INDEX 335

This Index includes names, subjects, words, and morphemes. Certain entries refer to concepts rather than to terms. For instance, *mother-in-law language* is not mentioned by name on page 222, but an example of such language is given on that page. Similarly *hesitation sound*, which is named and defined on page 6, is illustrated without specific identification on page 43.

Words and morphemes that are given some discussion in the text appear in the index in bold-face italic type. Thus *boy*, discussed on pages 112–13, is included; but *adolescent*, which is merely listed as a partial synonym, is not.
