yiang Y. & Hrdličková K.: Geological map of the Sagsai Pluton at the scale 1:50,000 in the SE Mongolian Altai		33
Héja G., Csizmeg J., Kövér S. & Fodor L.: The effect of Late Triassic extension on Cretaceous thrusting in the Keszthely Hills and northern Zala Basin, West Hungary		35
Hrouda F., Putiš M. & Németh Z.: Magnetic fabric overprints in metamafic and metaultramafic rocks from the Veporic Unit, Western Carpathians: A detailed study		36

Ivan P.: From the Ordovician convergence to the Permian relaxation: An attempt for the plate tectonic model of the Variscan orogeny in the Western Carpathians		37
Janoušek V., Moyen J.-F., Erban V., Farrow C. & Martin H.: Interpretation of geochemical data from magmatic rock suites using the R language – the current state of play		38
Jastrzębski M., Machowiak K. & Krzemińska E.: Geochronology and geochemistry of the Staré Město granitoids, the Sudetes		39
Jašarová P., Racek M., Jeřábek P., Holub F.V. & Larikova T.L.: Metamorphic reactions and textural changes in coronitic metagabbros from the Teplá crystalline and Mariánské Lázně complexes, Bohemian Massif		40
Jedlička R. & Faryad S.W.: Preservation of multiple prograde metamorphism by major and trace elements zoning in garnet: case study of UHP granulites from the Moldanubian Zone (Bohemian Massif)		41
Juráček J.: The role of planar structures on the evaluation of fluvial valleys		42
Kania M.: Ultramicroscale tectonic structures in the Western Tatra Mts. crystalline core rocks – preliminary observations		43
Kepiński M.: Structural evidence for the origin of sigmoid within Jaśliska Area (Outer Carpathians, Beskid Niski Mts.)		44
Knížek M., Lakotová K. & Kössler M.: Some structural geology findings from the construction railway corridor IV (Moldanubian, Bohemian Massif)		45
Kohút M.: From subduction to collision: Genesis of the principal Variscan granitic rocks in the Western Carpathians		46
Kolářová K., Černý J. & Melichar R.: Magnetic fabrics in volcanic rocks of Křivoklát-Rokycany Complex, Czech Republic		47
Kováčik M., Kohút M., Sentpetery M., Olšovský M., Havrila M., Filo I., Maglay J., Nagy A., Laurinc D., Šimon L. & Baráth I.: New results from geological mapping in the Žiar Mts. (Central Western Carpathians)		48
Kubínová Š., Faryad S.W. & Verner K.: Petrology and Geochemistry of ultrapotassic dykes from Nihošovice, Moldanubicum Zone (Bohemian Massif)		49
Kufraša M. & Krzywiec P.: Structure of the Kock Fault Zone (KFZ) as a result of interference of different folding mechanisms		50
Kulhánek J., Faryad S.W. & Jedlička R.: Reconstruction of PT path in micashist from the Krušné hory Mountains		51
Lačný A., Józsa Š., Ledvényiová L. & Ružička P.: Triassic microfauna from the clasts of carbonate – silicite breccias found near Bohúňovo (Slovak Karst, Western Carpathians)		52
Larikova T.: Reaction (corona and symplectite) textures formation in the Koralpe and Saualpe eclogites, E. Alps, Austria		53
Madzin J., Méres Š. & Plašienka D.: Provenance of the Upper Cretaceous-Lower Eocene Jarmuta-Proč Formation in the Pieniny Klippen Belt		54
Mareček L. & Melichar R.: Magnetic fabrics of the Brno Massif		55
Marhanský T., Melichar R. & Černý J.: Variscan thrust tectonics in the NW part of Moravian Karst, Czech Republic		56
Márton E., Bučová J., Madzin J., Grabowski J., Plašienka D. & Aubrecht R.: Paleomagnetic study of Permian and Triassic rocks from the Hronic nappes, Western Carpathians		57
Márton E., Tokarski A.K., Pipík R., Vojtko R., Králíková S. & Świerczewska A.: Paleomagnetic and AMS study in the Turiec Basin		58
Megerssa L., Verner K. & Buriánek D.: U/Pb dating and emplacement of post-collisional Tekeze Pluton (Arabian-Nubian Shield; Northern Ethiopia)		59
Melichar R., Černý J. & Otava J.: Tectonic Studies of the Variscan Accretionary Wedge, Moravian Karst and Drahany Culmian		60
Méres Š., Plašienka D. & Lačný A.: Occurrence of a Meliatic polygenic mélange complex south-west of town Jelšava (Western Carpathians): lithology and petrography		61
Nahodilová R., Hasalová P., Racek M., Štípská P. & Závada P.: High pressure melting of metagranitoids in continental subduction: implication for the Eger and Kutná hora crystalline complexes in Bohemian Massif		62

Németh Z., Radvanec M. & Putiš M.: Kinematics of Variscan exhumation and Alpine overprint in the Klátov exhumed block of Gemericum (W. Carpathians)		63
Nguyen H., Hanžl P., Ulrich M. & Schulmann K.: Geochemistry and geochronology of volcanic rocks from Trans-Altai Zone, SW Mongolia: Implications for an Early Carboniferous subduction in central Asia		65
Ostrowski S., Aleksandrowski P. & Lasocki M.: Geophysical imaging of prominent fault zones in the Polish Sudetes		66
Pelech O. & Hók J.: Alpine structural evolution of external Tatricum domain – the Považský Inovec Mts. case study		67
Pelech O., Józsa Š., Plašienka D. & Hók J.: Characteristics of the Upper Cretaceous sequence revealed by the borehole HPJ-1 Jašter near Hlohovec (Považský Inovec Mts, Slovakia)		68
Peřestý V., Lexa O., Holder R., Jeřábek P., Racek M., Štípská P., Schulmann K. & Hacker B.: The opening and closure of the Rheic ocean preserved in the polyphase metamorphic record of the Teplá-Barrandian Unit, Bohemian Massif		69
Pešková I., Potfaj M., Hók J. & Teťák F.: Specific features of the Pieniny Klippen Belt and adjacent areas, proceeded from a new geological mapping (south-western part)		70
Petrík I. & Janák M.: Variscan and Alpine metamorphism of the Ordovician magmatic sequence in the Northern Veporic Unit (Western Carpathians)		71
Porkoláb K., Kövér S., Soós B., Héja G., Gerzina N., Đerić N. & Fodor L.: Deformation history of the Drina-Ivanjica Paleozoic (Drina block, Western-Serbia)		72
Pour O., Verner K., Tomek F. & Megerssa L.: Geochronology and fabric pattern of the Aigen Pluton (Moldanubian Batholith)		73
Pulišová Z., Šimonová V., Soták J. & Šurka J.: Paleostress analysis and new stratigraphic data from the Súľov conglomerates (Middle Váh Valley, Slovakia)		74
Racek M., Hasalová P., Závada P., Jeřábek P., Štípská P. & Weinberg R.: Melting and deformation of metagranitoids under (U)HP conditions, Eger crystalline complex (Bohemian Massif)		75
Radzik N., Świerczewska A. & Krzyżak A.: 2D and 3D Magnetic Resonance Imaging of cataclastic deformation bands		76
Schuster R., Ilickovic T., Knobloch G., Onuk P., Mali H., Linner M., Ertl A., Auer C., Roetzel R. & Prayer A.: The pegmatite of Wanzenau (Gföhl Nappe System, Lower Austria)		77
Sikora R.: Structural evolution of the Pilchowice Unit (Kaczawa metamorphic complex) and its relationship to the Intra-Sudetic Fault Zone activity (West Sudetes, Poland)		78
Soejono I., Buriánek D., Svojtka M., Čáp P., Janoušek V. & Ganpurev N.: The basement of the Hovd Domain in western Mongolia: An Altai Domain derived sliver or a reworked Lake Zone margin?		79
Sokol E., Černý J., Marhanský T., Pospíšil L. & Švábenský O.: Geological and geophysical study of basic volcanic bodies. A case study from Říp hill, Czech Republic		80
Strzelecki P. & Świerczewska A.: Origin of stylolites from the Andrychów Klippes, Outer Western Carpathians		81
Szameitat A., Guest B., Parrish R.R., Stuart F.M., Carter A. & Fishwick S.: Two Phase Cenozoic Exhumation of the Columbia Mountains, Canada, caused by Lithosphere Delamination		82
Szczęch M. & Cieszkowski M.: Tectonics of the Krynica Subunit of the Magura Nappe in the western part of the Gorce Mts. (Outer Carpathians, Poland)		83
Štěpančíková P., Rockwell T., Nývt D., Hartvich F., Stemberk J., Ortuño M., Myers M., Luttrell K., Tábořík P., Rhodes E., Wechsler N. & Hók J.: Late Pleistocene tectonic activity on the Sudetic Marginal Fault as revealed by paleoseismic trenching and geophysical survey (Bohemian Massif, Czech Republic)		84
Šujan M. & Kováč M.: Uncovering the sedimentary record of the Pliocene basin inversion in the northern Danube Basin		85
Švehla M. & Melichar R.: Tectonics of the Tertiary rocks in the Čejkovice vicinity		86
Tabaud A.-S., Hasalová P., Schulmann K., Skrzypek E. & Edel J.-B.: Multiple deformation event in granitoids: do we really understand the AMS signal?		87
Tokarski A.K., Fodor L., Waliczek M., Zasadni J. & Márton E.: Structural development of the Orava-Nowy Targ Intramontane Basin (Western Carpathians): Progress report		88

14th Meeting of the Central European Tectonic Groups, Predná Hora, Slovakia, 28th April – 1st May 2016

Tomek F., Trubač J., Žák J., Lexa O. & Ulrych J.: Do vesicles and magnetic fabrics indicate flow in crystal-rich magmas? An example from a subvolcanic trachyandesite dike		89
Trajanova M.: Spatial relationship and deformational pattern of the Pohorje granodiorite pluton, N Slovenia		90
Twyrdy M. & Żelaźniewicz A.: Constraining P-T conditions of HP metamorphic episode in marble-amphibolite association (Orlica-Śnieżnik Dome)		91
Vojtko R., Králiková S., Jeřábek P., Schuster R., Danišík M., Fügenschuch B., Minár J. & Madarás J.: Late Cretaceous to Quaternary tectono-thermal evolution of the Southern Veporic Unit (Central Western Carpathians) constrained by geochronological data		92
Vojtko R., Králiková S., Tokarski A.K., Świerczewska A., Klučiar T. & Márton E.: Late Miocene to Quaternary deformation and palaeostress field evolution in the Turiec Basin (Western Carpathians)		93
Yakovlev F.: About stability of depth of level of basement top during of a folding formation and mountain building – data of the balanced model of alpine structure of Greater Caucasus		94
Yakovlev F.: Volumes of neotectonic erosion and sedimentations for Greater Caucasus region: comparison natural data with theoretic models of geodynamics – statement of problem		95
Zákršmidová B., Gawlick H.-J. & Németh Z.: Exhumation related metamorphic conditions revealed by paleopiezometry on HP-LT Hallstatt Limestones in the southern Northern Calcareous Alps, Austria		96
Závada P., Calassou T., Schulmann K., Hasalová P. & Štípská P.: Folded granite sills in Variscan orogenic wedge – buckling triggered by decreased multilayer strength		97
Żelaźniewicz A., Redlińska-Marczyńska A. & Fanning M.C.: Two gneiss formations of the Orlica-Śnieżnik Dome, NE Bohemian Massif: evidence for two metamorphic events		99
