Preface	xix
Foreword by Professor Guus Berkhout	xxiii
Acknowledgements	xxiv
Plan of the book	xxviii

Part One Innovation management 1

1	Innovation management: an introduction	2
	The importance of innovation	4
	The study of innovation	6
	Recent and contemporary studies	9
	The need to view innovation in an organisational context	10
	Individuals in the innovation process	11
	Problems of definition and vocabulary	12
	Entrepreneurship	12
	Design	13
	Innovation and invention	15
	Successful and unsuccessful innovations	16
	Different types of innovation	16
	Technology and science	18
	Popular views of innovation	20
	Models of innovation	20
	Serendipity	21
	Linear models	21
	Simultaneous coupling model	23
	Architectural innovation	23
	Interactive model	24
	Innovation life cycle and dominant designs	25
	Open innovation and the need to share and exchange knowledge (network models)	25
	Discontinuous innovation – step changes	27
	Innovation as a management process	28
	A framework for the management of innovation	29
	New skills	31
	Innovation and new product development	32
	Case study: The success of the iPod and iPhone raises the licensing question for Apple . . . again	33

<i>Chapter summary</i>	40
<i>Discussion questions</i>	40
<i>Key words and phrases</i>	41
<i>References</i>	41
<i>Further reading</i>	44

2 Economics and market adoption 46

Innovation in its wider context	48
The role of the state and national 'systems' of innovation	50
How national states can facilitate innovation	51
Fostering innovation in the United States and Japan	52
The right business environment is key to innovation	54
Waves of innovation and growth: historical overview	54
Fostering innovation in 'late-industrialising' countries	57
Innovation within the 25 EU states	58
Improving the innovation performance of the EU	60
The times they are a changing: how frugal innovation is providing a future path for firms in emerging markets	61
Innovation and the market	61
Innovation and market vision	62
Innovative new products and consumption patterns	62
Marketing insights to facilitate innovation	64
Lead users	66
Innovation diffusion theories	67
Adopting new products and embracing change	69
Market adoption theories	71
Case study: How three students built a business that could affect world trade	71
<i>Chapter summary</i>	77
<i>Discussion questions</i>	78
<i>Key words and phrases</i>	78
<i>References</i>	78
<i>Further reading</i>	80

3 Managing innovation within firms 82

Organisations and innovation	84
The dilemma of innovation management	84
Managing uncertainty	85
Pearson's uncertainty map	86
Applying the uncertainty map in practice	88
Managing innovation projects	89
Organisational characteristics that facilitate the innovation process	91
Growth orientation	93

Organisational heritage and innovation experience	94
Vigilance and external links	95
Commitment to technology and R&D intensity	95
Acceptance of risks	95
Cross-functional cooperation and coordination within organisational structure	95
Receptivity	96
Space for creativity	96
Strategy towards innovation	96
Diverse range of skills	97
Industrial firms are different: a classification	99
Organisational structures and innovation	101
Formalisation	101
Complexity	102
Centralisation	102
Organisational size	103
The role of the individual in the innovation process	103
IT systems and their impact on innovation	104
Management tools for innovation	107
Innovation management tools and techniques	107
Applying the tools and guidelines	109
Case study: Gore-Tex® and W.L. Gore & Associates: An innovative company and a contemporary culture	110
<i>Chapter summary</i>	114
<i>Discussion questions</i>	114
<i>Key words and phrases</i>	115
<i>References</i>	115
<i>Further reading</i>	117

4 Innovation and operations management 118

Richard Noble, University of Portsmouth

Operations management	120
The nature of design and innovation in the context of operations	121
Design requirements	122
Design and volumes	124
Craft-based products	126
Design simplification	127
Process design and innovation	128
Innovation in the management of the operations process	129
Triggers for innovation	130
Design of the organisation and its suppliers – supply chain management	135
Business process re-engineering (BPR)	138
Operations and technology	139
Innovation as an operations process itself	144
Case study: Novels, new products and Harry Potter	145
<i>Chapter summary</i>	151

<i>Discussion questions</i>	151
<i>Key words and phrases</i>	151
<i>References</i>	152
<i>Further reading</i>	153

5 Managing intellectual property 154

Intellectual property	156
Trade secrets	159
An introduction to patents	160
Novelty	161
Inventive step	162
Industrial applications	162
Exclusions from patents	162
The patenting of life	163
Human genetic patenting	163
The configuration of a patent	164
Patent harmonisation: first to file and first to invent	165
Some famous patent cases	166
Patents in practice	167
Expiry of a patent and patent extensions	167
Patent extensions	169
The use of patents in innovation management	170
Do patents hinder or encourage innovation?	170
Alternatives to patenting	172
Trademarks	173
Should satisfy the requirements of section 1(1)	175
Distinctive	175
Non-deceptive	175
Not confusing	175
Brand names	176
Using brands to protect intellectual property	177
Exploiting new opportunities	178
Brands, trademarks and the internet	179
Duration of registration, infringement and passing off	179
Registered designs	180
Copyright	181
Remedy against infringement	183
Damages	183
Injunction	184
Accounts	184
Counterfeit goods and IP	184
Case study: Pricing, patents and profits in the pharmaceutical industry	185
<i>Chapter summary</i>	189
<i>Discussion questions</i>	189
<i>Key words and phrases</i>	189
<i>References</i>	189
<i>Further reading</i>	191

Part Two	Turning technology into business	193
6	Managing organisational knowledge	194
	The battle of Trafalgar	196
	Technology trajectories	197
	The acquisition of firm-specific knowledge	198
	The resource-based perspective	198
	Dynamic competence-based theory of the firm	199
	Developing firm-specific competencies	200
	Competencies and profits	202
	Technology development and effort required	203
	The knowledge base of an organisation	203
	The whole can be more than the sum of the parts	204
	Organisational heritage	205
	When the performance of the organisation is greater than the abilities of individuals	205
	Japanese organisations and the role of organisational knowledge	206
	Characterising the knowledge base of the organisation	207
	The learning organisation	209
	Innovation, competition and further innovation	209
	Dominant design	211
	How firms cope with radical and incremental innovation	212
	Developing innovation strategies	216
	Leader/offensive	216
	Fast follower/defensive	217
	Cost minimisation/imitative	218
	Market segmentation specialist/traditional	218
	A technology strategy provides a link between innovation strategy and business strategy	218
	Case study: The cork industry, the wine industry and the need for closure	219
	<i>Chapter summary</i>	228
	<i>Discussion questions</i>	228
	<i>Key words and phrases</i>	228
	<i>References</i>	229
	<i>Further reading</i>	231
7	Strategic alliances and networks	232
	Defining strategic alliances	234
	The fall of the go-it-alone strategy and the rise of the octopus strategy	236
	Complementary capabilities and embedded technologies	237
	Interfirm knowledge-sharing routines	238
	Forms of strategic alliance	239
	Licensing	239
	Supplier relations	240
	Outsourcing	240
	Joint venture	241

Collaboration (non-joint ventures)	241
R&D consortia	241
Industry clusters	242
Innovation networks	243
The 'virtual company'	245
Motives for establishing an alliance	246
The process of forming a successful strategic alliance	247
Negotiating a licensing deal	248
Terms for the agreement	248
Rights granted	249
Licence restrictions	249
Improvements	249
Consideration (monetary value)	249
Reports and auditing of accounts	249
Representations/warranties	250
Infringement	250
Confidentiality	250
Arbitration	250
Termination	250
Risks and limitations with strategic alliances	250
The role of trust in strategic alliances	253
The concept of trust	253
Innovation risks in strategic outsourcing	255
Eating you alive from the toes up	257
The use of game theory to analyse strategic alliances	258
Game theory and the prisoner's dilemma	259
Use of alliances in implementing technology strategy	260
Case study: And the winner is Sony's Blu-ray – the high-definition DVD format war	261
<i>Chapter summary</i>	267
<i>Discussion questions</i>	268
<i>Key words and phrases</i>	268
<i>References</i>	268
<i>Further reading</i>	271

8 Management of research and development 272

What is research and development?	274
The traditional view of R&D	275
R&D management and the industrial context	275
R&D investment and company success	278
Classifying R&D	281
The operations that make up R&D	283
R&D management and its link with business strategy	285
Integration of R&D	286
Strategic pressures on R&D	288
The technology portfolio	289
The difficulty of managing capital-intensive production plants in a dynamic environment	290

Which business to support and how?	291
Technology leverage and R&D strategies	293
Strengths and limitations of this approach	294
Allocation of funds to R&D	295
Setting the R&D budget	296
Level of R&D expenditure	298
Case study: The long and difficult 13-year journey to the marketplace for Pfizer's Viagra	299
<i>Chapter summary</i>	306
<i>Discussion questions</i>	306
<i>Key words and phrases</i>	307
<i>References</i>	307
<i>Further reading</i>	308

9 Managing R&D projects 310

Successful technology management	312
The changing nature of R&D management	314
Organising industrial R&D	317
The acquisition of external technology	318
Level of control of technology required	319
Forms of external R&D	320
Effective R&D management	323
Managing scientific freedom	324
Skunk works	327
The link with the product innovation process	328
The effect of R&D investment on products	329
Evaluating R&D projects	330
Evaluation criteria	330
Case study: CSI and genetic fingerprinting	334
<i>Chapter summary</i>	340
<i>Discussion questions</i>	340
<i>Key words and phrases</i>	340
<i>References</i>	341
<i>Further reading</i>	343

10 Open innovation and technology transfer 344

Background	346
The dominant economic perspective	347
Open innovation	348
Introduction to technology transfer	350
Information transfer and knowledge transfer	350
Models of technology transfer	351
Licensing	352
Science park model	352
Intermediary agency model	353

Directory model	353
Knowledge Transfer Partnership model	353
Ferret model	353
Hiring skilled employees	355
Technology transfer units	355
Research clubs	355
European Space Agency (ESA)	356
Consultancy	356
Limitations and barriers to technology transfer	356
NIH syndrome	357
Internal organisational factors and inward technology transfer	358
Absorptive capacity: developing a receptive environment for technology transfer	359
Identifying external technology: the importance of scanning and networking	361
Linking external technology to internal capabilities	362
Managing the inward transfer of technology	362
Technology transfer and organisational learning	363
Case study: Sony-Ericsson mobile phone joint venture dependent on technology transfer	365
<i>Chapter summary</i>	373
<i>Discussion questions</i>	373
<i>Key words and phrases</i>	373
<i>References</i>	373
<i>Further reading</i>	376

Part Three New product development 377

11 Product and brand strategy 378

Capabilities, networks and platforms	380
Product platforms	381
Product planning	383
Product strategy	386
Competitive strategy	386
Product portfolios	387
The competitive environment	388
Differentiation and positioning	389
Differentiation	389
Product positioning	390
Competing with other products	393
Managing brands	395
Brands and blind product tests	395
Brand strategy	397
Brand extensions	398
Market entry	401
Launch and continuing improvement	402
Withdrawing products	403
Managing mature products	406

Case study: Developing a new product for the tooth whitening market	407
<i>Chapter summary</i>	413
<i>Discussion questions</i>	414
<i>Key words and phrases</i>	414
<i>References</i>	414
<i>Further reading</i>	415

12 New product development 416

Innovation management and NPD	418
Product development as a series of decisions	419
New products and prosperity	420
Considerations when developing an NPD strategy	420
Ongoing corporate planning	420
Ongoing market planning	421
Ongoing technology management	421
Opportunity analysis/serendipity	421
NPD as a strategy for growth	422
Market penetration	422
Market development	423
Product development	423
Diversification	423
A range of product development opportunities	423
What is a new product?	426
Defining a new product	427
Classification of new products	429
Repositioning and brand extensions	431
New product development as an industry innovation cycle	432
Overview of NPD theories	433
The fuzzy front end	434
Time to market	436
Agile NPD	437
Models of new product development	437
Departmental-stage models	438
Activity-stage models and concurrent engineering	439
Cross-functional models (teams)	441
Decision-stage models	441
Conversion-process models	441
Response models	441
Network models	442
Case study: Launching innocent into the growing fruit smoothie market	443
<i>Chapter summary</i>	450
<i>Discussion questions</i>	451
<i>Key words and phrases</i>	451
<i>References</i>	451
<i>Further reading</i>	454

13	Packaging and product development	456
	Wrapping and packaging products	458
	The basic principles of packaging	461
	Protection	461
	Containment	462
	Identification	463
	Labelling	463
	Characteristics of packaging	465
	Dispensing	465
	Storage	465
	Stability	466
	Handling	466
	Opening/resealing	466
	After use and secondary use	468
	Disposal	468
	Product rejuvenation	468
	New product opportunities through packaging	470
	Product and pack size variation	471
	Packaging systems	473
	Retailer acceptance	475
	Revitalising mature packaged goods	476
	Case study: Halfords Motor Oil – redesign and rebranding of an existing product	477
	<i>Chapter summary</i>	482
	<i>Discussion questions</i>	482
	<i>Key words and phrases</i>	482
	<i>References</i>	483
	<i>Further reading</i>	483
14	New service innovation	486
	The growth in services	488
	Growth in knowledge-intensive business services (KIBS)	488
	Outsourcing and service growth	489
	Different types of services	493
	Technology and new service development	495
	New services and new business models	495
	Characteristics of services and how they differ from products	496
	Intangibility	497
	Heterogeneity	498
	Simultaneous production and consumption	498
	Perishability	498
	Classification of service innovations	499
	The new service development process	499
	New service development models	501
	Sequential service development models or stage-gate models	502
	Concurrent service development models	504

Service innovation and the consumer	505
Consumer user toolkits	506
Consumer testing of services	507
Case study: Developing new services at the world's most successful internet-based company, eBay	508
<i>Chapter summary</i>	516
<i>Discussion questions</i>	516
<i>Key words and phrases</i>	516
<i>References</i>	517
<i>Further reading</i>	520

15 Market research and its influence on new product development

522

Market research and new product development	524
The purpose of new product testing	525
Testing new products	526
Techniques used in consumer testing of new products	527
Concept tests	528
Test centres	528
Hall tests/mobile shops	528
Product-use tests	528
Trade shows	529
Monadic tests	529
Paired comparisons	529
In-home placement tests	529
Test panels	529
When market research has too much influence	529
Discontinuous new products	532
Market research and discontinuous new products	533
Circumstances when market research may hinder the development of discontinuous new products	533
Technology-intensive products	534
Breaking with convention and winning new markets	536
When it may be correct to ignore your customers	539
Striking the balance between new technology and market research	540
The challenge for senior management	542
Case study: Dyson, Hoover and the bagless vacuum cleaner	543
<i>Chapter summary</i>	551
<i>Discussion questions</i>	551
<i>Key words and phrases</i>	552
<i>References</i>	552
<i>Further reading</i>	553

16 Managing the new product development process

554

New products as projects	556
The Valley of Death	557

The key activities that need to be managed	558
Assembling knowledge	560
The generation of business opportunities	560
Developing product concepts: turning business opportunities into product concepts	564
The screening of business opportunities	564
New technology product blogs	567
Development of product prototypes	567
Technical testing	569
Market testing and consumer research	569
How virtual worlds can help real-world innovations	570
Market introduction	571
NPD across different industries	572
Organisational structures and cross-functional teams	572
Teams and project management	573
Functional structures	573
Matrix structures	574
Corporate venturing	576
Project management	576
Reducing product development times through computer-aided design	577
The marketing/R&D interface	577
High attrition rate of new products	578
Case study: An analysis of 3M, the innovation company	581
<i>Chapter summary</i>	586
<i>Discussion questions</i>	586
<i>Key words and phrases</i>	587
<i>References</i>	587
<i>Further reading</i>	589
 Appendix: Guinness patent	 590
Index	606
