Contents

part 1 Becoming Skilled at Computing

chapter 1 Defining Information Technology
Terms of Endearment 21

Why Know Just the Right Word 23
Where's the Start Button? 24
Where Is the Computer? 29
How Soft Is Software? 33
The Words for Ideas 35
Analytical Thinking 37
Summary 41
Try It Solutions 42
Review Questions 42

chapter 2 Exploring the Human–Computer Interface
What the Digerati Know 46

Learning about Technology 48
Two Concepts of Computing 53
"Clicking Around" 55
"Blazing Away" 56
Watching Others 57
Principle: Form Follows Function 59
Searching Text Using Find 61
Editing Text Using Substitution 65
Technology: Take It Personally 70
Summary 72
Try It Solutions 72
Review Questions 73

chapter 3 The Basics of Networking
Making the Connection 76

Comparing Communication Types 78
The Medium of the Message 80
The World Wide Web 92
The Internet and the Web 95
Summary 99
Try It Solutions 99
Review Questions 100

chapter 4 A Hypertext Markup Language Primer
Marking Up with HTML 103

Marking Up with XHTML 105
Lab Practice I 107
Structuring Documents 110
Lab Practice II 114
Marking Links with Anchor Tags 116
Including Pictures with Image Tags 119
Lists and Tables 124
Cascading Style Sheets (CSS) 129
Style from Files 133
HTML Wrap-Up 136
Summary 137
Try It Solutions 137
Review Questions 138

chapter 5 Locating Information on the WWW
Searching for Truth 142

Searching in All the Right Places 144
How Is Information Organized? 146
Searching the Web for Information 153
Searching the World Wide Web 159
Web Information: Truth or Fiction? 165
The Burmese Mountain Dog Page 168
Summary 169
Try It Solutions 170
Review Questions 170

chapter 6 A Case Study in Online Research
Searching for Guinea Pig B 174

Getting Started with Online Research 176
Learning About Fuller 181
Primary Sources 184
Chronfile and "Everything I Know" 188
Resolving Questions 192
Exploring Side Questions 196
Case Study Wrap-Up 198
Summary 203
Try It Solutions 203
Review Questions 203

interview Vinton G. Cerf 206

part 2 Algorithms and Digitizing Information

chapter 7 An Introduction to Debugging
To Err Is Human 213

Precision: The High Standards of Computing 215
Exactly How Accurate Is "Precise?" 215
Debugging: What's the Problem? 216
A Dialog About Debugging 219
Debugging Recap 222
Butterflies and Bugs: A Case Study 222
No Printer Output: A Classic Scenario 232
Ensuring the Reliability of Software 235
Summary 237
Try It Solutions 238
Review Questions 238

chapter 8 Representing Information Digitally
Bits and the "Why" of Bytes 241

Digitizing Discrete Information 243
Fundamental Information Representation 245
Hex Explained 250
Digitizing Text 251
The *Oxford English Dictionary* 255
Summary 259
Try It Solutions 260
Review Questions 260

chapter 9 Principles of Computer Operations
Following Instructions 264

Instruction Execution Engines 266
The Fetch/Execute Cycle 268
Anatomy of a Computer 268
The Program Counter: The PC's PC 273
Instruction Interpretation 274
Cycling the Fetch/Execute Cycle 278
Software 280
Integrated Circuits 285
How Semiconductor Technology Works 288
Combining the Ideas 291
Summary 292
Try It Solutions 293
Review Questions 293

chapter 10 Algorithmic Thinking
What's the Plan? 297

Algorithm: A Familiar Idea 299
Analyzing *Alphabetize CDs* Algorithm 306
Abstraction in Algorithmic Thinking 310
Summary 314
Try It Solutions 314
Review Questions 314

chapter 11 Representing Multimedia Digitally
Light, Sound, Magic 318

Digitizing Color 320
Computing on Representations 327
Digitizing Sound 330
Digital Images and Video 334
Optical Character Recognition 337
Virtual Reality: Fooling the Senses 339
Bits Are It 341
Summary 342
Try It Solutions 343
Review Questions 343

interview Ray Kurzweil 347

part 3 Data and Information

chapter 12 Social Implications of IT
Computers in Polite Society 353

Out on Good Behavior 355
Expect the Unexpected 358
Creating Good Passwords 361
Spam 365
Scams 368
Viruses and Worms 371
Protecting Intellectual Property 379
Plan of Action 384
Summary 387
Try It Solutions 387
Review Questions 388

chapter 13 Privacy and Digital Security
Shhh, It's a Secret 391

Privacy: Whose Information Is It? 393
A Privacy Definition 395
Enjoying the Benefits of Privacy 396
Fair Information Practices 397
Comparing Privacy Across the Atlantic 398
The Cookie Monster 402
Encryption and Decryption 406
Public Key Cryptosystems 409
RSA Public Key Cryptosystem 410
Redundancy Is Very, Very, Very Good 416
Summary 419
Try It Solutions 420
Review Questions 421

chapter 14 The Basics of Spreadsheets
Fill-in-the-Blank Computing 424

Arranging Information 426
Computing with Spreadsheets 430
Daily Spreadsheets 440
Summary 452
Try It Solutions 453
Review Questions 453

chapter 15 Advanced Spreadsheets for Planning
"What If" Thinking Helps 458

Designing a Spreadsheet 460
Conditional Formatting 463
Conditional Formulas 467
Naming: Symbolic Reference 470
"What If" Analysis 473
Analyzing Data Using Filtering 479
Summary 483
Try It Solutions 484
Review Questions 484

chapter 16 Introduction to Database Concepts
A Table with a View 488

Differences Between Tables and Databases 490
XML: A Language for Metadata Tags 492
Tables and Entities 499
Operations on Tables 503
Join Operation 511
Structure of a Database 514
Summary 525
Try It Solutions 526
Review Questions 526

chapter 17 A Case Study in Database Organization
The iDiary Database 529

Thinking About a Personal Database 531
A Preliminary Exercise 532
The iDiary Database 542
Using the iDiary Daily 556
Summary 558
Try It Solutions 558
Review Questions 559

interview Alan Kay 561

part 4 Problem Solving

chapter 18 Fundamental Concepts Expressed in JavaScript
Get with the Program 567

Overview: Programming Concepts 569
Names, Values, and Variables 571
Names Have Changing Values 571
Names in a Program Are Called Variables 572
A Variable Declaration Statement 573
Three Basic Data Types of JavaScript 575
The Assignment Statement 578
An Expression and Its Syntax 581
A Conditional Statement 585
The Espresso Program 589
Summary 592
Try It Solutions 593
Review Questions 594

chapter 19 A JavaScript Program
The Bean Counter 597

Preliminaries 599
Background for the GUI 600
Creating the Graphical User Interface 604
Event-Based Programming 607
Critiquing the Bean Counter 612
Recap of the Bean Counter Application 613
Summary 615
Try It Solutions 616
Review Questions 616

chapter 20 Programming Functions
Thinking Big 619

Anatomy of a Function 621
Forms and Functions 624
Writing Functions, Using Functions 628
The Memory Bank Web Page 636
Improving the Memory Bank Web Page 640
Add Final Touches to Memory Bank 644
Summary 647
Try It Solutions 648
Review Questions 648

chapter 21 Iteration Principles
Once Is Not Enough 651

Iteration: *Play It Again, Sam* 653
JavaScript Rules for for Loops 656
Experiments with Flipping Coins 670
Indexing 673
Arrays 674
The Busy Animation 666
Summary 671
Try It Solutions 672
Review Questions 673

chapter 22 A Case Study in Algorithmic Problem Solving
The Smooth Motion Application 677

The Smooth Motion Application 679
Planning Smooth Motion 680
Build the Basic Web Page GUI 683
Animate the Grid 684
The Best Laid Plans . . . 689
Build Controls 691
Sense the Keys 692
Staircase Detection 695
Assemble Overall Design 697
Primp the Design 698
Summary 700
Try It Solutions 701
Review Questions 702

chapter 23 Limits to Computation
Computers Can Do Almost {❑ Everything, ❑ Nothing} 705

Can Computers Think? 707
Acting Intelligently? 709
Acting Creatively 714
The Universality Principle 717
More Work, Slower Speed 721
How Hard Can a Problem Be? 723
Summary 725
Try It Solutions 726
Review Questions 726

chapter 24 A Fluency Summary
Click to Close 730

Two Big IT Ideas 732
Fluency: Less Is More 733
Lifelong IT Learning 735
Shifting for Yourself 738
Try It Solutions 738
Review Questions 738

interview Tim Berners-Lee 741

appendix A XHTML Reference 743

appendix B iDiary: Tags and Templates 748

appendix C JavaScript Programming Rules 754
appendix D Bean Counter Program 761
appendix E Memory Bank Code 764
appendix F Smooth Motion Program 770

Glossary 773
Answers to Selected Questions 787
Index 795
Credits 813

The Master said: "To learn something and then put it into practice at the right time. Is this not a joy?"

—THE ANALECTS OF CONFUCIUS
