CHAPTER ONE <i>What is the origin?</i>	i
--	---

The mind is where the action is • Twelve explanations of religion • Why they are insufficient • Turning the question upside down: religion as memes • Directed epidemics

CHAPTER TWO <i>What supernatural concepts are like</i>	58
--	----

Not all ideas will do • The recipe that creates supernatural concepts • From flying organs to the paranormal: a very limited catalogue of notions • How the supernatural can be tested in the lab

CHAPTER THREE <i>The kind of mind it takes</i>	106
--	-----

What is complex about your mind • A visit to the mental basement • Even infants have precise intuitions • Our world-view is a result of evolution • Why our thoughts are mostly about other people • Complex minds are vulnerable to cognitive gadgetry

CHAPTER FOUR *Why gods and spirits?* 155

Religion is more practical than theological • Are gods and spirits like persons? • Are their extraordinary powers really important? • What we do not know, that spirits can guess • What is relevant about supernatural agency

CHAPTER FIVE *Why do gods and spirits matter?* 192

How can they tell you what to do? • Why do they explain what happens to you? • Morality is a natural thing • Gods and spirits as witnesses • We see misfortune as a social thing • Witchcraft, vengeful gods and divine protection

CHAPTER SIX *Why is religion about death?* 232

Is religion comforting? • Death is not the issue • Why so much ritual around dead people? • The corpse as a biological problem • How the brain sees a person, live and dead • Why a corpse is a cognitive gadget

CHAPTER SEVEN *Why rituals?* 262

Why waste time with funny ceremonies? • Rituals are indeed meaningless • Why it is dangerous not to perform them • Ceremonies and social relations • What are gods and spirits doing in all this?

CHAPTER EIGHT *Why doctrines, exclusion and violence?* 303

Why have different religions? • Religion and the market for concepts • Why there are guilds of religious experts: priests and other specialists • Why does it matter what religion others have? • The dangers of defection: fundamentalism as a biological process

CHAPTER NINE *Why belief?*

341

What makes all this plausible? • Science is less natural than religion • In the brain, what is a belief? • Religion explained as a conspiracy • How religion was invented and why it is here to stay • Religion is less than you think
