TABLE OF CONTENTS

SERIES PREFACE xi

FOREWORD xiii

ACKNOWLEDGMENTS xvii

PART I: METAMENTALITY

1. *What is Artificial Intelligence?* 3

Criteria of Intelligence 5
The Turing Test 5
The Chinese Room 6
The Korean Room 7
Varieties of Intelligence 10
Rationality 11
Intentionality 13
Humanity 15
The Aim of this Inquiry 18
Behaviorism 21
Extensionality 23
Reductionism 25

2. *Symbol Systems and Semiotic Systems* 29

Peirce's Theory of Signs 31
Abstract and Physical Systems 35
Causal and Semiotic Systems 38
The Varieties of Semiotic Systems 41
Symbol and Causal Systems 44
Symbol and Semiotic Systems 46
The Symbol and Semiotic-System Hypotheses 50
What about Humans and Machines? 52
What Difference Does It Make? 55

3. *Theories of Language and Mentality* 61

The Computational Conception 65
The Parsing Criterion 67
Ambiguity and Synonymy 69
The Representational Conception 71
The Language of Thought 73
The Substitutional Criterion 75
The Dispositional Conception 78
A Theory of Cognition 81
The Functional Role Criterion 83
Fundamentally Different Systems 86

PART II: KNOWLEDGE AND EXPERTISE

4. *The Nature of Knowledge* 93

Conditions of Knowledge 95
The Classic Definition 96
Certainty vs. Fallibility 97
A Refined Conception 99
Language Frameworks 104
Analytic Sentences 105
A Priori Knowledge 110
Modes of Modality 112
The Condition of Truth 116
Truth and Meaning 118
Austin's Conventions 121
Appropriate Beliefs 123

5. *Varieties of Knowledge* 127

Ordinary Knowledge 132
Common Sense 133
Defeasible Reasoning 138
Scientific Knowledge 141
Laws of Nature 145
Lawlike Sentences 149
Maximal Specificity 152
Epistemic Scorekeeping 155
The Frame Problem 157

6. *Expert Systems* 163

The General Conception 164
The Choice of an Expert 166
The Nature of Expertise 167
Scientific Expertise 168
Expert Production Systems 171
Logical Structure 172
Epistemic Contents 175
Truth vs. Practicality 177
Varieties of Expert Systems 180
The Expert System 182
The Knowledge-Processing System 184
The Expert-Aided Knowledge-Processing System 185

PART III: REPRESENTATION AND VERIFICATION

7. *Knowledge Representation* 195

Semantic Networks 198
Logical Structure 204
Epistemic Contents 208
Scripts and Frames 211
Scripts as Sequences of Frames 214
Scripts as Modes of Understanding 219
Selecting a Representation Scheme 224
Logical Structures 226
Epistemic Contents 227
Has the Role of Logic Been Misconceived? 230

8. *Program Verification* 233

The Comparison with Mathematics 236
Concepts of Verification 239
Probable Verifications 243
Two Kinds of Complexity 248
Theorems, Algorithms, and Programs 251
The Deeper Disanalogy 252
Programs as Causal Models 253
Abstract and Target Machines 255

The Ambiguity of "Program Verification" 257
Programs as Applied Mathematics 259
Testing Computer Programs 261
Complexity and Reliability 265

9. *Minds, Bodies, and Machines* 269

The Nature of Mind 270
Human Cognition 274
Machine Mentality 275
Minds and Bodies 279
Laws of Human Beings 282
Laws of Digital Machines 285
Other Minds 289
Computers and Cognition 291
The Cognitive Computer 295
Why People Think Computers Can't 298
