Editors' Introduction: Footprints in the Snow

<i>Kristina Höök, David Benyon and Alan Munro</i>	1
---	---

Part I Systems and Theories

1 Social Translucence: Using Minimalist Visualisations of Social Activity to Support Collective Interaction <i>Thomas Erickson and Wendy A. Kellogg</i>	17
2 Collaborative Filtering: Supporting Social Navigation in Large, Crowded Infospaces <i>Joseph A. Konstan and John Riedl</i>	43
3 Screen Scenery: Learning from Architecture and People's Practices of Navigation in Electronic Environments <i>Monika Buscher and John Hughes</i>	83
4 Navigating the Virtual Landscape: Coordinating the Shared Use of Space <i>Phillip Jeffrey and Gloria Mark</i>	105
5 Experiential Design of Shared Information Spaces <i>John A. Waterworth, Andreas Lund and David Modjeska</i>	125
6 GeoNotes: A Location-based Information System for Public Spaces <i>Per Persson, Fredrik Espinoza, Petra Fagerberg, Anna Sandin and Rickard Cöster</i>	151
7 Footsteps from the Garden: Arcadian Knowledge Spaces <i>Andrew McGrath and Alan Munro</i>	175
8 Social Navigation of Food Recipes: Designing Kalas <i>Martin Svensson and Kristina Höök</i>	201
9 Results from the Footprints Project <i>Alan Wexelblat</i>	223
10 WebPlaces: Using Intermediaries to Add People to the Web <i>Paul P. Maglio, Rob Barrett and Stephen Farrell</i>	249

Part II Theories and Principles

11 Where the Footprints Lead: Tracking Down Other Roles for Social Navigation <i>Paul Dourish</i>	273
12 Social Connotations of Space in the Design for Virtual Communities and Social Navigation <i>Andreas Dieberger</i>	293
13 Informatics, Architecture and Language <i>Matthew Chalmers</i>	315
14 Information that Counts: A Sociological View of Social Navigation <i>R.H.R. Harper</i>	343
15 Navigation: Within and Beyond the Metaphor in Interface Design and Evaluation <i>Rod McCall and David Benyon</i>	355
16 The Conceptual Structure of Information Space <i>Paul P. Maglio and Teenie Matlock</i>	385
17 Information Space Navigation: A Framework <i>Robert Spence</i>	405
