Preface	17
Executive summary	19
Chapter 1. Fiscal sustainability of health systems – Why is it an issue, what can be done?	23
1.1. Introduction and main messages	24
1.2. How can fiscal sustainability be defined in relation to health systems?	25
1.3. Health care spending: Past, present and future	26
1.4. Why is spending on health increasing in OECD countries?	31
1.5. Ensuring the fiscal sustainability of health systems: what are the main policy options?	33
1.6. Conclusion	41
Notes	42
References	42
Chapter 2. The challenge of budgeting for health care programmes	45
2.1. Introduction	46
2.2. Health care spending and fiscal sustainability	47
2.3. What is the effect of health care spending on a national economy?	50
2.4. Demand for public spending on health care	54
2.5. The challenge of efficiency	61
2.6. Effects of programme structure: Beyond “Bismarck” vs. “Beveridge”	64
2.7. Conclusion	68
Notes	68
References	74
Chapter 3. Budgeting practices for health in OECD countries	79
3.1. Introduction	80
3.2. Approaches in budgeting for health care	83
3.3. Expenditure control tools	87
3.4. Decision making and assessment	93
3.5. Decentralisation of health financing and expenditure	97
3.6. Conclusion	101
Notes	101
References	101
Annex 3.A1. Survey answers by country	102

Chapter 4. Decentralisation of health financing and expenditure	115
4.1. Introduction	116
4.2. Role of sub-national governments in health care provision and financing	116
4.3. Overview of sub-national revenues for funding health care expenditures	118
4.4. Policy setting and control over sub-national health care expenditures	122
4.5. Specific challenges in controlling health expenditure in decentralised settings	124
4.6. Conclusion	127
References	128
Chapter 5. The impact of cost-containment policies on health expenditure	129
5.1. Introduction	130
5.2. Background and chapter objectives	135
5.3. A stylised economic framework for cost-containment reforms	138
5.4. Cost-containment policy reforms in OECD countries: Reviewing the evidence	140
5.5. Conclusion	152
Notes	152
References	154
Chapter 6. Country experiences in dealing with fiscal constraint following the 2008 crisis	159
6.1. Introduction	160
6.2. Results	161
6.3. Discussion	170
6.4. Conclusion	175
Notes	176
References	176
Annex 6.A1. Menu of policy options	178
Chapter 7. The effects of ageing on the financing of social health provision	181
7.1. Introduction	182
7.2. The choice between different types of tax	184
7.3. The political economy of support for social health care	186
7.4. The sustainability of social security revenues	188
7.5. Sin taxes	190
7.6. The experience of OECD countries	191
Notes	194
References	195
Chapter 8. Health care budgeting in France	197
8.1. Introduction	198
8.2. Health and the public budget	199
8.3. Institutional framework and budgeting practices	204
8.4. Controlling key elements of health expenditures	212
8.5. Financing health care	216
8.6. Deficit management in France	221
8.7. Conclusion	223

Note	223
References	223
Chapter 9. Health care budgeting in the United Kingdom	225
9.1. Overview of health in government expenditure	226
9.2. Institutional framework and budgeting practices	228
9.3. Controlling key elements of health expenditures	231
9.4. The impact of health on the government's structural budget position	234
9.5. Conclusion	240
Notes	241
References	241
Chapter 10. Health care budgeting in the Netherlands	245
10.1. Introduction	246
10.2. Reforming towards regulated competition	246
10.3. Evolution of health spending under regulated competition	248
10.4. Fiscal challenges for regulated competition	251
10.5. Role of government in cost containment underregulated competition	254
10.6. Conclusion	258
Notes	259
Bibliography	259

Tables

1.1. Fiscal sustainability definitions from the European Commission and the International Monetary Fund	25
1.2. Health spending projections by national fiscal authorities and the OECD	30
3.1. Is health care expenditure part of central government budget?	83
3.A1.1. Perception of difficulty in reducing health care expenditure	102
3.A1.2. Success of the central budget authority (CBA) in keeping health care spending within desired parameters in the last four years	103
3.A1.3. Types of budget allocation	103
3.A1.4. Categories included in projections	104
3.A1.5. Existence of specific ceilings for health expenditures	104
3.A1.6. Entity primarily responsible for setting the health expenditure ceiling(s)	105
3.A1.7. Most important factors when establishing ceilings or targets for health	105
3.A1.8. Existence of an early warning system to alert that health expenditures may exceed targets or legally binding levels	106
3.A1.9. Use of automatic reductions in health expenditure	106
3.A1.10. Functions undertaken by the CBA	107
3.A1.11. Extent to which the CBA can influence health care policies	108
3.A1.12. Areas which have been key priorities for expenditure control in health in recent years	108
3.A1.13. Existence of a "desirable" level of spending for health care set by the CBA	109
3.A1.14. Countries in which the CBA receives economic evaluations of expected health benefits from new policy proposals suggested by the Health Ministry	110

3.A1.15. Assessment of health policy proposals (on the basis of economic assessments of their expected benefits) by the CBA	110
3.A1.16. Assessment of the impact of health policies on equity by the CBA	111
3.A1.17. Major challenges encountered in the co-operation between the CBA and the Ministry of Health	111
3.A1.18. Existence of a formal co-ordination body between the CBA and Ministry of Health, and other institutions for co-ordination	111
3.A1.19. Ability of the central government (or social security) to vary total resources transferred to sub-national governments for health from one year to the next	112
3.A1.20. Procedure for central government (or social security) to vary total resources transferred to sub-national governments from one year to the next	112
3.A1.21. Influence of the central government (CG) on overall health spending by sub-national governments	113
3.A1.22. Institution primarily responsible for controlling health spending by sub-national governments	113
4.1. Central governments set targets for health spending by SNGs	122
5.1. Summary of the reviewed empirical evidence on cost-containment policies in OECD countries	131
6.1. Pay for performance programme in several OECD countries	174
6.A1.1. Menu of policy options	178
7.1. Total expenditure on health	183
7.2. Public expenditure on health	188
7.3. Revenue shares of the main tax categories in the OECD area	191
7.4. Trends in the tax wedge	192
7.5. Use of social security contributions to finance health care	193
8.1. ONDAM sub-categories actuals, predictions and targets for the years 2010, 2011, 2012 and 2013	209
8.2. Evolution of CSG rates since its creation	217
8.3. Presentation of all earmarked taxes related to health in 2012	219
9.1. Changes in public spending as a share of GDP and tax receipts	227
9.2. Government spending on health in the United Kingdom	228
9.3. The 2002 Wanless Review projections of English NHS funding pressures	237
9.4. NHS England funding pressures facing the NHS by the end of the decade	237
9.5. Health Foundation projected funding gap for English NHS in 2030-31 under three assumptions for productivity	238
10.1. Nominal hospital price developments	249
10.2. Time lags between realisation of spending and implementation of measures	256

Figures

1.1. Average annual growth rate of real health spending and GDP per capita, 1990-2012 (or closest years)	27
1.2. Average annual growth rates in real health spending per capita, from 2000 to the latest year	27
1.3. Growth in health spending as compared with GDP	28
1.4. Health spending as a share of GDP, 2012 or latest year	28

1.5. Projected public health and long-term care expenditure as a percentage of GDP in 2060	29
1.6. Health spending as a share of total government spending, 2012.....	34
1.7. Revenue sources for funding government health expenditures, 2010 or latest year	35
1.8. Health expenditure by function of health care	36
1.9. Hospital medical admission rates across and within selected OECD countries, 2011 or latest year	37
1.10. Relative share of public and private spending, 2012 (or nearest year).....	39
1.11. Number of countries using HTA to make coverage decisions or set reimbursements	41
3.1. Fiscal sustainability framework	81
3.2. Coverage of long-term health expenditure projections	86
3.3. Years of estimates for health spending in the budget.....	88
3.4. Factors influencing ceilings for health	89
3.5. Size of budget overruns and underspending in percentage of budgeted spending, 2006-12	90
3.6. Early-warning systems (EWS)	90
3.7. Voted ONDAM vs. achieved health expenditures	91
3.8. Delay in reporting health expenditure to central budget authority (CBA)	92
3.9. Share of discretionary vs. mandatory health spending, average 2006-12	94
3.10. Main healthcare-related functions undertaken by the central budget authority	95
3.11. Influence of the central budget authority (CBA) over healthcare-related policies	95
3.12. Top priority areas for health expenditure control for budget officials	96
3.13. Perceived co-ordination challenges between the Ministry of Health and the central budget authority	96
3.14. Sources of revenues financing SNG health expenditure	98
3.15. Composition of transfers from central authorities as a share of total SNG health care spending	98
3.16. What is the procedure for central government (CG) or social security (SS) to vary total resources transferred?	99
4.1. Division of public health care spending between levels of government, 2012... ..	117
4.2. SNG health care expenditure as a share of total SNG expenditure, 2000-12	118
4.3. Sources of revenues financing SNG health expenditure	119
4.4. Composition of transfers from central authorities as a share of total SNG health care spending	120
4.5. To what extent can the central government or social security authority vary total resources transferred to SNGs for health from one year to the next?	121
4.6. What is the procedure for the central government or social security authority to vary total resources transferred?	121
4.7. Central government monitoring of sub-national government performance for health expenditure	123
4.8. Institutions in charge of controlling SNG health care spending	124
4.9. Health care resources for county councils, Sweden, 2011.....	125
4.10. Evolution of social and health care services in Finnish municipalities	126
5.1. Public expenditure on health as a share of total health expenditure, OECD countries 2012 or nearest year	135

5.2. Total expenditure on health as a share of GDP, OECD countries 2012 or nearest year	136
5.3. A stylised economic framework for cost-containment reforms	139
5.4. Evolution of pharmaceutical expenditure as a share of total health expenditure	144
6.1. Key policy responses in Europe	161
6.2. Budget tools available if health spending exceeds targets, by option	162
6.3. Contribution to the evolution of health care expenditure by function of care	163
6.4. Estimated savings from hospital consolidation: Greece	164
6.5. Gross pay in the Irish health sector	165
6.6. Actual and projected UK NHS spending as a percentage of GDP	166
6.7. Savings in the United Kingdom under the Quality, Innovation, Productivity and Prevention programme (QIPP)	168
6.8. South Africa fiscal position: Consolidated revenue and expenditure as a percentage of GDP	169
6.9. Variability in hospital beds by country in OECD	172
6.10. Variation in hospital discharges by country in OECD	172
7.1. Total expenditure on health	182
7.2. Public expenditure on health	187
7.3. Compensation of employees	189
7.4. Reliance on social security contributions and the tax wedge	194
7.5. Reliance on social security contributions and the increase in the government share of health care expenditure since 2000	194
8.1. Total health expenditure as share of GDP, 2011 (or nearest year)	200
8.2. Expenditure on health by type of financing, 2011 (or nearest year)	201
8.3. General government health spending compared to general government overall spending as a share of GDP, 2009 (or nearest year)	201
8.4. Social security/health deficits (salaried workers regime/CNAMTS) since 1998	202
8.5. Health branch of total social security revenues and expenditures since 2005	203
8.6. Total social security deficits projections up to 2017	203
8.7. Evolution of gross public debt to GDP ratio (Maastricht definition) in France ...	204
8.8. Total public and primary private health insurance	205
8.9. Calendar of the Social Security Act	208
8.10. Main savings included in the ONDAM between 2010 and 2013	210
8.11. Voted ONDAM vs. achieved health expenditures	211
8.12. The year-long process of the Alert Committee	213
8.13. Key factors behind actual health spending below the ONDAM, 2010 to 2012 ...	215
8.14. Distribution of CNAMTS resources	217
8.15. Origins and allocation of CSG revenues in 2012	218
8.16. Destinations of earmarked taxes for social security in 2012	219
8.17. Evolution of household income distribution between 1970 and 2011	220
8.18. Share of CNAMTS revenues by source in 2011	220
8.19. Evolution of the CADES net liability position	222
8.20. Evolution of the CADES recourses	222

9.1. NHS spending in the United Kingdom, as a proportion of total public spending	226
9.2. Percentage of public spending in 1978-79 and 2010-11	227
9.3. The variation in public health spending per person in the four countries of the United Kingdom	228
9.4. English health budget to 2015-16	229
9.5. Purchase of NHS-funded health care from non-NHS bodies from 2006-07 to 2013-14	230
9.6. NHS primary care trust expenditures 2009-10 – GBP 97.5 billion	230
9.7. Percentage change from previous year in English NHS spending by service area	231
9.8. Health care output, inputs and productivity estimates (nominal terms), 1995-2010, United Kingdom	232
9.9. NHS Staff annual average earnings per person 2010-11 to 2013-14	233
9.10. DEL and AME components	235
9.11. The financial gap by 2021-22, assuming English NHS funding rises as set out in the 2010 Spending Review to 2014-15 and is frozen in real terms.	235
9.12. Funding pressures on acute services in England attributable to population change and to the rising probability of admission for chronic conditions.	236
9.13. Funding pressures on English NHS in 2030-31	238
9.14. Change in sectoral job share and level of productivity	239
9.15. A century of health spending: Projections of UK health care expenditure, 1960-2059	240
10.1. Evolution of total health expenditure in percentage of GDP and per capita	249
10.2. Annual increase in expenditures by cost deciles funded by the Health Insurance Act, 2006-08	250
10.3. Evolution of real hospital care expenditures	251
10.4. Risk bearing by insurers went up over time	253
10.5. Market shares and real monthly premium prices of the four largest health insurers.	254
