<b>1. Grassland character and communities</b>	<b>1</b>
1.1 Introduction	1
1.2 The origins of semi-natural dry grassland communities	3
1.3 Dry grassland succession	7
1.3.1 Primary succession	7
1.3.2 Secondary succession	9
1.4 Semi-natural dry grassland types	9
1.4.1 Lowland calcareous grassland	10
1.4.2 Lowland dry acid grassland	12
1.4.3 Lowland meadows (mesotrophic grasslands)	17
1.4.4 Upland calcareous grassland	20
1.4.5 Upland hay meadows	23
1.5 Specialised semi-natural dry grassland types	26
1.5.1 Calaminarian grasslands	26
1.5.2 Machair	27
1.5.3 Limestone pavements	28
1.6 Dry grassland scrub communities	30
1.6.1 Lowland communities	30
1.6.2 Upland communities	31
1.7 Semi-improved dry pastures and meadows	32
<b>2. Grassland wildlife</b>	<b>34</b>
2.1 Invertebrates	34
2.1.1 Butterflies	37
2.1.2 Implications for management	43
2.2 Birds	46
2.2.1 Lowland birds	46
2.2.2 Upland birds	50
2.2.3 Conservation	50
2.2.4 Implications for management	52
2.3 Reptiles and amphibians	54
2.3.1 Reptiles	54
2.3.2 Amphibians	55
2.4 Mammals	57
2.4.1 Bats	58
2.5 Fungi	62

2.5.1	Macrofungi	63
2.6	Assessing the conservation value of a site	64
2.6.1	Phase 1 habitat survey	65
2.6.2	Wildlife surveys	65
<b>3.</b>	<b>Semi-natural dry grassland management</b>	<b>69</b>
3.1	Grazing	69
3.1.1	Livestock species and breeds	70
3.1.2	Cattle	72
3.1.3	Sheep	73
3.1.4	Horses and ponies	75
3.1.5	Stocking density	77
3.1.6	Timing and duration of grazing	79
3.1.7	Animal management	81
3.1.8	Grazing by Rabbits	83
3.2	Cutting	89
3.2.1	Cutting methods	90
3.2.2	Timing	90
3.2.3	Cutting and aftermath grazing	91
3.2.4	Cutting to replace grazing	93
3.2.5	Combined cutting and grazing regimes	94
3.3	Weeds and herbicides	94
3.3.1	Non-chemical control	95
3.3.2	Chemical control	96
3.3.3	Common Ragwort control	97
3.3.4	Bracken control	100
3.3.5	Control of other species	102
3.4	Scrub management	104
3.4.1	Assessment	104
3.4.2	Management techniques	105
3.5	Fertiliser application	109
3.5.1	Farmyard manure	109
3.5.2	Lime	110
<b>4.</b>	<b>Grassland restoration: threats and challenges</b>	<b>115</b>
4.1	Threats to semi-natural dry grassland communities	115
4.1.1	Agricultural improvement and land conversion	115
4.1.2	Lowering soil fertility	115
4.1.3	Habitat deterioration	122
4.2	Climate change and dry grassland	123
4.2.1	Climate change in Britain	123
4.2.2	Impacts on grassland habitats and wildlife	124
4.3	Challenges in dry grassland restoration	130
4.4	Limits to natural colonisation	136
4.4.1	Impoverished seed banks	138
4.4.2	Limited dispersal opportunities	140
4.4.3	Missing trophic levels	142
4.5	Assessing hydrological and topographic constraints	144

## **5. Opportunities in grassland restoration**

**147**

5.1	Conservation of semi-natural dry grassland habitats	147
5.2	Opportunities for dry grassland restoration	148
5.3	Reinstating traditional management	150
5.3.1	Grazing effects	150
5.3.2	Cutting effects	152
5.3.3	Influences of restoration management on sward diversity	155
5.3.4	Impacts of restoration management on invertebrates	157
5.4	Site limitations and solutions	163
5.4.1	Fallowing	163
5.4.2	Plant and animal offtake	164
5.4.3	Chemical manipulation	167
5.4.4	Immobilisation	169
5.4.5	Reinstating soil communities	169

## **6. Plant material for dry grassland restoration**

**172**

6.1	Surveying the restoration site	172
6.1.1	Soil analysis	172
6.1.2	Vegetation	173
6.2	Surveying reference sites	175
6.3	Selecting plant material	176
6.3.1	Use of ecological traits	176
6.3.2	Complex or simple mixtures?	178
6.3.3	Hemiparasites: Yellow-rattle	180
6.4	Sourcing plant materials	182
6.4.1	Nursery production	184
6.4.2	Wild harvesting	185
6.4.3	Adverse impacts of seed collection	191
6.5	Sowing and the role of soil disturbance	204
6.6	Sowing practice	208
6.6.1	Sowing mechanics	208
6.6.2	Complete and partial sowing	209
6.6.3	Arable reversion and grassland enhancement protocols	210
6.6.4	Transplants	213

## **7. Defining success in grassland restoration**

**215**

7.1	Plant introductions	215
7.2	Preparation for sowing	218
7.3	Management techniques	218
7.4	Long-term vegetation development	218
7.5	Cost-effectiveness in restoration	220
7.6	Monitoring success	222
