Preface	ix
Editors	xiii
Contributors	xv

I From Subcellular to Cellular Properties

1 Microrheology of Living Cells at Different Time and Length Scales.....	5
<i>Atef Asnacios, Sylvie Hénon, Julien Browaeys, and François Gallet</i>	
2 Actin-Based Propulsion: Intriguing Interplay between Material Properties and Growth Processes.....	29
<i>Karin John, Denis Caillerie, Philippe Peyla, Mourad Ismail, Annie Raoult, Jacques Prost, and Chaouqi Misbah</i>	
3 Cancer: Cell Motility and Tumor Suppressor Genes.....	67
<i>Rémy Pedoux, Damien Ythier, and Alain Duperray</i>	

II Single Cell Migration Modeling

4 Coupling of Cytoplasm and Adhesion Dynamics Determines Cell Polarization and Locomotion.....	89
<i>Wolfgang Alt, Martin Bock, and Christoph Möhl</i>	
5 How Do Cells Move? Mathematical Modeling of Cytoskeleton Dynamics and Cell Migration.....	133
<i>Dietmar Ölz and Christian Schmeiser</i>	
6 Computational Framework Integrating Cytoskeletal and Adhesion Dynamics for Modeling Cell Motility.....	159
<i>Angélique Stéphanou</i>	

III Mechanical Effects of Environment on Cell Behavior

- 7 History Dependence of Microbead Adhesion under Varying Shear Rate 185
Sylvain Reboux, Giles Richardson, and Oliver E. Jensen
- 8 Understanding Adhesion Sites as Mechanosensitive Cellular Elements 221
Sophie Féréol, Redouane Fodil, Gabriel Pelle, Bruno Louis, Valérie M. Laurent, Emmanuelle Planus, and Daniel Isabey
- 9 Cancer Cell Migration on 2-D Deformable Substrates 243
Valentina Peschetola, Claude Verdier, Alain Duperray, and Davide Ambrosi
- 10 Single Cell Imaging of Calcium Dynamics in Response to Mechanical Stimulation 265
Tae-Jin Kim and Yingxiao Wang

IV From Cellular to Multicellular Models

- 11 Mathematical Framework to Model Migration of Cell Population in Extracellular Matrix 285
Arnaud Chauvière and Luigi Preziosi
- 12 Mathematical Modeling of Cell Adhesion and Its Applications to Developmental Biology and Cancer Invasion 319
Alf Gerisch and Kevin J. Painter
- 13 Bridging Cell and Tissue Behavior in Embryo Development 351
Alexandre J. Kabla, Guy B. Blanchard, Richard J. Adams, and L. Mahadevan
- 14 Modeling Steps from Benign Tumor to Invasive Cancer: Examples of Intrinsically Multiscale Problems 379
Dirk Drasdo, Nick Jagiella, Ignacio Ramis-Conde, Irene E. Vignon-Clementel, and William Weens
- 15 Delaunay Object Dynamics for Tissues Involving Highly Motile Cells 417
Tilo Beyer and Michael Meyer-Hermann
- Index 443
